

requirements of this paragraph as follows:

(1) Each tank must have a vent that connects to the highest point of the tank, discharges on a weather deck through a bend of 180 degrees (3.14 radians), and is fitted with a 30-by-30-mesh corrosion-resistant flame screen. Vents from two or more tanks may combine in a system that discharges on a weather deck.

(2) The net cross-sectional area of the vent pipe for the tank must be—

(i) Not less than 312.3 square millimeters (0.484 square inches) for any tank filled by gravity; or

(ii) Not less than that of the fill pipe for any tank filled under pressure.

(e) *Fuel piping.* Except as permitted in paragraphs (e)(1), (2), and (3) of this section, each fuel line must be seamless and made of steel, annealed copper, nickel-copper, or copper-nickel. Each fuel line must have a wall thickness of not less than 0.9 millimeters (0.035 inch) except that—

(1) Aluminum piping is acceptable on an aluminum-hull vessel if it is installed outside the engine room and is at least Schedule 80 in thickness; and

(2) Nonmetallic flexible hose is acceptable if it—

(i) Is used in lengths of not more than 0.76 meters (30 inches);

(ii) Is visible and easily accessible;

(iii) Does not penetrate a watertight bulkhead;

(iv) Is fabricated with an inner tube and a cover of synthetic rubber or other suitable material reinforced with wire braid; and

(v) Either,—

(A) If it is designed for use with compression fittings, is fitted with suitable, corrosion-resistant, compression fittings, or fittings compliant with SAE J1475 (incorporated by reference in § 27.102); or,

(B) If it is designed for use with clamps, is installed with two clamps at each end of the hose. Clamps must not rely on spring tension and must be installed beyond the bead or flare or over the serrations of the mating spud, pipe, or hose fitting. Hose complying with SAE J1475 is also acceptable.

(3) Nonmetallic flexible hose complying with SAE J1942 (incorporated by reference in § 27.102) is also acceptable.

(f) A towing vessel of less than 24 meters (79 feet) in length may comply with any of the following standards for fuel systems rather than with those of paragraph (e) of this section:

(1) ABYC H-33 (incorporated by reference in § 27.102).

(2) Chapter 5 of NFPA 302 (incorporated by reference in § 27.102).

(3) 33 CFR Chapter I, subchapter S (Boating Safety).

Subpart C—Fire-Suppression Equipment for Towing Vessels

§ 27.301 What are the requirements for fire pumps, fire mains, and fire hoses on towing vessels?

By April 29, 2005, you must provide a self-priming, power-driven, fixed fire-pump, a fire main, and hoses and nozzles in accordance with paragraphs (a) through (c) of this section; or a portable pump, and hoses and nozzles, in accordance with paragraphs (d) and (e) of this section, for your towing vessel.

(a) The fixed fire-pump must be capable of—

(1) Delivering water simultaneously from the two highest hydrants, or from both branches of the fitting if the highest hydrant has a Siamese fitting, at a pitot-tube pressure of at least 344 kPa (50 psi) and a flow rate of at least 300 lpm (80 gpm); and

(2) Being energized from the operating station and from the pump.

(b) The fire main must have a sufficient number of fire hydrants with attached hose to reach any part of the machinery space using a single length of fire hose.

(c) The hose must be lined commercial fire-hose, at least 40mm (1.5 inches) in diameter, 15 meters (50 feet) in length, and fitted with a nozzle made of corrosion-resistant material capable of providing a solid stream and a spray pattern.

(d) The portable fire pump must be self-priming and power-driven, with—

(1) A minimum capacity of at least 300 lpm (80 gpm) at a discharge gauge pressure of not less than 414 kPa (60 psi), measured at the pump discharge;

(2) A sufficient amount of lined commercial fire hose at least 40mm (1.5 inches) in diameter and 15 meters (50 feet) in length, immediately available to attach to it so that a stream of water will reach any part of the vessel; and

(3) A nozzle made of corrosion-resistant material capable of providing a solid stream and a spray pattern.

(e) You must stow the pump with its hose and nozzle outside of the machinery space.

§ 27.303 What are the requirements for fire-extinguishing equipment on towing vessels in inland service, and on towing vessels in ocean or coastal service whose construction was contracted for before August 27, 2003?

You must carry on your towing vessel both—

(a) The minimum number of hand-portable fire extinguishers required by 46 CFR subpart 25.30; and

(b) By April 29, 2005, either—

(1) An approved B-V semi-portable fire-extinguishing system to protect the engine room; or

(2) A fixed fire-extinguishing system installed to protect the engine room of the vessel.

§ 27.305 What are the requirements for fire-extinguishing equipment on towing vessels in ocean or coastal service whose construction was contracted for on or after August 27, 2003?

(a) You must carry on your towing vessel both—

(1) The minimum number of hand-portable fire extinguishers required by 46 CFR subpart 25.30; and

(2) An approved B-V semi-portable fire-extinguishing system to protect the engine room.

