# **CURRENT SITUATION**

Indonesia Update

- According to international and local media sources, on February 15, the Government of Indonesia (GOI) began
  relocating displaced persons in Aceh Province to semi-permanent barrack housing. The GOI plans to construct a total
  of 803 barracks designed to house approximately 9,730 families for two years, while state-owned enterprises build
  permanent dwellings under the supervision of the Ministry of Regional Resettlement and Infrastructure. The GOI has
  pledged that all relocations will be voluntary.
- On February 13, the USAID/Disaster Assistance Response Team (DART) visited two internally displaced persons (IDP) camps in Banda Aceh. In the first camp, some residents wanted to move to the newly constructed barracks while others chose to remain at the camps, and the GOI has reportedly accepted their decisions. In the second camp, none of the residents wanted to relocate, and the GOI has not pressured them to move. During the February 14 shelter meeting, non-governmental organizations (NGOs) reported that the GOI had two principles for the relocations: 1) move villages as a whole from temporary camps to barracks; and 2) move people to the barracks nearest their current position and/or home village. The USAID/DART will continue to monitor the situation closely.
- The USAID/DART reports that according to implementing partners in Aceh, the International Medical Corps and International Rescue Committee, the most prevalent health problem in the affected population is scabies.
- According to the USAID/DART, 60 out of 250 midwives in Banda Aceh died in the tsunami disaster. Implementing
  partner Johns Hopkins Program for International Education in Gynecology and Obstetrics (JHPIEGO) reports that of
  the three midwifery schools in Banda Aceh, one was completely destroyed, one was partially destroyed, and one was
  slightly damaged. Some midwifery schools on the west coast of Aceh have reportedly lost 30 to 50 percent of their
  students due to the tsunami. USAID/OFDA has provided more than \$250,000 to JHPIEGO to support maternal and
  child health activities in Aceh.

### Sri Lanka Update

• Based on a USAID/DART and United Kingdom's Department for International Development (DFID) joint assessment of Jaffna District in northern Sri Lanka, the USAID/DART reports that the tsunami affected approximately 20 of Jaffna's 400 villages, mostly on the northeastern tip of Point Pedro. The tsunami also impacted livelihoods and infrastructure on the islands off the northwestern coast. Some of the hardest hit regions of Jaffna are in territory

<sup>1</sup> President Bush's supplemental budget request to Congress was for \$950 million.

<sup>&</sup>lt;sup>2</sup> The value of assistance provided by the U.S. Department of Defense is not included in this figure.

- controlled by the Liberation Tigers of Tamil Eelam (LTTE). According to the assessment team, inter-agency coordination mechanisms were already in place at the time of the tsunami in order to respond to the ongoing civil conflict. Prior to the tsunami, 23 NGOs worked in the district on conflict-related issues and approximately 30 are currently responding to the tsunami. The U.N. High Commissioner for Refugees (UNHCR) is the designated lead agency for the tsunami response, and each sector has an NGO or U.N. agency as the lead coordinator.
- At a recent shelter coordination meeting in Hambantota District, attendees discussed appropriate designs for permanent housing. Organizations have emphasized the need to consider housing solutions more comprehensively with particular attention to livelihoods and social structures that could be disrupted due to relocations. A local government official emphasized that residents would not be permitted to rebuild within 100 meters of the coast and that a 300-meter buffer zone would be enforced in some areas.

#### India Update

• USAID/India reports that relief and recovery operations are continuing in the Andaman and Nicobar Islands. In the shelter sector, the government plans to have temporary shelters ready by April to house displaced persons currently residing in relief camps. The water supply has been fully restored in Nancowry and Kamrota Islands, and has been restored 90 percent in Port Blair, 50 percent at Campbell Bay, and 40 percent in Teresa Island. On Car Nicobar, nine wells have been activated, and 80 percent of the water supply restored through spring and wells. In addition, the Department of Drinking Water Supply and the Ministry of Water Resources are jointly conducting damage assessments and developing restoration plan for the Andaman and Nicobar Islands.

#### Maldives Update

• On February 14, the World Bank reported that total damages in the Maldives are estimated at \$470 million or 62 percent of the country's Gross Domestic Product (GDP), based on a recent assessment. The World Bank noted that the total damage estimate excludes the cost of environmental damage and substantial soil erosion on affected islands that rely on agriculture and home-based market gardening. According to the World Bank, the tsunami response has reinforced the official policy of encouraging voluntary relocation to less vulnerable islands aimed at mitigating the risks of future tsunamis and rising sea levels; developing economies of scale in the provision of public and private services; strengthening service quality; improving welfare; and retaining the population in the atolls.

