

considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

37. As indicated above, the Second FNPRM seeks comment on whether the Commission should adopt rules establishing an approval mechanism for new connectors and associated content protection technologies to be used with unidirectional digital cable products. Consumer electronics manufacturers may be required to seek such approval prior to implementing new connectors and associated content protection technologies in unidirectional digital cable products. We welcome comment on modifications of this proposal to lessen any potential impact on small entities, while still remaining consistent with our policy goals.

38. The Second FNPRM also seeks comment on the potential applicability of certain transmission standards for digital cable systems to systems with an activated channel capacity of 550 MHz or greater. Since such cable systems are often owned by small cable operators, we seek comment on the potential impact of this proposed rule upon small cable operators and whether some relief mechanism, such as waivers, would help alleviate any potential impact on small entities.

39. With respect to the proposed requirement for consumer electronics manufacturers to provide consumers with pre-sale information regarding the functionalities of unidirectional digital cable televisions, we seek comment on how this might affect small manufacturers. We also seek comment on whether the potential economic burden on small entities might be lessened, while still generally retaining the requirement or the intended effect of the requirements.

40. Finally, the Second FNPRM seeks comment on whether to permit or ban the down-resolution by MVPDs of non-broadcast MVPD programming. We believe this requirement would largely impact the DBS industry, which is primarily composed of large entities. To the extent that small entities might be adversely affected by this potential requirement, we welcome comments on

possible small entity-related alternatives.

41. *Federal Rules Which Duplicate, Overlap, or Conflict with the Commission's Proposals.* None.
