

FEDERAL MARITIME COMMISSION

Ocean Transportation Intermediary License Applicants

Notice is hereby given that the following applicants have filed with the Federal Maritime Commission an application for license as a Non-Vessel-Operating Common Carrier and Ocean Freight Forwarder—Ocean Transportation Intermediary pursuant to section 19 of the Shipping Act of 1984 as amended (46 U.S.C. app. 1718 and 46 CFR part 515).

Persons knowing of any reason why the following applicants should not receive a license are requested to contact the Office of Transportation Intermediaries, Federal Maritime Commission, Washington, DC 20573.

Non-Vessel-Operating Common Carrier Ocean Transportation Intermediary Applicants

Caribbean West Indies Shipping Inc., 6710 Cornelius Street, Philadelphia, PA. Officers: Randolph Waithe, President. (Qualifying Individual) Mark K. Waithe, Director.
 Embarque La Isla, Inc., 440 E. 182nd Street, Bronx, NY 10457. Officer: Nelson R. Bravo, President. (Qualifying Individual)

CN Worldwide B.V., Lichtenauerlaan 102–120, 3062 ME Rotterdam, The Netherlands. Officers: Tjeerd Greidanus, Director. (Qualifying Individual) Anita Ernesaks, Managing Director.

Non-Vessel-Operating Common Carrier and Ocean Freight Forwarder Transportation Intermediary Applicants

Transmax Logistics Corporation, 1550 E. Higgins Road, Suite 114, Elk Grove Village, IL 60007. Officers: Sharia J. Lee, President. (Qualifying Individual) Lewis S. Lee, Director.
 Unity Logistics And Transportation, Inc., 9010 S.W. 137th Avenue, Suite 246, Miami, FL 33186. Officer: Pedro Streb, President. (Qualifying Individual).

Ocean Freight Forwarder—Ocean Transportation Intermediary Applicants

Euro Shippers Inc., 7667 West 95th Street, Suite 308, Hickory Hills, IL 60457. Officer: Ulick M. O’Sullivan, President. (Qualifying Individual).
 Smart International Cargo Express, Inc., 1841 Carter Avenue, (Esq. 176 Street), Bronx, NY 10457. Officer: Eunice B. Acosta, President. (Qualifying Individual).

Carrie International Freight Services, LLC, 215 East Bay Street, Suite 201–L, Charleston, SC 29401. Officer: Donald O. Montgomery, Member. (Qualifying Individual)

Macro Express Services, 4164 Sta Monica Blvd., Los Angeles, CA 90029. Jabonillo Vincent, Sole Proprietor.

Dated: October 28, 2005.

Bryant L. VanBrakle,

Secretary.

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Board of Governors of the Federal Reserve System

SUMMARY: Background

On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board of Governors of the Federal Reserve System (Board) its approval authority under the Paperwork Reduction Act, as per 5 CFR 1320.16, to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board under conditions set forth in 5 CFR 1320 Appendix A.1. Board-approved

collections of information are incorporated into the official OMB inventory of currently approved collections of information. Copies of the OMB 83–Is and supporting statements and approved collection of information instruments are placed into OMB’s public docket files. The Federal Reserve may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Request for comment on information collection proposals

The following information collections, which are being handled under this delegated authority, have received initial Board approval and are hereby published for comment. At the end of the comment period, the proposed information collections, along with an analysis of comments and recommendations received, will be

submitted to the Board for final approval under OMB delegated authority. Comments are invited on the following:

- a. Whether the proposed collection of information is necessary for the proper performance of the Federal Reserve’s functions; including whether the information has practical utility;
- b. The accuracy of the Federal Reserve’s estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;
- c. Ways to enhance the quality, utility, and clarity of the information to be collected; and
- d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Comments must be submitted on or before January 3, 2006.

ADDRESSES: You may submit comments, identified by FR Y–9, FR Y–11, or FR 2314 by any of the following methods:

• Agency Web Site: <http://www.federalreserve.gov>. Follow the instructions for submitting comments at <http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm>.

• Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

• E-mail: regs.comments@federalreserve.gov. Include docket number in the subject line of the message.

• FAX: 202/452-3819 or 202/452-3102.

• Mail: Jennifer J. Johnson, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, DC 20551.

All public comments are available from the Board's web site at www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm as submitted, unless modified for technical reasons. Accordingly, your comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper in Room MP-500 of the Board's Martin Building (20th and C Streets, N.W.) between 9:00a.m. and 5:00p.m. on weekdays.

FOR FURTHER INFORMATION CONTACT: A copy of the proposed form and instructions, the Paperwork Reduction Act Submission (OMB 83-I), supporting statement, and other documents that will be placed into OMB's public docket files once approved may be requested from the agency clearance officer, whose name appears below.

Michelle Long, Federal Reserve Board Clearance Officer (202-452-3829), Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551. Telecommunications Device for the Deaf (TDD) users may contact (202-263-4869), Board of Governors of the Federal Reserve System, Washington, DC 20551.

Proposal to approve under OMB delegated authority the revision, without extension, of the following reports:

1. Report title: Financial Statements for Bank Holding Companies.
Agency form number: FR Y-9C, FR Y-9LP, and FR Y-9SP
OMB control number: 7100-0128
Frequency: Quarterly and semiannually.
Reporters: Bank holding companies.
Annual reporting hours: FR Y-9C: 116,279; FR Y-9LP: 18,639; FR Y-9SP: 47,379.
Estimated average hours per response: FR Y-9C: 37.95; FR Y-9LP: 4.75; FR Y-9SP: 5.10.

Number of respondents: FR Y-9C: 766; FR Y-9LP: 981; FR Y-9SP: 4,645.
General description of report: This information collection is mandatory (12 U.S.C. 1844(c)). Confidential treatment is not routinely given to the data in these reports. However, confidential treatment for the reporting information, in whole or in part, can be requested in accordance with the instructions to the form, pursuant to sections (b)(4), (b)(6) and (b)(8) of the Freedom of Information Act (5 U.S.C. §§522(b)(4), (b)(6) and (b)(8)).

Abstract: The FR Y-9C, FR Y-9LP, and FR Y-9SP are standardized financial statements for the consolidated bank holding company (BHC) and its parent. The FR Y-9 family of reports historically has been, and continues to be, the primary source of financial information on BHCs between on-site inspections. Financial information from these reports is used to detect emerging financial problems, to review performance and conduct pre-inspection analysis, to monitor and evaluate capital adequacy, to evaluate BHC mergers and acquisitions, and to analyze a BHC's overall financial condition to ensure safe and sound operations.

The FR Y-9C consists of standardized financial statements similar to the Consolidated Reports of Condition and Income (Call Reports) (FFIEC 031 & 041; OMB No. 7100-0036) filed by commercial banks. The FR Y-9C collects consolidated data from the BHC. The FR Y-9C is filed by top-tier BHCs with total consolidated assets of \$150 million or more and lower-tier BHCs that have total consolidated assets of \$1 billion or more. (Under certain circumstances defined in the General Instructions, BHCs under \$150 million may be required to file the FR Y-9C.) In addition, multibank holding companies with total consolidated assets of less than \$150 million with debt outstanding to the general public or engaged in certain nonbank activities must file the FR Y-9C.

The FR Y-9LP includes standardized financial statements filed quarterly on a parent company only basis from each BHC that files the FR Y-9C. In addition, for tiered BHCs, a separate FR Y-9LP must be filed for each lower tier BHC.