### **USG ASSISTANCE**

USAID Regional Response

• The USAID/DART and the U.S. military continue to conduct needs assessments and provide supplies and essential logistic support for the relief efforts in affected countries.

#### Indonesia

• To date, the USG has provided more than \$42.1 million in emergency food assistance, relief supplies, shelter, water and sanitation, health, livelihoods recovery, psychological and social support, logistics and coordination, and rehabilitation activities for affected communities in Indonesia.

#### Sri Lanka

• To date, the USG has provided nearly \$62.0 million in emergency food assistance, relief supplies, shelter, water and sanitation, health, livelihoods recovery, psychological and social support, protection and anti-trafficking, logistics and coordination, and cleanup and rehabilitation activities for affected communities in Sri Lanka. USAID/OFDA-funded cash-for-work and micro-finance programs are fully operational. The USAID/DART in Sri Lanka is now focusing on program monitoring and evaluation and ongoing situational assessments.

### India

On January 31, the USAID/DART in India closed out more than four weeks of operations, after providing
approximately \$4.1 million for shelter, water and sanitation, cleanup and rehabilitation, education, and cash for work
activities for tsunami-affected residents. During the transition to the recovery phase, USAID/India will oversee
USAID/OFDA-funded programs, and USAID/OFDA and USAID/India will share responsibility for monitoring.

#### Maldives

• On January 28, the USAID/DART Field Officer posted to Male' closed out operations in Maldives. USAID staff and military personnel were stationed on the ground in Maldives since January 10, conducting assessments and coordinating and consulting with government officials. During that time, USAID/OFDA provided more than \$1.3 million for health, nutrition, water and sanitation, and emergency relief supplies.

### Department of Defense (DOD) Humanitarian Assistance

• As of February 14, 683 U.S. military personnel are involved in delivering more than 24.5 million pounds of relief supplies and equipment to the affected region. All 411 military personnel currently on the ground are in Thailand. The U.S. military has delivered a total of 9,487,681 pounds of relief supplies to the governments of Indonesia, Sri Lanka, Thailand, and other affected nations.

### **BACKGROUND**

• A magnitude 9.0 earthquake on December 26, off the west coast of Northern Sumatra, Indonesia, triggered massive tsunamis that affected several countries throughout South and Southeast Asia, as well as Somalia, Tanzania, Kenya, and the Seychelles in East Africa. Aftershocks from the December 26 earthquake continue to occur in the region.

- Based on initial findings of USG assessment teams and on the recommendation of Secretary of State Colin Powell and
  USAID Administrator Andrew Natsios, on December 31, President George W. Bush committed \$350 million toward
  earthquake and tsunami relief and recovery efforts. Dollar amounts in this Fact Sheet are part of the total pledge of
  \$350 million and refer to specific funding actions that have been committed and programmed.
- On February 9, President Bush announced that he is seeking \$950 million as part of the supplemental appropriations request to support the rehabilitation and reconstruction of areas devastated by the Indian Ocean tsunami and to cover the costs of relief efforts to date. This amount includes an additional \$600 million above the President's initial commitment of \$350 million.

# FURTHER INFORMATION ON USG RESPONSE

More detailed information on USG assistance already provided, including DOD resources, in response to the disaster may be found in previous USAID/OFDA Fact Sheets:

http://www.usaid.gov/our work/humanitarian assistance/disaster assistance/countries/indian ocean/et index.html

#### PUBLIC DONATION INFORMATION

Making a Donation to Relief Efforts

- The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations.
- For a list of humanitarian organizations accepting donations for South Asia relief operations, please see "Tsunami Relief" at <a href="https://www.usaid.gov">www.usaid.gov</a> or <a href="https://www.usaid.gov">www.usaif.eedom.corps.gov</a>. Or call the Center for International Disaster Information at (703) 276-1914.
- USAID encourages cash donations because they allow aid professionals to procure the exact items needed (often in the affected region); reduce the burden on scarce resources (such as transportation routes, staff time, warehouse space, etc); can be transferred very quickly and without transportation costs; support the economy of the disaster-stricken region; and ensure culturally, dietary, and environmentally appropriate assistance.

### Additional Information

- Information on making effective donations can be found on the following websites:
  - o USAID: <u>www.usaid.gov</u>, Keyword: Donations
  - The Center for International Disaster Information: www.cidi.org
  - o InterAction: "Guide to Appropriate Giving" at www.interaction.org
- Information on choosing a charity to support can be found on the following websites:
