File No. 1553: Mr. Michael Mangold of the U.S. Fish and Wildlife Service's (FWS's) Maryland Fishery Resources Office proposes to release up to 12 sterile shortnose sturgeon into the Potomac River in hopes that these fish would lead the researchers to location(s) where possible remnant wild fish aggregate. These fish would carry

internal CART tags for tracking and would be released on May 1, 2006. The researchers plan to recapture the sterile fish on or around November 1, 2006. Sterile fish would be provided by FWS's Warm Springs Regional Fisheries Center in Georgia.

File No. 1555: Mr. David J. Stier, Director of Springfield Science Museum, proposes to obtain and use five captive-bred, non-releaseable juvenile shortnose sturgeon from the Silvio O. Conte Anadromous Fish Research Center in Turners Falls, MA. The proposed project to display endangered cultured shortnose sturgeon responds directly to a recommendation from the NMFS recovery plan outline for this species. This sturgeon display would be used to increase public awareness of the shortnose sturgeon and its status. The proposed project would educate the public on shortnose sturgeon life history and the reasons for the species decline. The permit is requested for a duration of 5 years.

Dated: October 28, 2005.
