

enable NSF to identify any prudent conservation practices and mitigation measures that may be applied across the entire program. The site-specific information is required by NMFS (and sometimes the U.S. Fish and Wildlife Service) for purposes of preparing Biological Opinions and Incidental Take Statements required by ESA.

The main focus of the Programmatic EIS/OEIS will be on the seismic operations to be conducted from NSF's primary seismic ship, soon to be the R/V Marcus G. Langseth. The Programmatic EIS/OEIS will address the variety of airgun configurations to be operated from the Langseth, as well as the multi-beam bathymetric sonar, sub-bottom profiler, and other acoustic sources to be deployed as standard equipment. In addition, the Programmatic EIS/OEIS will deal with the generally small airgun sources occasionally operated from other vessels under NSF sponsorship.

Major environmental issues that will be addressed in the Programmatic EIS/OEIS include marine biological resources including Essential Fish Habitat (EFH), acoustic impacts to marine mammals, fish, sea turtles, invertebrates, and threatened and endangered species; cultural resources; human health and safety; socioeconomic and land use (*i.e.*, commercial, private, and recreational uses of the marine environment); and water quality.

NSF is initiating this scoping process for the purpose of determining the extent of issues to be addressed and identifying the significant issues related to this action. NSF will hold public scoping meetings as identified in the **DATES AND ADDRESSES** section of this notice. These meetings will also be advertised in area newspapers. NSF and NMFS representatives will be available at these meetings to receive comments from the public regarding issues of concern to the public. Federal, state, and local agencies and interested individuals are encouraged to take this opportunity to identify environmental concerns that should be addressed during the preparation of the Programmatic EIS/OEIS. Agencies and the public are also invited and encouraged to provide written comments on scoping issues in addition to, or in lieu of, oral comments at the public meeting. To be most helpful, scoping comments should clearly describe issues or topics that the commenter believes the Programmatic EIS/OEIS should address.

We invite you to learn about the NSF seismic research program at an informational open house, and to assist

NSF in defining the alternatives and the scope of environmental issues related to the seismic research program. All our public meeting locations are wheelchair-accessible. If you plan to attend a scoping meeting/open house, and need special assistance such as sign language interpretation or other reasonable accommodation, please notify NSF (see **FOR FURTHER INFORMATION CONTACT**) at least 3 business days in advance. Include your contact information as well as information about your specific needs.

We request public comments or other relevant information on environmental issues related to the NSF seismic research program. The public meetings are not the only opportunity you have to comment. In addition to or in place of attending a meeting, you can submit comments to Dr. Alexander Shor by October 28, 2005 (see **FOR FURTHER INFORMATION CONTACT**). We will consider all comments received during the comment period. We request that you include in your comments:

- Your name and address (especially if you would like to receive a copy of the Draft Programmatic EIS/OEIS upon completion);
- An explanation for each comment; and
- Include any background materials to support your comments as you feel necessary.

You may mail, e-mail, or hand deliver your comments to NSF (see **FOR FURTHER INFORMATION CONTACT**). All comment submissions must be unbound, no larger than 8½ by 11 inches, and suitable for copying and electronic scanning. Please note that regardless of the method used for submitting comments or material, all submissions will be publicly available and, therefore, any personal information you provide in your comments will be open for public review. In addition, if you wish to receive a copy of the Draft Programmatic EIS/OEIS, please indicate this in your comment. No decision will be made to implement any alternative until the NEPA process is completed.

Dated: September 19, 2005.

Alexander Shor,

Program Director, Division of Ocean Sciences, National Science Foundation.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–285]

Omaha Public Power District; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Omaha Public Power District (the licensee) to withdraw its July 25, 2003, application for proposed amendment to Facility Operating License No. DPR–40 for the Fort Calhoun Station, Unit No. 1 (FCS), located in Washington County, Nebraska.

The proposed amendment would have revised the facility technical specifications pertaining to FCS Technical Specification Section 3.0.2, Table 3–2, Table 3–5, 3.6, 3.7, 3.8, and the Definitions Section. This proposed change would have provided a risk-informed alternative to the existing surveillance interval for the integrated Engineered Safety Features (ESF) and Loss-of-Offsite Power testing required to be performed on each ESF equipment train during each outage. The proposed change would have modified the surveillance interval requirement for these refueling interval surveillance requirements to go to a staggered test basis scheme. Using a staggered test basis, only one train would be tested each refueling outage. Omaha Public Power District stated that this amendment was modeled after the Improved Standard Technical Specifications and is based on a study conducted by the Westinghouse Electric Company, LLC on behalf of the Combustion Engineering Owners Group in topical report WCAP–15830–P, "Staggered Integrated ESF Testing," and Technical Specification Task Force 450.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on August 19, 2003 (68 FR 49818). However, by letter dated September 9, 2005, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated July 25, 2003, and the