The FR Y-9SP is a parent company only financial statement filed by smaller BHCs. Respondents include one-bank holding companies with total consolidated assets of less than \$150 million and multibank holding companies with total consolidated assets of less than \$150 million that meet certain other criteria. This form is a simplified or abbreviated version of

the more extensive parent company only financial statement for large BHCs (FR Y-9LP). This report is designed to obtain basic balance sheet and income information for the parent company, information on intangible assets, and information on intercompany transactions.

Current actions: The Federal Reserve proposes to modify information collected on the FR Y-9C, FR Y-9LP and FR Y-9SP to (1) increase the asset-size threshold for filing the FR Y-9C and FR Y-9LP from \$150 million to \$500 million; (2) increase the asset-size threshold for filing the FR Y-9SP from under \$150 million to under \$500 million; (3) revise other current filing criteria affecting the reporting of the FR Y-9C, FR Y-9LP and FR Y-9SP; and (4) revise the text of the attestation requirement on the cover page of each report and require signatures specifically from the chief executive officer and chief financial officer. The Federal Reserve proposes the following revisions to the FR Y-9C: (1) add item on loans for purchasing and carrying securities; (2) add item for additional regulatory capital detail; (3) add items for further detail on construction, land development, and land loans; (4) add items for further detail on loans secured by nonfarm nonresidential properties; (5) redefine breakouts for lease financing receivables; (6) add items for further information on credit derivatives; (7) add items for further detail on mortgage banking activities; (8) reclassify reporting of annuity sales revenue; (9) add items for further detail on investment banking, advisory, brokerage, and underwriting income; (10) add items to identify certain secured borrowings; (11) remove threshold for reporting of life insurance assets; (12) revise scope of securitizations to be included in Schedule HC-S; (13) remove the FR Y-9C filing requirement for lower-tier BHCs with total assets of \$1 billion or more; (14) delete or impose a reporting threshold on a number of items; and (15) make revisions to the reporting instructions. Finally, the Federal Reserve proposes to revise the FR Y-9SP by collecting two new items on Schedule SC-M, Memoranda, to identify total off-balance-sheet activities conducted either directly or through a nonbank subsidiary and to identify total debt and equity securities (other than trust preferred securities) outstanding that are registered with the Securities and Exchange Commission (SEC).

The Federal Reserve recognizes that several comments were received by the banking agencies on proposed Call

Report revisions that parallel some of these proposed revisions. The comments received on the Call Report proposal will also be taken into consideration for this proposal.

Proposed Revisions Not Related to Call Report Revisions

The Federal Reserve proposes to make the following revisions to the FR Y-9C effective as of March 31, 2006. The following proposed revisions are not related to the revisions proposed to the Call Report.

Filing Criteria: Asset-Size Threshold

The Federal Reserve proposes to increase the asset-size threshold of the FR Y-9C from \$150 million to \$500 million. BHCs with consolidated assets of less than \$500 million generally would file the parent-only FR Y-9SP. The Federal Reserve further proposes to revise the other criteria used in determining whether a BHC is subject to consolidated FR Y-9C reporting requirements. The revised criteria would more accurately reflect current supervisory views of factors that would warrant consolidated financial reporting and compliance with the capital guidelines. However, the Federal Reserve would retain the current policy that allows a Reserve Bank to require a BHC to file consolidated financial reports if the Reserve Bank determines that such action is warranted for supervisory reasons.

The current reporting requirements that govern the frequency and the level of detail of financial reports filed by BHCs have been in place since 1986 and are principally driven by the asset size of the BHC. Generally, BHCs with consolidated assets of less than \$150 million submit summary parent company financial data semi-annually (FR- Y)9SP). BHCs with consolidated assets of \$150 million or more submit detailed consolidated (FR Y-9C) and parent company (FR Y-9LP) financial data quarterly. When these reporting thresholds were established, \$150 million in consolidated assets represented a reasonable threshold for identifying those BHCs whose operations warranted more extensive consolidated reporting for monitoring risks to safety and soundness.

However, over the last two decades, inflation, industry consolidation, and normal asset growth of BHCs have caused the \$150 million threshold to lose much of its relevance. While the number of BHCs with less than \$500 million in consolidated assets has increased over this time frame, these BHCs hold a smaller percentage of total assets for all BHCs filing the FR Y-9C.

The number of non-complex FR Y-9C respondents with consolidated assets of less than \$500 million has increased by about 560, while their share of total assets of all FR Y-9C respondents has decreased from about 7 percent to about 4 percent. In addition, raising the threshold to \$500 million goes well beyond the level (approximately \$255 million) necessary to adjust the current threshold for inflation. The Federal Reserve believes that raising the threshold to \$500 million achieves an appropriate balance between the goals of reducing regulatory burden and ensuring access to supervisory data necessary for the safety and soundness of BHCs.

One consideration in proposing to increase the threshold for filing the FR Y-9C is that the loss of data could potentially be an issue for BHC management. The Federal Reserve currently produces Bank Holding Company Performance Reports (BHCPRs) that compare a BHC's financial data to those of its peers. BHCs may use the BHCPRs to evaluate and monitor their financial performance. However, most of the BHCs that would be affected are shell, one-bank holding companies; therefore, the Uniform Bank Performance Report¹ should provide most of the information. Nevertheless, the Federal Reserve seeks public comment on any consolidated information BHC management may want to continue reporting and see from BHCs with between \$150 million and \$500 million in total assets for peer review or other internal management purposes.

Other Filing Criteria

The Federal Reserve's current risk-based and leverage-capital standards do not apply to BHCs with consolidated assets of less than \$150 million if the parent holding company is not engaged in nonbank activity involving significant leverage and the parent holding company does not have a significant amount of debt held by the general public. If either of these additional criteria is met, the BHC would be deemed subject to the Federal Reserve's capital guidelines. The FR Y-9C reporting instructions use slightly different criteria and currently exempt BHCs with one bank subsidiary and less than \$150 million in consolidated assets from filing consolidated statements and risk-based capital schedules even if they have public debt or engage in nonbanking activities involving

significant leverage. The Federal Reserve separately has proposed to revise and expand the other criteria under which a BHC would be required to comply with the Federal Reserve's capital guidelines.² The Federal Reserve believes that for BHCs under \$500 million in total consolidated assets, other than those BHCs that meet the additional criteria noted below, bank-level compliance with risk-based and leverage capital requirements would be sufficient for supervisory purposes. The Federal Reserve proposes to modify the FR Y-9C reporting criteria to conform directly with criteria proposed for applicability of these guidelines.

Specifically, the Federal Reserve proposes to require BHCs with consolidated assets of less than \$500 million to comply with the Federal Reserve's capital guidelines and to continue to comply with the FR Y-9C and FR Y-9LP reporting requirements, if the holding company (1) is engaged in significant nonbanking activities either directly or through a nonbank subsidiary; (2) conducts significant off-balance-sheet activities, including securitizations or managing or administering assets for third parties, either directly or through a nonbank subsidiary; or (3) has a material amount of debt or equity securities (other than trust preferred securities) outstanding that are registered with the SEC.³ While the incidence of BHCs with consolidated assets of less than \$500 million meeting any of these criteria is expected to be infrequent, any such holding companies would be notified and given a reasonable timetable for meeting the consolidated capital and reporting requirements.

