**FOR FURTHER INFORMATION CONTACT:** Contact Al Hendricks, Superintendent, Capitol Reef National Park, at the above address and telephone number.

**SUPPLEMENTARY INFORMATION:** The National Park Service has prepared this draft environmental impact statement with three cooperating agencies: the State of Utah, Garfield County, Utah, and the Federal Highway Administration. The proposed action is

the product of the environmental compliance process that was needed to fulfill the May 30, 2001, settlement agreement that established a mutually agreeable procedure among the National Park Service, the State of Utah, and Garfield County, Utah to address road modifications that Garfield County would like to make to the Burr Trail.

This draft environmental impact statement evaluates four alternatives. Three of these involve road modifications that stabilize parts of the road surface using gravel base material (some with geotextile fabric), install or improve drainage facilities at creek crossings, modify the road at mile point 0.65 to accommodate two-way traffic, and install slope protection along portions of the northern bank of Sandy Creek. The fourth alternative, the No Action Alternative, describes continuation of current conditions. This was the baseline condition against which the other alternatives were compared. Environmental consequences of the actions were evaluated to determine their potential effects to air quality; geologic features and landforms; biological soil crusts and soils; vegetation; wildlife; surface water, hydrology, and floodplains; natural soundscapes; ethnographic and ethnographic landscape resources; public health and safety; visitor use and experience; socioeconomic; park operations; Garfield County road maintenance operations; and sustainability and long-term management.
