Supplementary Information:
OMB Control No.: 3060-1061.

Title: Earth Station on Board Vessels (ESV).

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 15.

Estimated Time Per Response: 2 hours (average).

Frequency of Response: On occasion reporting requirement and recordkeeping requirement.

Total Annual Burden: 113 hours.

Total Annual Cost: \$15,000.

Privacy Act Impact Assessment: N/A.

Needs and Uses: The Federal Communications Commission ("Commission") is revising OMB Control No. 3060-1061 to reflect the decisions of the Report and Order (R&O) titled, "In the Matter of Procedures to Govern the Use of Satellite Earth Stations on Board Vessels (ESV) in the

5925-6425 MHz/3700-4200 MHz Bands and 14.0-14.5 GHz/11.7-12.2 GHz Bands," IB Docket No. 02-10, FCC 04-286. The Commission adopted the R&O on December 15, 2004 and released it on January 6, 2005. This rulemaking established licensing and service rules for ESVs operating in the 5925-6425 MHz/3700-4200 MHz Bands (C-band) and 14.0-14.5 GHz/11.7-12.2 GHz Bands (Ku-band).

The R&O includes the following new Paperwork Reduction Act (PRA) reporting requirements: (1) C-Band and Ku-Band operators ("ESV operators") must collect and maintain vessel tracking data to assist the Commission and affected operators in identifying and resolving sources of interference; (2) as a condition of licensing, applicants proposing ESV operations in the 14.0-14.05 GHz band and planning to travel within 100km of these sites, must coordinate through the National Telecommunications and Information Administration (NTIA) Interdepartment Radio Advisory Committee (IRAC) and, if necessary, the appropriate government agency to resolve any potential concerns; and (3) ESV operators must have a contact that is available in the United States 24 hours a day, 7 days a week, to respond to Fixed Satellite (FS) operators' requests. The name, telephone number, and other pertinent information of the contact will be posted on the Commission's Web site, <http://www.fcc.gov>.

The Commission established licensing and service rules to govern ESV operations and to prevent interference to other satellite operators within the Ku-bands and C-bands. ESV operators must submit applications (FCC Form 312) and exhibits (Schedule B) to the Commission to demonstrate that they comply with the Commission's legal and/or engineering rules. Additionally, the Commission requires a myriad of technical information such as frequency of operation, maximum transmit power, antenna diameter, antenna height above sea level and velocity of the vessel to evaluate potential interference to fixed satellites from ESVs. The purposes of this information collection are as follows: (1) Establish licensing and service rules for ESVs in the Ku-band and C-band; (2) prevent harmful interference to Fixed Services (FS), Fixed Satellite Service (FSS) and other satellite services and (3) further the Commission's goals to manage spectrum efficiently and (4) advance the provision of broadband telecommunications services that will benefit U.S. citizens on passenger, government (military and civilian), cargo and large recreational vessels. Without such information, the

Commission would not be able to take the necessary measures to prevent harmful interference to satellite services from ESVs. Finally, the Commission would not be able to advance its goals of managing spectrum efficiently and promoting broadband technologies to benefit American consumers throughout the United States and abroad.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0056.

Title: Part 68—Connection of Terminal Equipment to the Telephone Network.

Form No: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 58,520 respondents; 70,450 responses.

Estimated Time Per Response: .05—24 hours.

Frequency of Response: On occasion reporting requirement, recordkeeping requirement and third party disclosure requirement.

Total Annual Burden: 32,027 hours.

Total Annual Cost: \$1,160,000.

Privacy Act Impact Assessment: N/A.

Needs and Uses: The purpose of 47 CFR part 68 is to protect the telephone network from certain types of harm and interference to other subscribers. To ensure that consumers, providers of telecommunications, the Administrative Council, telecommunications certification bodies (TCBs), and the Commission are able to trace products to the party responsible for placing terminal equipment on the market, it is essential to require manufacturers and suppliers to provide the information required by part 68. In addition, it is necessary that incumbent local exchange carriers (ILECs) provide the information in part 68 to warn their subscribers of impending disconnection of service when subscriber terminal equipment is causing telephone network harm. The Commission is seeking extension (no change) to this information collection in order to obtain the full three-year clearance from OMB.

OMB Control No.: 3060-0262.

Title: Section 90.179, Shared Use of Radio Stations.

Form No: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local and tribal government.

Number of Respondents: 42,000.

Estimated Time Per Response: .75 hours.

Frequency of Response: Recordkeeping requirement.

Total Annual Burden: 31,500 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Needs and Uses: The Commission was directed by the United States Congress, in the Balanced Budget Act of 1997, to dedicate 2.4 MHz of electromagnetic spectrum in the 746–806 MHz band for public safety services. Section 90.179 requires that Part 90 licensees that share use of their private land mobile radio facility on non-profit, cost-shared basis keep a written sharing agreement as part of the station records. Regardless of the method of sharing, an up-to-date list of persons who are sharing the station and the basis of their eligibility under Part 90 must be maintained. The requirement is necessary to identify users of the systems should interference problems develop. This information is used by the Commission to investigate interference complaints and resolve interference and operational complaints that may arise among the users. The Commission is seeking extension (no change) to this information collection in order to obtain the full three-year clearance from OMB.