In addition, the Federal Reserve separately has proposed to amend its capital guidelines to make explicit the Federal Reserve's authority to subject a small BHC to the guidelines if the Federal Reserve determines that such action is warranted for supervisory purposes (comparable to existing to current instructions for FR Y-9C reporting requirements). Furthermore, the proposed amendments to the

² Refer to Federal Reserve Board press release of September 7, 2005. <http://www.federalreserve.gov/boarddocs/press/bcreg/2005/20050907/default.htm>

³ As noted above, these proposed criteria would conform directly with proposed criteria for applicability of capital adequacy guidelines. Responsibility for determination whether such activities are significant or material for any given BHC would rest with the supervisory function at each Federal Reserve district bank. If a Reserve Bank finds that a BHC meet any of these criteria, the Reserve Bank would be responsible for notifying the BHC and establishing the time frame for meeting the capital adequacy guidelines and FR Y-9C reporting requirements.

¹ The Uniform Bank Performance Report is similar to the BHCPR and compares bank financial data to those of its peers.

guidelines would explicitly provide that a small BHC may voluntarily comply with the guidelines. The Federal Reserve proposes that a BHC electing to comply with the guidelines would be required to file the consolidated FR Y-9C. Any BHC that volunteers to file the FR Y-9C would be required to file a complete report and generally would not be permitted to revert back to filing the FR Y-9SP report in any subsequent periods.

Lower-tier Reporting Requirements—The Federal Reserve also proposes to eliminate the reporting exception requiring top-tier BHCs to submit an FR Y-9C for each lower-tier BHC with total consolidated assets of \$1 billion or more. The Federal Reserve has determined that information from such lower-tier institutions is no longer needed for supervisory or safety and soundness reasons.

Schedule HC-C—Loans and Lease Financing Receivables

The Federal Reserve proposes to revise Schedule HC-C, item 9, All other loans, to break out a new item 9.a, Loans for purchasing or carrying securities (secured and unsecured). Current item 9 would be renumbered as 9.b. This item would be defined the same as a comparable item currently reported by banks on the Call Report and is predominantly composed of margin loans with broker-dealers. Margin loans have been growing at the BHC level, particularly due to significant growth in lending to hedge funds. The Federal Reserve proposes collecting this item in order to measure and monitor BHCs involvement in this higher risk activity.

Schedule HC-M—Memoranda

The Federal Reserve proposes to delete Schedule HC-M, item 7, Total assets of unconsolidated subsidiaries and associated companies. This item is no longer needed for supervisory and safety and soundness purposes.

Schedule HC-R—Regulatory Capital

The Federal Reserve proposes to add a new memorandum item 6, Market risk equivalent assets attributable to specific risk (included in Schedule HC-R, item 58). The Federal Reserve's risk-based capital standards require all BHCs with significant market risk to measure their market risk exposure and hold sufficient capital to mitigate this exposure. In general, a BHC is subject to the market risk capital guidelines if its consolidated trading activity, defined as the sum of trading assets and liabilities reported in its FR Y-9C for the previous quarter, equals: (1) 10 percent or more of the BHC's total assets as reported in its FR

Y-C for the previous quarter or (2) \$1 billion or more.

A BHC that is subject to the market risk guidelines must hold capital to support its exposure to general market risk and specific risk. General market risk means changes in the market value of covered positions resulting from broad market movements, such as changes in the general level of interest rates, equity prices, foreign exchange rates, or commodity prices. Covered positions include all positions in a BHCs trading account and foreign exchange and commodity positions, whether or not in the trading account. Specific risk means changes in the market value of specific positions due to factors other than broad market movements and includes event and default risk.

The specific risk exposure of specific positions is significantly higher than the general market risk of covered positions. The Federal Reserve proposes to break out market risk equivalent assets⁴ attributable to specific risk to better measure and monitor the BHCs market risk position and to better compare such risk positions taken across BHCs subject to the market risk guidelines.

Instructions

In addition to modifying instructions to incorporate the proposed reporting changes, the Federal Reserve proposes to revise the following reporting instructions.

General Instructions—The Federal Reserve proposes to modify the reporting instructions under "Who Must Report," section C, Shifts in Reporting Status: A top-tier BHC that reaches \$500 million or more in total consolidated assets as of June 30 of the preceding year should begin reporting on the FR Y-9C in March of the current year. If a BHC reaches \$500 million or more in total consolidated assets due to a business combination, then the BHC would be instructed to begin reporting the FR Y-9C beginning with the first quarterly report date following the effective date of the business combination. In general, once a BHC reaches or exceeds \$500 million in total assets and begins filing the FR Y-9C, it should file a complete FR Y-9C going forward. If a BHC's total assets should subsequently fall to less than \$500 million for four consecutive quarters, then the BHC may revert to filing the FR Y-9SP.

⁴ A BHC's market risk equivalent assets is equal to its measure for market risk multiplied by 12.5 (the reciprocal of the minimum 8.0 percent capital ratio). For further information, see the Federal Reserve's risk-based capital standards.

Schedule HC-B—Securities – The Federal Reserve proposes to modify the reporting instructions for Schedule HC-B, memorandum item 2, Remaining maturity of debt securities, to instruct BHCs to report the remaining maturity of holdings of floating rate debt securities according to the amount of time remaining until the next repricing date. This instruction would be consistent with the current reporting treatment for a comparable item in the Call Report. The instructions for this item would also be expanded to define the terms fixed interest rate, floating rate, and next repricing date to make them consistent with the Call Report instructions.

Schedule HC-K—Quarterly Averages—The Federal Reserve proposes to modify Schedule HC-K, item 11, Equity capital, to no longer exclude net unrealized losses on marketable equity securities, other net unrealized gains and losses on available-for-sale securities, and accumulated net gains (losses) on cash flow hedges when calculating average equity capital. This revision would ensure a more accurate calculation of return on equity.

Proposed Revisions Related to Call Report Revisions

The Federal Reserve proposes to make the following revisions to the FR Y-9C to parallel proposed changes to the Call Report.

Attestation

The Federal Reserve proposes to revise the current attestation by one director of the BHC that he or she has reviewed the data filed and has transmitted a copy to the Board of Directors for their information. Given the importance placed upon the quality of the information reported, the Federal Reserve believes that the chief executive officer (or person performing similar functions) and chief financial officer (or person performing similar functions) are the most appropriate officers within a BHC to sign a declaration concerning the preparation of the data. The Federal Reserve recognizes that at some BHCs the same individual may perform the functions of both chief executive officer and chief financial officer. The note on the cover page would be replaced with the following text:

"We, the undersigned officers of this bank holding company, are responsible for establishing and maintaining adequate internal controls over financial reporting, including controls over regulatory reports. We attest that the Consolidated Financial Statements for Bank Holding Companies (including the

supporting schedules) for this report date have been prepared in accordance with the instructions issued by the Federal Reserve and to the best of our knowledge and belief are true and correct.”

This statement would be followed with the signatures and printed names of the chief executive officer (or person performing similar functions) and chief financial officer (or person performing similar functions) of the BHC and the date of these signatures.

Holdings of Asset-Backed Securities

Schedule HC-B, Securities collects a six-way breakdown of BHCs' holdings of asset-backed securities (not held for trading purposes) in items 5.a through 5.f.⁵ Because BHCs with domestic offices only and less than \$1 billion in total assets hold only a nominal percentage of the industry's investments in asset-backed securities, the Federal Reserve has determined that continuing to request a breakdown by category of these institutions' limited holdings of asset-backed securities is no longer warranted. Instead, these BHCs would report only their total holdings of asset-backed securities in Schedule HC-B. However, all BHCs with foreign offices and other BHCs with \$1 billion or more in total assets would continue to report the existing breakdown of their asset-backed securities in this schedule.

Impact of Derivatives on Income

BHCs report the effect that their use of derivatives outside the trading account has had on their year-to-date interest income, interest expense, and net noninterest income in income statement (Schedule HI) memoranda items 10.a through 10.c. The amounts reported in these memoranda items are aggregates of all nontrading derivative positions and combine derivatives that may have substantially different underlying risk exposures (e.g., interest rate risk, foreign exchange risk, and credit risk). In recognition of proposed new data on credit derivatives (below), the Federal Reserve proposes to delete the three income statement memoranda items since they are of lesser utility.

Bankers Acceptances

The FR Y-9C balance sheet (Schedule HC) has long required BHCs to separately disclose the amount of their Customers' liability on acceptances outstanding (item 9) and their BHC's Liability on acceptances executed and outstanding (item 18) and provide an

indication of whether the BHC has reduced the liabilities on acceptances executed and outstanding by the amount of any participations in bankers acceptances (Schedule HC-M, item 10). In addition, BHCs also report the amount of Participations in acceptances conveyed to others by the reporting bank holding company (Schedule HC-L, item 5). Over time, the volume of acceptance assets and liabilities as a percentage of industry assets and liabilities has declined substantially to a nominal amount, with only a small number of BHCs reporting these items. The Federal Reserve proposes to delete these four items and instruct BHCs to include any acceptance assets and liabilities in Other assets and Other liabilities, respectively, on the balance sheet and to include in the "Other" category of Schedule HC-F, Other Assets, and Schedule HC-G, Other Liabilities.

Construction, Land Development, and Other Land Loans

Construction, land development, and other land (CLD&OL) lending is a highly specialized set of activities with inherent risks that must be managed and controlled to ensure that these activities remain profitable. Management's ability to identify, measure, monitor, and control the risks from these types of loans through effective underwriting policies, systems, and internal controls is crucial to a sound lending program. In areas of the country that experience high levels of construction activity and an extremely competitive lending environment, these factors often lead to thinner profit margins on CLD&OL loans and looser underwriting standards. Moreover, the risk profiles, including loss rates, of CLD&OL loans vary across loan types because of differences in such factors as underwriting and repayment source. The Federal Reserve's real estate lending standards recognize these differences in risk, for example, by setting higher supervisory loan-to-value limits for 1-4 family residential construction loans than for other construction loans.

The Federal Reserve has seen substantial growth in the volume of CLD&OL loans in recent years. To improve the Federal Reserve's ability to monitor the construction lending activities of individual BHCs and the industry as a whole, the Federal Reserve proposes to obtain separate data on 1-4 family residential CLD&OL loans and all other CLD&OL loans. Such information would also enable the Federal Reserve to identify institutions that significantly shift between 1-4 family residential construction lending

and other construction lending and to identify when institutions that had been solely 1-4 family residential construction lenders move into other types of construction lending.

Specifically, the Federal Reserve proposes to split the existing item for Construction, land development, and other land loans in the loan schedule (Schedule HC-C, item 1.a), the past due and nonaccrual schedule (Schedule HC-N, item 1.a), and the charge-offs and recoveries schedule (Schedule HI-B, item 1.a) into separate items for 1-4 family residential construction, land development, and other land loans and Other construction, land development, and other land loans. In addition, the Federal Reserve proposes to similarly split the item for Commitments to fund commercial real estate, construction, and land development loans secured by real estate in the off-balance-sheet items schedule (Schedule HC-L, item 1.c.(1)) into two items.

Loans Secured by Nonfarm Nonresidential Properties

Loans secured by nonfarm nonresidential properties (commercial real estate loans) include loans made to the occupants of such properties and loans to non-occupant investors. These two types of commercial real estate loans present different risk profiles. Loans secured by owner-occupied properties perform more like a commercial and industrial loan because the success of the occupant's business is the primary source of repayment. To ensure repayment of loans to non-occupant investors, the property must generate sufficient cash flow from the parties who are the occupants.

Because of the significant and growing level of BHC involvement in commercial real estate lending and the different risk characteristics of owner-occupied and other commercial properties, separate reporting of these two categories of commercial real estate would enhance the Federal Reserve's monitoring and risk-scoping capabilities. The Federal Reserve proposes to split the existing item for loans Secured by nonfarm nonresidential properties in the loan schedule (Schedule HC-C, item 1.e), the past due and nonaccrual schedule (Schedule HC-N, item 1.e), and the charge-offs and recoveries schedule (Schedule HI-B, part I, item 1.e) into separate items for owner-occupied nonfarm nonresidential properties and other nonfarm nonresidential properties.

When a commercial property that is partially occupied by the owner and partially occupied (or available to be

⁵ In Schedule HC-B, the asset-backed securities reported in items 5.a through 5.f exclude mortgage-backed securities, which are reported separately in items 4.a.(1) through 4.b.(3) of the schedule.

occupied) by other parties, the property would be considered owner-occupied when the owner occupies more than half of the property's usable space. Properties such as hotels and motels would not be considered owner-occupied. The Federal Reserve requests comment on the reporting of partially owner-occupied properties and on any other definitional issues that may arise when determining whether to report a loan as secured by owner-occupied property.

Retail and Commercial Leases

BHCs currently report a breakdown of their lease financing receivables between those from U.S. and non-U.S. addressees in Schedule HC-C, items 10.a and 10.b, and certain related schedules. BHCs lease various types of property to various types of customers, and the current addressee breakdown, in which only a limited number of BHCs report having leases to non-U.S. addressees, does not provide satisfactory risk-related information about this type of financing activity. When reporting information on their loans that are not secured by real estate in the loan schedule and related schedules, BHCs distinguish, for example, between consumer (retail) loans and commercial loans. As with retail and commercial loans, there are differences between the underwriting of, and repayment sources for, retail and commercial leases.

The Federal Reserve believes that the different risk characteristics of these two types of leases warrant replacing the existing addressee breakdown of leases with a retail versus commercial lease breakdown in the schedules for loans and leases (Schedule HC-C, items 10.a and 10.b), past due and nonaccrual assets (Schedule HC-N, items 8.a and 8.b), and charge-offs and recoveries (Schedule HI-B, Part I, items 8.a and 8.b). Retail (consumer) leases would be defined in a manner similar to consumer loans (that is, as leases to individuals for household, family, and other personal expenditures). Commercial leases would encompass all other lease financing receivables.

Information on Credit Derivatives

The volume of credit derivatives, as measured by their notional amount, has increased significantly at BHCs over the past several years. A limited number of BHCs, almost all of which have in excess of \$1 billion in assets, currently participate in the credit derivatives market. To gain a better understanding of the nature and trends of the credit derivative activities that are concentrated in a small number of large

BHCs, the Federal Reserve proposes to expand the information collected in several schedules.

First, in Schedule HC-L, item 7, where BHCs currently report the notional amounts of the credit derivatives on which they are the guarantor and on which they are the beneficiary, BHCs participating in this activity would be required to provide a breakdown of these notional amounts by type of credit derivative: credit default swaps, total return swaps, credit options, and other credit derivatives. BHCs would also report the maximum amounts they would pay and receive on credit derivatives on which they are the guarantor and on which they are the beneficiary, respectively.

Second, in Schedule HC-R, memorandum item 2, where BHCs currently present a maturity distribution of their derivative contracts that are subject to the risk-based capital requirements, credit derivatives would be added as a new category of derivatives with their remaining maturities reported separately for those that are investment grade and those that are subinvestment grade.

Third, in Schedule HI, memorandum item 9, BHCs that reported average trading assets of \$2 million or more for any quarter of the preceding calendar year currently provide a four-way breakdown of trading revenue by type of risk exposure. When BHCs that must complete memorandum item 9 hold credit derivatives for trading purposes, they have to report the revenue from these derivatives in one of the four existing risk exposure categories, none of which is particularly suitable for reporting such revenue. Accordingly, the Federal Reserve proposes to add a new risk exposure category for credit derivatives. This information would address the current weakness in the reporting of trading revenue, but, more importantly, it would enable the Federal Reserve to begin to identify the extent to which credit derivatives held for trading purposes contribute to a BHC's trading revenue each period and over time.

Finally, the Federal Reserve proposes to replace memorandum item 10 to Schedule HI, Income Statement, with an item to collect the changes in fair value recognized in earnings on credit derivatives that are held for purposes other than trading (for example, to economically hedge credit exposures arising from nontrading assets, such as available-for-sale securities or loans

held for investment,⁶ or unused lines of credit). In this regard, the Federal Reserve reiterates that credit derivatives held for purposes other than trading should not be reported as trading assets or liabilities and the changes in fair value of such credit derivatives should not be reported as trading revenue. Consistent with the existing guidance in the Glossary entry for "Derivative contracts" in the FR Y-9C instructions, credit derivatives held for purposes other than trading with positive and negative fair values should be reported in Other assets and Other liabilities on the balance sheet (Schedule HC). Changes in fair value of derivatives held for purposes other than trading that are not designated as hedging instruments should be reported consistently as either Other noninterest income or Other noninterest expense in the income statement.

1-4 Family Residential Mortgage Banking Activities

Mortgage banking activities, particularly those involving closed-end 1-4 family residential mortgages, have become an increasingly important line of business for many BHCs. Mortgage banking revenues are a significant component of earnings for these institutions and have been critical to the recent record earnings achieved by the banking industry as a whole. The growth of the industry's mortgage banking activities also reflects the central role that securitization mechanisms now play in the mortgage market.

However, these activities and the revenues they generate can be quite volatile over the business and interest rate cycle. Furthermore, a BHC's mortgage banking operations can raise significant management and supervisory concerns related to credit, liquidity, interest rate, and operational risk. Understanding the importance of mortgage banking activities to an institution's financial condition and risk profile requires information about the transactional flows associated with residential mortgages. In this regard, the Office of Thrift Supervision (OTS) has collected a large set of cash flow data on mortgage loan disbursements, purchases, and sales in the Thrift Financial Report (TFR) (Form 1313, OMB No. 1550-0023) for more than a decade.

After considering the OTS's reporting requirements as well as the types of information commonly disclosed by

⁶Loans held for investment are loans that the bank has the intent and ability to hold for the foreseeable future or until maturity or payoff.

banking organizations with large mortgage banking operations, the Federal Reserve proposes to add a new Schedule HC-P that would contain a series of items that are focused on closed-end 1-4 family residential mortgage loans, with data reported separately for first liens and junior liens. The new items would cover loans originated, purchased, and sold during the quarter, loans held for sale at quarter-end, and the year-to-date noninterest income earned from closed-end 1-4 family residential mortgage banking activities. This income would consist of the portion of a BHC's Net servicing fees, Net securitization income, and Net gains (losses) on sales of loans and leases (Schedule HI, items 5.f, 5.g, and 5.i) attributable to closed-end 1-4 family residential mortgage loans.

The proposed new items would be reported by any BHC with \$1 billion or more in total assets or by any BHC that has a bank subsidiary that is required to report this information by the bank subsidiary's primary regulator. For loans originated, purchased, and sold during the quarter, BHCs would report the principal amount of these loans. Originations would include those loans for which the origination and underwriting process was handled by the BHC or a consolidated subsidiary of the BHC, but would exclude those loans for which the origination and underwriting process was handled by another party, including a correspondent or mortgage broker, even if the loan was closed in the name of the BHC or a consolidated subsidiary of the BHC. Such loans would be treated as purchases as would acquisitions of loans closed in the name of another party. Sales of loans would include those transfers of loans that have been accounted for as sales in accordance with generally accepted accounting principles (that is, where the loans are no longer included in the BHC's consolidated total assets). Loans held for sale at quarter-end would be reported at the lower of cost or fair value, consistent with their presentation in the FR Y-9C balance sheet. The Federal Reserve requests comment on the reporting approach discussed in this paragraph.

Income from Annuity Sales

In the income statement (Schedule HI), BHCs currently report commissions and fees from sales of annuities (fixed, variable, and deferred) and related referral and management fees as a component of item 5.h.(2), Income from

other insurance activities.⁷ Because annuities are deemed to be financial investment products rather than insurance, the Federal Reserve proposes to revise the instructions for item 5.h.(2) and item 5.d, Investment banking, advisory, brokerage, and underwriting fees and commissions, by moving the references to annuities in the former item to the latter item.

Investment Banking, Advisory, Brokerage, and Underwriting Income

As the caption for Schedule HI, item 5.d, Investment banking, advisory, brokerage, and underwriting fees and commissions, indicates, this income statement item commingles noninterest income from a variety of activities. In order to better understand the sources of BHCs' noninterest income, the Federal Reserve proposes to distinguish between banks' investment banking (dealer) activities and their sales (brokerage) activities by splitting item 5.d (after moving commissions and fees from annuity sales and related income into this income statement category from item 5.h.(2) as discussed in the preceding section) into three separate items. As revised, item 5.d would be subdivided into items for Fees and commissions from securities brokerage, Fees and commissions from annuity sales, and Investment banking, advisory, and underwriting fees and commissions. Securities brokerage income would include fees and commissions from sales of mutual funds and from purchases and sales of other securities and money market instruments for customers (including other financial institutions) where the BHC is acting as agent.

Certain Secured Borrowings

When BHCs raise funds from sources other than deposit liabilities, they may do so on a secured or unsecured basis. Securities sold under agreements to repurchase (Schedule HC, item 14.b) always represent secured borrowings, whereas Subordinated notes and debentures (Schedule HC, item 19.a) must be unsecured. However, amounts included in Federal funds purchased in domestic offices (Schedule HC, item 14.a) and Other borrowed money (Schedule HC-M, item 14) can be secured or unsecured, but this cannot be

determined at present from the FR Y-9C. This uncertainty adversely affects the assessment of BHCs' liquidity positions. Moreover, as a BHC's condition deteriorates, it usually encounters increasing difficulty in rolling over existing unsecured debt or borrowing additional funds on an unsecured basis.

Thus, to better understand the structure of BHCs' nondeposit liabilities and the effect of these liabilities on liquidity, the Federal Reserve proposes to add two items to Schedule HC-M (items 23.a and 23.b) in which banks would report the secured portion of their Federal funds purchased and their Other borrowed money.

Life Insurance Assets

BHCs include their holdings of life insurance assets (that is, the cash surrender value reported to the BHC by the insurance carrier, less any applicable surrender charges not reflected by the carrier in this reported value) in Schedule HC-F, item 5, Other assets. If the carrying amount of a BHC's life insurance assets included in item 5 exceed 25 percent of its Other assets, the BHC must disclose this carrying amount in item 5.a.

In December 2004, the Office of the Controller of the Currency, the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the OTS issued an Interagency Statement on the Purchase and Risk Management of Life Insurance to provide guidance to institutions to help ensure that their risk management processes for bank-owned life insurance (BOLI) are consistent with safe and sound banking practices. Given the risks associated with BOLI, the Interagency Statement advises institutions that it is generally not prudent for an institution to hold BOLI with an aggregate cash surrender value that exceeds 25 percent of the institution's capital as measured in accordance with its primary federal regulator's concentration guidelines. Although more than 40 percent of all BHCs report the amount of their life insurance assets in item 5.a under the current disclosure threshold of 25 percent of Other assets, this reporting mechanism does not ensure that the Federal Reserve is able to monitor whether all BHCs holding life insurance assets are approaching or have exceeded the concentration threshold of 25 percent of capital. As a consequence, the Federal Reserve proposes to revise Schedule HC-F, item 5.a, by removing the disclosure threshold of 25 percent of Other assets. The Federal Reserve notes that all savings associations are currently required to report the amount

⁷ However, commissions and fees from sales of annuities by a BHCs trust department (or a consolidated trust company subsidiary) that are executed in a fiduciary capacity are to be reported in Income from fiduciary activities in Schedule HI, item 5.a, and income from sales of annuities to BHC customers by the BHC's securities brokerage subsidiary are reported in Investment banking, advisory, brokerage, and underwriting fees and commissions in Schedule HI, item 5.d.

of their life insurance assets in the TFR on Schedule SC, lines SC615 and SC625.

Scope of Securitizations to be Included in Schedule HC-S

In column G of Schedule HC-S, Servicing, Securitization, and Asset Sale Activities, BHCs report information on securitizations and on asset sales with recourse or other seller-provided credit enhancements involving loans and leases other than those covered in columns A through F. Although the scope of Schedule HC-S was intended to cover all of a BHC's securitizations and credit-enhanced asset sales, as currently structured column G does not capture transactions involving assets other than loans and leases. As a result, securitization transactions involving such assets as securities, for example, have not been reported in Schedule HC-S. Therefore, the Federal Reserve proposes to revise the scope of column G to encompass All Other Loans, All Leases, and All Other Assets to ensure that they can identify and monitor the full range of BHCs' involvement in and credit exposure to securitizations and asset sales. The proposed change in the scope of column G is expected to affect only a nominal number of BHCs.

Instructional Clarification

BHCs report the outstanding principal balance of assets serviced for others in Schedule HC-S, memorandum item 2. In memoranda items 2.a and 2.b, the amounts of 1-4 family residential mortgages serviced with recourse and without recourse, respectively, are reported. Memorandum item 2.c covers all other financial assets serviced for others, but BHCs are required to report the amount of such servicing only if the servicing volume is more than \$10 million. The instructions for memoranda items 2.a and 2.b do not explicitly define 1-4 family residential mortgages. However, the caption for column A of the body of Schedule HC-S is 1-4 family residential loans, which the instructions for column A describe as closed-end loans secured by first or junior liens on 1-4 family residential properties as defined for Schedule HC-C, items 1.c.(2)(a) and (b).

Some institutions have asked whether memoranda items 2.a and 2.b should include servicing of home equity lines of credit because such lines are also secured by 1-4 family residential properties. Information on securitizations and asset sales involving home equity lines is reported in column B of the body of Schedule HC-S. To resolve the questions about the scope of memoranda items 2.a and 2.b, the

Federal Reserve proposes to clarify the instructions by stating that these two items should include servicing of closed-end loans secured by first or junior liens on 1-4 family residential properties only. Servicing of home equity lines would be included in memorandum item 2.c.

FR Y-9LP

The Federal Reserve proposes to make the following revisions to the FR Y-9LP effective as of March 31, 2006.

Filing Criteria

The Federal Reserve proposes to increase the asset-size threshold of the FR Y-9LP from \$150 million to \$500 million. The Federal Reserve further proposes to modify the other criteria and include additional criteria that would be used in determining whether a BHC is subject to FR Y-9LP filing requirements.

Specifically, the Federal Reserve proposes to require BHCs with consolidated assets of less than \$500 million to comply with the Federal Reserve's capital guidelines, and to continue to comply with the FR Y-9C and FR Y-9LP reporting requirements, if the holding company (1) is engaged in significant nonbanking activities either directly or through a nonbank subsidiary; (2) conducts significant off-balance-sheet activities, including securitizations or managing or administering assets for third party, either directly or through a nonbank subsidiary; or (3) has a material amount debt or equity securities (other than trust preferred securities) outstanding that are registered with the SEC. While the incidence of BHCs with consolidated assets of less than \$500 million meeting any of these criteria is expected to be infrequent, any such BHCs would be notified and given a reasonable timetable for meeting the consolidated capital and reporting requirements.

The proposed changes are consistent with the proposed revisions to filing criteria to the FR Y-9C, as fully described above. These filing requirements would apply to all BHCs in multi-tiered organizations.

Attestation

The Federal Reserve proposes to revise the current attestation of one director of the BHC that he or she has reviewed the data filed and has transmitted a copy of the data to the Board of Directors for their information. Given the importance placed upon the quality of the information reported, the Federal Reserve believes that the chief executive officer (or person performing similar functions) and chief financial

officer (or person performing similar functions) are the most appropriate officers within a BHC to sign a declaration concerning the preparation of the report. The Federal Reserve recognizes that at some BHCs the same individual may perform the functions of both chief executive officer and chief financial officer. The note on the cover page would be replaced with the following text:

"We, the undersigned officers of this bank holding company, are responsible for establishing and maintaining adequate internal controls over financial reporting, including controls over regulatory reports. We attest that the Parent Company Only Financial Statements for Large Bank Holding Companies (including the supporting schedules) for this report date have been prepared in accordance with the instructions issued by the Federal Reserve and to the best of our knowledge and belief are true and correct."

This statement would be followed with the signatures and printed names of the chief executive officer (or person performing similar functions) and chief financial officer (or person performing similar functions) of the BHC and the date of these signatures.

Instructions

Instructions would be clarified in an attempt to achieve greater consistency in reporting by respondents.

FR Y-9SP

The Federal Reserve proposes to make the following changes to the FR Y-9SP effective as of June 30, 2006.

Filing Criteria

The Federal Reserve proposes to increase the asset-size threshold of the FR Y-9SP from companies with total consolidated assets of less than \$150 million to companies with total consolidated assets of less than \$500 million. The Federal Reserve further proposes to modify the other criteria and include additional criteria that would be used in determining whether a BHC is subject to FR Y-9SP filing requirements.

Specifically, the Federal Reserve proposes to require BHCs with consolidated assets of less than \$500 million to comply with the Federal Reserve's capital guidelines, and to continue to comply with the FR Y-9C and FR Y-9LP reporting requirements, if the holding company (1) is engaged in significant nonbanking activities either directly or through a nonbank subsidiary; (2) conducts significant off-balance-sheet activities, including securitizations or managing or

administering assets for third party, either directly or through a nonbank subsidiary; or (3) has a material amount debt or equity securities (other than trust preferred securities) outstanding that are registered with the SEC.

Although the incidence of BHCs with consolidated assets of less than \$500 million meeting any of these criteria is not expected to be frequent, information is not currently available to identify BHCs meeting the second and third criteria. Therefore the Federal Reserve proposes to collect two new items on Schedule SC-M, Memoranda, to identify total off-balance-sheet activities conducted either directly or through a nonbank subsidiary and to identify total debt and equity securities (other than trust preferred securities) outstanding that are registered with the SEC. BHCs meeting any of the criteria would be notified and given a reasonable timetable for meeting the consolidated capital and reporting requirements.

Attestation

The Federal Reserve proposes to revise the current attestation of one director of the BHC that he or she has reviewed the data filed and has transmitted a copy of the data to the Board of Directors for their information. Given the importance placed upon the quality of the information reported, the Federal Reserve believes that the chief executive officer (or the person performing similar functions) and chief financial officer (or the person performing similar functions) are the most appropriate officers within a BHC to sign a declaration concerning the preparation of the report. The Federal Reserve recognizes that at some BHCs the same individual may perform the functions of both chief executive officer and chief financial officer. The note on the cover page would be replaced with the following text:

“We, the undersigned officers of this bank holding company, are responsible for establishing and maintaining adequate internal controls over financial reporting, including controls over regulatory reports. We attest that the Parent Company Only Financial Statements for Small Bank Holding Companies (including the supporting schedules) for this report date have been prepared in accordance with the instructions issued by the Federal Reserve and to the best of our knowledge and belief are true and correct.”

This statement would be followed with the signatures and printed names of the chief executive officer (or person performing similar functions) and chief

financial officer (or person performing similar functions) of the BHC and the date of these signatures.

Instructions

In addition to modifying instructions to incorporate the proposed reporting changes, instructions would be revised and clarified in an attempt to achieve greater consistency in reporting by respondents.

2. Report title: Financial Statements of U.S. Nonbank Subsidiaries of U.S. Bank Holding Companies.

Agency form number: FR Y-11 and FR Y-11S.

OMB control number: 7100-0244.

Frequency: Quarterly and annually.

Reporters: Bank holding companies

Annual reporting hours: FR Y-11

(quarterly): 24,725; FR Y-11 (annual):

1,769; FR Y-11S (annual): 1,195

Estimated average hours per response:

FR Y-11 (quarterly): 6.25; FR Y-11

(annual): 6.25; FR Y-11S (annual): 1.0

Number of respondents: FR Y-11

(quarterly): 989; FR Y-11 (annual): 283;

FR Y-11S (annual): 1,195

General description of report: This information collection is mandatory (12

U.S.C. §§ 1844(c)). Confidential

treatment is not routinely given to the

data in these reports. However,

confidential treatment for the reporting

information, in whole or in part, can be

requested in accordance with the

instructions to the form, pursuant to

sections (b)(4), (b)(6) and (b)(8) of the

Freedom of Information Act [5 U.S.C. §§

522(b)(4), (b)(6) and (b)(8)].

Abstract: The FR Y-11 reports collect

financial information for individual U.S.

nonbank subsidiaries of domestic bank

holding companies (BHCs). BHCs file

the FR Y-11 on a quarterly or annual

basis according to filing criteria or file

the FR Y-11S annually. The FR Y-11

data are used with other BHC data to

assess the condition of BHCs that are

heavily engaged in nonbanking

activities and to monitor the volume,

nature, and condition of their

nonbanking operations.

Current Actions: The Federal Reserve

proposes to raise the asset-size

threshold for filing the quarterly FR Y-

11 to make it consistent with the

proposed filing threshold for reporting

the Consolidated Financial Statements

for Bank Holding Companies (FR Y-9C;

OMB No. 7100-0128) and to further

reduce reporting burden. The Federal

Reserve also proposes to (1) add one

new equity capital component on the

balance sheet for reporting partnership

interests and (2) reclassify reporting of

certain annuity sales revenue on the

income statement. The Federal Reserve

also proposes to revise several balance

sheet memoranda items to capture securitization information on transactions involving assets other than loans. No revisions are proposed to the content of the FR Y-11S; however, several respondents would shift to filing the FR Y-11S because of the proposed threshold revisions.

Revisions to Filing Criteria

The Federal Reserve proposes to revise the reporting criteria for the quarterly FR Y-11 to be consistent with the proposed threshold for the FR Y-9C and reduce reporting burden. Specifically, the Federal Reserve proposes that a BHC must file the FR Y-11 quarterly for its subsidiary if the subsidiary is owned or controlled by a top-tier BHC that files the FR Y-9C⁸ and the subsidiary has (a) total assets of \$1 billion or more, or (b) total off-balance-sheet activities of at least \$5 billion, or (c) equity capital of at least 5 percent of the top-tier BHC's consolidated equity capital; or (d) operating revenue of at least 5 percent of the top-tier BHC's consolidated operating revenue.

Currently the primary criterion for determining quarterly reporting for the FR Y-11 is linked to the asset-size threshold for FR Y-9C reporting. Retaining the current asset-size threshold of \$150 million may cause an inconsistency by requiring a BHC to file quarterly nonbank subsidiary reports for certain nonbank subsidiaries even when the BHC is not required to file the FR Y-9C quarterly. Revising the threshold for nonbank subsidiary reporting as described above would maintain consistency. Linking the primary nonbank reporting criterion to whether the BHC files a FR Y-9C would trigger the quarterly filing of the nonbank reports by nonbank subsidiaries meeting the filing requirements. If the BHC has assets less than \$500 million but is engaged in significant activities that warrant filing of the FR Y-9C and meets one or more of the additional FR Y-11 quarterly reporting criteria, the Federal Reserve believes that it is also necessary for supervisory purposes to collect nonbank subsidiary reports on a quarterly basis.

As currently required, a BHC must file the FR Y-11 for any nonbank subsidiary that satisfies the quarterly filing criteria

⁸ The Federal Reserve is proposing to raise the asset-size threshold for purposes of consolidated FR Y-9C reporting, the Small Bank Holding Company Policy Statement and the Capital Guidelines from \$150 million to \$500 million. In addition, a limited number of holding companies with assets less than \$500 million may be required to file the FR Y-9C because they meet certain conditions.

for any quarter during the calendar year and must continue to report quarterly for the remainder of the calendar year even if the nonbank subsidiary no longer satisfies the requirements for quarterly reporting. The Federal Reserve proposes to modify this reporting requirement to be more consistent with the FR Y-9C. The Federal Reserve proposes to revise the reporting instructions for quarterly filers under "Who Must Report" to indicate that if a nonbank subsidiary meets the criteria for quarterly filing as of June 30 of the preceding year, its BHC should begin reporting the FR Y-11 quarterly for the nonbank subsidiary beginning in March of the current year and continue to report for the entire calendar year. In addition, if a nonbank subsidiary meets the quarterly filing criteria due to a business combination, then the BHC would report the FR Y-11 quarterly beginning with the first quarterly report date following the effective date of the business combination. If a nonbank subsidiary subsequently does not meet the quarterly filing criteria for four consecutive quarters, then the BHC would revert to annual filing.

Schedule IS—Income Statement

The Federal Reserve proposes to change the category of noninterest income in which nonbank subsidiaries report income from certain sales of annuities from item 5.a.(8), Insurance commissions and fees, to item 5.a.(4), Investment banking, advisory, brokerage, and underwriting fees and commissions, to be consistent with the proposed revision to the FR Y-9C. Currently, nonbank subsidiaries report income from the sales of annuities and related commissions and fees in item 5.a.(8). Since annuities are deemed to be financial investment products rather than insurance, the Federal Reserve proposes to revise the instructions for item 5.a.(8) and item 5.a.(4) by moving the reference to annuities in the former item to the latter item.

