SUPPLEMENTARY INFORMATION:

Background: EPA's Office of Pollution Prevention and Toxics (OPPT) had requested that the SAB peer review the Agency's Draft Perfluorooctanoic Acid (PFOA) Risk Assessment. Background on this SAB review was provided in previous **Federal Register** notices published on March 29, 2004 (69 FR 16249-50); and January 12, 2005 (70 FR 2157-58). EPA's Draft PFOA risk assessment and related background information on PFOA may be found at: <http://www.epa.gov/opptintr/pfoa/index.htm>. The purpose of this upcoming teleconference is for the SAB Review Panel to finalize its draft review report. A meeting agenda and the draft SAB review report will be posted on the SAB Web site (<http://www.epa.gov/sab/>) prior to the meeting.

Procedures for Providing Public Comment: It is the policy of the EPA SAB Staff Office to accept written public comments of any length for the SAB Panel's consideration, and to accommodate oral public comments whenever possible. The EPA SAB Staff Office expects that public statements presented at this meeting will not be repetitive of previously submitted oral or written statements to this Panel. Requests to provide oral comments must be in writing (e-mail, fax or mail) and received by Dr. Shallal no later than five business days prior to the teleconference or meeting in order to reserve time on the meeting agenda. For teleconferences, opportunities for oral comment will usually be limited to no more than three minutes per speaker or organization and no more than fifteen minutes total. Written comments should be received in the SAB Staff Office at least five business days prior to the meeting date so that the comments may be made available to the committee for their consideration. Comments should be supplied to the DFO at the address/contact information noted above in the following formats: one hard copy with original signature and one electronic copy via e-mail (acceptable file format: Adobe Acrobat, WordPerfect, Word, or Rich Text files (in IBM-PC/Windows 98/2000 format).

Dated: March 31, 2005.

FEDERAL RESERVE SYSTEM

Federal Open Market Committee; Domestic Policy Directive of May 3, 2005

In accordance with § 271.25 of its rules regarding availability of information (12 CFR part 271), there is set forth below the domestic policy directive issued by the Federal Open Market Committee at its meeting held on March 22, 2005.¹

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability and promote sustainable growth in output. To further its long-run objectives, the Committee in the immediate future seeks conditions in reserve markets consistent with increasing the federal funds rate to an average of around 3 percent.

The vote encompassed approval of the paragraph below for inclusion in the statement to be released shortly after the meeting:

“The Committee perceives that, with appropriate monetary policy action, the upside and downside risks to the attainment of both sustainable growth

The minutes are published in the Federal Reserve Bulletin and in the Board's annual report.

and price stability should be kept roughly equal. With underlying inflation expected to be contained, the Committee believes that policy accommodation can be removed at a pace that is likely to be measured. Nonetheless, the Committee will respond to changes in economic prospects as needed to fulfill its obligation to maintain price stability.”

By order of the Federal Open Market Committee, May 26, 2005.

Office of Global Health Cooperative Agreement for: Global Capacity through International Non-Governmental Organization (NGO) Partnership

Announcement Type: New.
Funding Opportunity Number: PA AA123.

Catalog of Federal Domestic Assistance Number: 93.067.

Key Dates: Application Deadline: July 6, 2005.

I. Funding Opportunity Description

Authority: Section 301 and 307 of the Public Health Service Act, [42 U.S.C. Sections 241 and 242(l)], as amended.

Background: The Centers for Disease Control and Prevention (CDC)'s global programs are an essential component of promoting health and preventing disease in the United States and abroad, including ensuring rapid detection and response to emerging health threats. CDC cannot accomplish these efforts alone and therefore seeks to further its work and interests through partnerships with other organizations. The Office of Global Health seeks to collaborate with an international Non-Governmental Organization (NGO) in a public-private partnership. Working with a NGO with a strong international presence will leverage existing resources to achieve health goals. CDC's knowledge and abilities as a scientific organization can be effectively joined with an international NGO that has

demonstrated ability to effectively implement public health interventions in many different countries. This international NGO's experience in community-based interventions in a variety of health topic areas will enable public health science to be readily disseminated into the field. The intent of this announcement is to enhance collaboration through building a public-private partnership, and to create impact in health protection and promotion goals.

This partnership will focus in two areas: Global Disease Detection (GDD) and a selection of the United Nations Millennium Development Goals (MDG). The goal of the GDD initiative is to develop national and international capacity to better detect and respond to infectious disease outbreaks of potential worldwide importance, whether natural or intentional. CDC is working to recognize infectious disease outbreaks faster, improve the ability to control and prevent outbreaks, and to detect emerging microbial threats. Through this cooperative agreement CDC intends to work with an international NGO partner to pilot a program to increase disease detection and surveillance in non-traditional or resource poor settings. The goal of this pilot is to build disease response and detection capacity in an international NGO at the local level through communities, organizations, and the Ministry of Health (MOH).

The Millennium Development Goals (MDG) are a framework of eight goals, 18 targets, and 48 measures that were developed by experts from the United Nations (UN), the International Monetary Fund (IMF), the World Bank, and the Organization for Economic Cooperation and Development (OECD). These goals were unanimously adopted by the member states of the UN in September 2000 to focus on outcomes that promote human development as the key to sustaining social and economic progress. Several of these goals target areas of focus for the CDC including maternal mortality, environmental health, and early childhood health and development. Although the MDGs are visionary in nature, projects supported through this cooperative agreement have the potential for being antecedent steps toward attaining these goals through increased service provision, learning capacity, and demonstrated competence. The MDGs are eight goals that outline areas of action, 18 targets that further define this involvement, and 48 indicators that provide measurable benchmarks for interventions. See the following UN
