NUCLEAR REGULATORY COMMISSION

[Docket No. 40-8989]

Issuance of Environmental Assessment and Finding of No Significant Impact for Exemption From Certain NRC Licensing Requirements for Special Nuclear Material for Envirocare of Utah, Inc.

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an Order pursuant to Section 274f of the Atomic Energy Act that would modify an Order transmitted to Envirocare of Utah, Inc. (Envirocare) on May 24, 1999. The Order was published in the **Federal Register** on May 21, 1999 (64 FR 27826). The 1999 Order exempted Envirocare from certain NRC regulations and permitted Envirocare, under specified conditions, to possess waste containing special nuclear material (SNM), in greater quantities than specified in 10 CFR part 150, at Envirocare's low-level waste (LLW) disposal facility located in Clive, Utah, without obtaining an NRC license pursuant to 10 CFR part 70. The 1999 Order permits Envirocare to possess SNM without regard for mass. Rather than relying on mass to ensure criticality safety, concentration-based limits are being applied, such that accumulations of SNM at or below these concentration limits would not pose a criticality safety concern. The methodology used to establish these limits is discussed in the 1999 SER that supported the 1999 Order.

Envirocare is licensed by the State of Utah, an NRC Agreement State, under a 10 CFR part 61 equivalent license for
