

ramp on Route 9A between Cedar and Liberty Streets and locating the cultural/museum complex at the northeast corner of Liberty Street and Route 9A.

Located in Lower Manhattan, the Project Site includes both the World Trade Center (WTC) Site and the Southern Site. The WTC Site is bounded by Route 9A, Vesey, Church, and Liberty Streets. The Southern Site is immediately to the south of the WTC Site and comprises two adjacent city blocks, one bounded by Liberty, Washington, Albany, and Greenwich Streets, and the other bounded by Liberty Street, Route 9A, and Cedar and Washington Streets. The Southern Site includes those properties commonly known as 130 Liberty Street, 140 Liberty Street, and 155 Cedar Street. Also included in the Southern Site are subsurface portions of Liberty Street from the eastern side of Route 9A to the western side of Greenwich Street; Washington Street from the northern side of Cedar Street to the southern side of Liberty Street; and subsurface portions of Cedar Street from the eastern side of Route 9A to the eastern side of Washington Street.

An EA for the Proposed Refinements has been prepared by LMDC, as lead agency, in cooperation with HUD and the Port Authority. Based on this assessment, LMDC has determined that the Proposed Refinements will not, either individually or cumulatively, have a significant impact on the quality of the human environment or a significant adverse environmental impact not already analyzed and disclosed in the FGEIS for the Proposed Action. Therefore, a supplemental environmental impact statement will not be undertaken under NEPA or SEQRA. LMDC will not take any administrative action on the Proposed Refinements prior to the expiration of the comment period.

Questions may be directed to the individual named above under the heading **FOR FURTHER INFORMATION CONTACT**.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[CA-610-1610-DP]

#### Notice of Availability for the Proposed West Mojave Plan and Final Environmental Impact Statement

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of availability.

**SUMMARY:** In accordance with the National Environmental Policy Act (NEPA), the Federal Land Policy and Management Act (FLPMA) and Bureau of Land Management (BLM) management policies, the BLM announces the availability of the Proposed West Mojave Plan (WMP) and Final Environmental Impact Statement (EIS). This planning activity encompasses approximately 3.3 million acres of public lands administered by the BLM's California Desert District, located in Inyo, Kern, Los Angeles and San Bernardino Counties in southern California.

The Proposed WMP is being prepared in collaboration with State and local governments. This collaborative process is taking into account local, regional and national needs and concerns. The conservation strategy to be implemented on public lands includes measures that would be compatible with the development of a habitat conservation plan on 3.0 million acres of private and local government lands within the planning area.

**DATES:** BLM Planning Regulations (43 CFR 1610.5-2) state that any person who participated in the planning process, and has an interest that may be adversely affected, may protest. The protest must be filed within 30 days of the date that the Environmental Protection Agency (EPA) publishes this notice in the **Federal Register**. More specific instructions and requirements for protests are contained in the **SUPPLEMENTARY INFORMATION** section of this notice.

**ADDRESSES:** Copies of the Proposed WMP and Final EIS are available upon request from the District Manager, California Desert District Office, located at 22835 Calle San Juan De Los Lagos, Moreno Valley, CA 92553. Copies may be examined at the BLM's California Desert District Office in Moreno Valley, and at BLM's Ridgecrest Field Office, located at 33S Richmond Road, Ridgecrest CA 93555, and Barstow Field Office located at 2601 Barstow Road, Barstow CA 92311, during regular business hours from 7:45 a.m. to 4 p.m.,

Monday through Friday, except holidays.

**FOR FURTHER INFORMATION CONTACT:** For further information and/or to have your name added to the BLM's mailing list, contact Linda Hansen, California Desert District Manager, at (909) 697-5207.

**SUPPLEMENTARY INFORMATION:** The Proposed WMP addresses the management of 3.3 million acres of public lands administered by the BLM in eastern Kern County, southern Inyo County, northern Los Angeles County and western San Bernardino County, all of which are within the State of California. The BLM's Ridgecrest and Barstow Field Offices administer most of these public lands. A small amount of acreage administered by the BLM's Needles and Palm Springs Field Offices is also affected. All public lands are within the California Desert Conservation Area (CDCA), and all lie within the jurisdiction of the BLM's California Desert District.

The Proposed WMP is being prepared collaboratively with local jurisdictions, State and other Federal agencies. The purpose of the WMP is to develop conservation strategies for over 100 Federal and state-listed plant and animal species that are found within the western Mojave Desert, including the federally listed as threatened desert tortoise (*Gopherus agassizii*) and the state-listed Mojave Ground Squirrel (*Spermophilus mohavensis*), and to simplify procedures for complying with the Endangered Species Act of 1974 as amended, and the California Endangered Species Act. Other issues addressed include the development of a motorized vehicle access network for public lands in the region, and effects of the program on regional economics, growth-inducing impacts, livestock grazing, mining, cultural resources and recreation. The WMP would be implemented on public lands through amendments to the BLM's CDCA Plan.

The Final EIS considers and analyzes seven (7) alternatives (A-G), including a No Action Alternative, with Alternative A identified as the BLM's Proposed Alternative. These Alternatives have been developed based on extensive public input following an initial round of scoping meetings in January 1992, extensive biological and field survey work in the late 1990's, nearly 50 "task group" meetings attended by representatives of the participating agencies and jurisdictions and the general public between December 1999 and May 2002, numerous other public meetings, a final round of scoping meetings in June and July 2002 and January 2003, and seven public hearings
