2. Commonwealth Edison Company

Take notice that on July 8, 2003, Commonwealth Edison Company (ComEd), tendered for filing a proposed amendment to its FERC Electric Service Tariff, Second Revised Vol. No. 5. ComEd states that the proposed changes eliminate from Schedule C the reference to use of power flow models "updated by MAIN." ComEd also states that the

proposed change simply identifies the power flow models as "updated."

ComEd states that the change is necessary because as PJM takes over determining Available Transfer Capability (ATC), a preliminary phase leading to ComEd's integration into PJM, the power flow models used to determine ATC in some instances may not be updated by MAIN.

ComEd asserts that instead, PJM increasingly will be performing the updates of the power flow models. ComEd states that the models will be the same ones used before integration into PJM, but they will be updated by PJM rather than MAIN as the integration proceeds.

ComEd states that copies of the filing were served upon the public utility's jurisdictional customers, the Illinois Commerce Commission, and interveners in this docket.