(b) You must have a fixed fire-extinguishing system installed to protect the engine room of the vessel.

Dated: February 4, 2003.

Paul J. Pluta,

Rear Admiral, Coast Guard, Assistant Commandant for Marine Safety, Security and Environmental Protection.

BILLING CODE 4910-15-P

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corporation

33 CFR Part 402

[Docket No. SLSDC 2003-14687]

RIN 2135-AA17

Tariff of Tolls

AGENCY: Saint Lawrence Seaway Development Corporation, DOT.

ACTION: Final rule.

SUMMARY: The Saint Lawrence Seaway Development Corporation (SLSDC) and the St. Lawrence Seaway Management Corporation (SLSMC) of Canada, under international agreement, jointly publish and presently administer the St. Lawrence Seaway Tariff of Tolls in their respective jurisdictions. The Tariff sets forth the level of tolls assessed on all commodities and vessels transiting the facilities operated by the SLSDC and the SLSMC. The SLSDC is revising its regulations to reflect the fees and charges charged by the SLSMC in Canada starting in the 2003 navigation season, which are effective only in Canada. The SLSDC also is amending the regulations to increase the minimum charge per lock transited for full or partial transit of the Seaway to be charged by the SLSDC for transit

through the U.S. locks of vessels that are not pleasure craft or vessels subject in Canada to the tolls under items 1 and 2 of the Tariff. Since this latter proposed amendment would be of applicability in the United States, comments were invited on only on this. (See **SUPPLEMENTARY INFORMATION.**) The Tariff of Tolls is in effect in Canada. For consistency, because these are, under international agreement, joint regulations, and to avoid confusion among users of the Seaway, the SLSDC finds that there is good cause to make this U.S. version of the amendments effective upon publication.

DATES: This rule is effective on April 29, 2003.

FOR FURTHER INFORMATION CONTACT: Marc C. Owen, Chief, Counsel, Saint Lawrence Seaway Development Corporation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-6823.

SUPPLEMENTARY INFORMATION: The Saint Lawrence Seaway Development Corporation (SLSDC) and the St. Lawrence Seaway Management Corporation (SLSMC) of Canada, under international agreement, jointly publish and presently administer the St. Lawrence Seaway Tariff of Tolls in their respective jurisdictions. (The Tariff is called the Schedule of Fees and Charges in Canada.) The amendments are described in the following summary.

The Tariff sets forth the level of tolls assessed on all commodities and vessels transiting the facilities operated by the SLSDC and the SLSMC. The SLSDC is revising § 402.8, "Schedule of Tolls," to reflect the fees and charges charged by the SLSMC in Canada starting in the 2003 navigation season. With one exception, the changes affect the tolls for commercial vessels and are applicable only in Canada as the collection of the U.S. portion of tolls for commercial vessels is waived by law (33 U.S.C. 988a(a)). Accordingly, no notice and comment was necessary on these amendments. The SLSDC also is amending the regulations to increase the minimum charge per lock transited for

full or partial transit of the Seaway to be charged by the SLSDC for transit through the U.S. locks of vessels that are not pleasure craft or vessels subject in Canada to the tolls under items 1 and 2 of the Tariff. Since only this latter proposed amendment would be of applicability in the United States, comments were invited on only on this. A Notice of Proposed Rulemaking was published on March 17, 2003 (67 FR 12644). Interested parties have been afforded an opportunity to participate in the making of the amendment applicable in the United States. No comments were received. That amendment is described in the following summary.

The specific change is the amendment of § 402.8, "Schedule of Tolls", to increase the per lock charge for transit through a U.S. lock from \$16.24 to \$16.44. This increase is due to higher operating costs at the locks. The footnote to § 402.8 is also amended to clarify that this charge will be collected by the SLSDC for the U.S. locks in U.S. funds instead of at par.

Regulatory Evaluation

This regulation involves a foreign function of the United States and therefore Executive Order 12866 does not apply and evaluation under the Department of Transportation's Regulatory Policies and Procedures is not required.

Regulatory Flexibility Act Determination

The Saint Lawrence Seaway Development Corporation certifies that this regulation will not have a significant economic impact on a substantial number of small entities. The St. Lawrence Seaway Tariff of Tolls primarily relates to commercial users of the Seaway, the vast majority of whom are foreign vessel operators. Therefore, any resulting costs will be borne mostly by foreign vessels.

Environmental Impact

This regulation does not require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321, *et reg.*) because it is not a major federal action significantly affecting the quality of human environment.

Federalism

The Corporation has analyzed this rule under the principles and criteria in Executive Order 13132, Dated August 4, 1999, and has determined that it does not have sufficient federalism implications to warrant a Federalism Assessment.

Unfunded Mandates

The Corporation has analyzed this rule under title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4, 109 Stat. 48) and determined that it does not impose unfunded mandates on State, local, and tribal governments and the private sector requiring a written statement of economic and regulatory alternatives.

Paperwork Reduction Act

This regulation has been analyzed under the Paperwork Reduction Act of 1995 and does not contain new or modified information collection requirements subject to the Office of Management and Budget review.

List of Subjects in 33 CFR Part 402

Vessels, Waterways.
 ■ Accordingly, the Saint Lawrence Seaway Development Corporation is amending 33 CFR part 402, Tariff of Tolls, as follows:

PART 402—TARIFF OF TOLLS

■ 1. The authority citation for part 402 continues to read as follows:

Authority: 33 U.S.C. 983(a), 984(a)(4), and 988, as amended; 49 CFR 1.52.

■ 2. § 402.8 is revised to read as follows:

§ 402.8 Schedule of tolls.

Item	Column 1 Description of charges	Column 2 Rate (\$) Montreal to or from Lake Ontario (5 locks)	Column 3 Rate (\$) Welland Canal—Lake Ontario to or from Lake Erie (8 locks)
1.	Subject to item 3, for complete transit of the Seaway, a composite toll, comprising: (1) A charge per gross registered ton of the ship, applicable whether the ship is wholly or partially laden, or is in ballast, and the gross registered tonnage being calculated according to prescribed rules for measurement in the United States or under the International Convention on Tonnage Measurement of Ships, 1969, as amended from time to time.	0.0894	0.1453

Item	Column 1 Description of charges	Column 2 Rate (\$) Montreal to or from Lake Ontario (5 locks)	Column 3 Rate (\$) Welland Canal—Lake Ontario to or from Lake Erie (8 locks)
	(2) A charge per metric ton of cargo as certified on the ship's manifest or other document, as follows:		
	(a) Bulk cargo	0.9275	0.6145
	(b) General cargo	2.2348	0.9834
	(c) Steel slab	2.0225	0.7040
	(d) Containerized cargo	0.9275	0.6145
	(e) Government aid cargo	N/a	N/a
	(f) Grain	0.5698	0.6145
	(g) Coal	0.5475	0.6145
	(3) A charge per passenger per lock	1.3185	1.3185
	(4) A charge per lock for transit of the Welland Canal in either direction by cargo ships:		
	(a) Loaded	N/a	490.79
	(b) In ballast	N/a	362.62
2.	Subject to item 3, for partial transit of the Seaway	20 percent per lock of the applicable charge under items 1 (1) and (2) plus the applicable charge under items 1 (3) and (4).	13 percent per lock of the applicable charge under items 1 (1) and (2) plus the applicable charge under items 1 (3) and (4)
3.	Minimum charge per ship per lock transited for full or partial transit of the Seaway.	16.44	16.44
4.	A rebate applicable for the 2003 navigation season to the rates of item 1 to 3.	Rebate of 0%	Rebate of 0%
5.	A charge per pleasure craft per lock transited for full or partial transit of the Seaway, including applicable federal taxes. ¹	20.00	20.00

¹ The applicable charge at the Saint Lawrence Seaway Development Corporation's locks (Eisenhower, Snell) for pleasure craft is \$20 U.S. or \$30 Canadian per lock. The applicable charge under item 3 at the Saint Lawrence Seaway Development Corporation's locks (Eisenhower, Snell) will be collected in U.S. dollars. The other amounts are in Canadian dollars and are for the Canadian share of tolls. The collection of the U.S. portion of tolls for commercial vessels is waived by law (33 U.S.C. 988a(a)).

Issued at Washington, DC on April 22, 2003.
 Saint Lawrence Seaway Development Corporation.

BILLING CODE 4910-61-M

DEPARTMENT OF HOMELAND SECURITY
Federal Emergency Management Agency
44 CFR Part 65
[Docket No. FEMA-D-7537]
Changes in Flood Elevation Determinations
AGENCY: Federal Emergency Management Agency, Emergency Preparedness and Response Directorate, Department of Homeland Security.
ACTION: Interim rule.

SUMMARY: This interim rule lists communities where modification of the base (1% annual chance) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be

calculated from the modified base flood elevations for new buildings and their contents.
DATES: These modified base flood elevations are currently in effect on the dates listed in the table and revise the Flood Insurance Rate Map(s) (FIRMs) in effect prior to this determination for each listed community.
 From the date of the second publication of these changes in a newspaper of local circulation, any person has ninety (90) days in which to request through the community that the Mitigation Division Director reconsider the changes. The modified elevations may be changed during the 90-day period.
ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.
FOR FURTHER INFORMATION CONTACT: Mary Jean Pajak, Acting Chief, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-2831.
SUPPLEMENTARY INFORMATION: The modified base flood elevations are not listed for each community in this interim rule. However, the address of

the Chief Executive Officer of the community where the modified base flood elevation determinations are available for inspection is provided.
 Any request for reconsideration must be based upon knowledge of changed conditions, or upon new scientific or technical data.
 The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.
 For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.
 The modified base flood elevations are the basis for the floodplain management measures that the community is required to either adopt or to show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program (NFIP).
 These modified elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more
