

Sacramento CA Disaggregated Seismic Hazard for 1 second Spectral Acceleration, 0.2145 g

PE = 2% in 50 years. Hazard radius 300 km, DeltaR=10 km

Mw: Color-coded binned average. Bins are equal-area.

Principal hazards: San Andreas (1906 segment); local seismicity, G.V.F.S.

Red lines represent Quaternary faults.

View angle 35 degrees from horizon.