Schedule BS—M—Memoranda

The Federal Reserve proposes to expand the scope of item 2.a. Number of loans in servicing portfolio, item 2.b. Dollar amount of loans in servicing portfolio, and item 3, Loans that have been securitized and sold without recourse with servicing rights retained, to include assets other than loans. The captions and instructions for these items would be revised to include other assets. The proposed change would ensure that the Federal Reserve can monitor the full range of the nonbank subsidiaries' involvement in securitization.

Schedule BS—Balance Sheet

The Federal Reserve proposes to add a new item, 18.e, General and limited partnership shares and interests, renumber current item, 18.e, Other equity capital components, as item 18.f., and renumber current item 18.f, Total equity capital, as item 18.g. Currently, the instructions for item 18, Equity capital, directs subsidiaries that are not corporate in form (that is, those that do not have capital structures consisting of capital stock and the other components of equity capital currently listed under item 18) to report their entire net worth in item 18.f, Total equity. The reporting form and the instructions for item 18.f, Total equity, state that item 18.f must equal the sum of the components of item 18. However, equity capital of those entities not in corporate form cannot appropriately be reported in any of the components of item 18. The proposed item and clarifications to the instructions for item 18 would remove this inconsistency and improve the accuracy of the information reported. In addition, the Federal Reserve proposes to clarify that Schedule IS—A, Changes in Equity Capital, item 6, Other adjustments to equity capital, should include contributions and distributions to and from partners or limited liability company (LLC) shareholders when the company is a partnership or a LLC. Schedule IS—A, item 6 is a component of Schedule IS—A, item 7, Total equity at end of current period. Schedule IS—A, item 7 must equal Schedule BS, item 18.f, Total equity.

3. Report title: Financial Statements of Foreign Subsidiaries of U.S. Banking Organizations.

Agency form number: FR 2314 and FR 2314S.

OMB control number: 7100-0073.

Frequency: Quarterly and annually. Reporters: Foreign subsidiaries of U.S. state member banks, bank holding companies, and Edge or agreement corporations.

Annual reporting hours: FR 2314 (quarterly): 4,800; FR 2314 (annual): 950; FR 2314S (annual): 255
Estimated average hours per response: FR 2314 (quarterly): 6.25; FR 2314 (annual): 6.25; FR 2314S (annual): 1.0
Number of respondents: FR 2314 (quarterly): 192; FR 2314 (annual): 152; FR 2314S (annual): 255

General description of report: This information collection is mandatory (12 U.S.C. §§ 324, 602, 625, and 1844). Confidential treatment is not routinely given to the data in these reports. However, confidential treatment for the reporting information, in whole or in part, can be requested in accordance

with the instructions to the form, pursuant to sections (b)(4), (b)(6) and (b)(8) of the Freedom of Information Act [5 U.S.C. §§ 522(b)(4) (b)(6) and (b)(8)]. Abstract: The FR 2314 reports collect financial information for direct or indirect foreign subsidiaries of U.S. state member banks (SMBs), Edge and agreement corporations, and BHCs. Parent organizations (SMBs, Edge and agreement corporations, or BHCs) file the FR 2314 on a quarterly or annual basis according to filing criteria or file the FR 2314S annually. The FR 2314 data are used to identify current and potential problems at the foreign subsidiaries of U.S. parent companies, to monitor the activities of U.S. banking organizations in specific countries, and to develop a better understanding of activities within the industry, in general, and of individual institutions, in particular.

Current Actions: The Federal Reserve proposes to raise the asset-size threshold for filing the quarterly FR 2314 to make it consistent with the proposed filing threshold for reporting the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C; OMB No. 7100-0128) and to further reduce reporting burden. The Federal Reserve also proposes to (1) add one new equity capital component on the balance sheet for reporting partnership interests and (2) reclassify reporting of certain annuity sales revenue on the income statement. The changes in the reporting thresholds would have no immediate effect on the FR 2314 panel because there are currently no quarterly filers owned by parent organizations with assets less than \$500 million.

Revisions to Filing Criteria

The Federal Reserve proposes to revise the reporting criteria for the quarterly FR 2314 to be consistent with the proposed threshold for the FR Y-9C and reduce reporting burden. Specifically, the Federal Reserve proposes that a BHC must file the FR 2314 quarterly for its subsidiary if the subsidiary is owned or controlled by a parent U.S. BHC that files the FR Y-9C or a state member bank or an Edge or agreement corporation that has total consolidated assets equal to or greater than \$500 million and the subsidiary has (a) total assets of \$1 billion or more, or (b) total off-balance-sheet activities of at least \$5 billion, or (c) equity capital of at least 5 percent of the top-tier organization's consolidated equity capital, or (d) operating revenue of at least 5 percent of the top-tier organization's consolidated operating revenue.

Currently the primary criterion for determining quarterly reporting for the FR 2314 is linked to the asset-size threshold for FR Y-9C reporting. Retaining the current asset-size threshold of \$150 million may cause an inconsistency by requiring a BHC to file quarterly nonbank subsidiary reports for certain nonbank subsidiaries even when the BHC is not required to file the FR Y-9C quarterly. Revising the threshold for nonbank subsidiary reporting as described above would maintain consistency. Linking the primary nonbank reporting criterion to whether the BHC files a FR Y-9C would trigger the quarterly filing of the nonbank reports by nonbank subsidiaries meeting the filing requirements. If the BHC has assets less than \$500 million but is engaged in significant activities that warrant filing of the FR Y-9C and meets one or more of the additional FR 2314 quarterly reporting criteria, the Federal Reserve believes that it is also necessary for supervisory purposes to collect nonbank subsidiary reports on a quarterly basis.

The criteria for filing the FR 2314 would be revised to maintain the consistency in the reporting criteria for nonbank subsidiary reports. Revising the quarterly reporting threshold for the FR 2314 filers would have no immediate effect on the panel because currently there are no quarterly filers owned by parent organizations with assets less than \$500 million. However, the Federal Reserve believes that there may be a small number of additional FR 2314 reports filed for subsidiaries owned by a BHC that has assets under \$500 million and that files the FR Y-9C because they meet certain conditions.

As currently required, a parent organization must file the FR 2314 for any nonbank subsidiary that satisfies the quarterly filing criteria for any quarter during the calendar year and must continue to report quarterly for the remainder of the calendar year even if the nonbank subsidiary no longer satisfies the requirements for quarterly reporting. The Federal Reserve proposes to modify this reporting requirement to be more consistent with the FR Y-9C. The Federal Reserve proposes to revise the reporting instructions for quarterly filers under "Who Must Report" to indicate that if a nonbank subsidiary meets the criteria for quarterly filing as of June 30 of the preceding year, its parent organization should begin reporting the FR 2314 quarterly for the nonbank subsidiary beginning in March of the current year and continue to report for the entire calendar year. In addition, if a nonbank subsidiary meets the quarterly filing criteria due to a

business combination, then the parent organization would report the FR 2314 quarterly beginning with the first quarterly report date following the effective date of the business combination. If a nonbank subsidiary subsequently does not meet the quarterly filing criteria for four consecutive quarters, then the parent organization would revert to annual filing.

Schedule IS—Income Statement

The Federal Reserve proposes to change the category of noninterest income in which nonbank subsidiaries report income from certain sales of annuities from item 5.a.(8), Insurance commissions and fees, to item 5.a.(4), Investment banking, advisory, brokerage, and underwriting fees and commissions, to be consistent with the proposed revision to the FR Y-9C. Currently, nonbank subsidiaries report income from the sales of annuities and related commissions and fees in item 5.a.(8). Since annuities are deemed to be financial investment products rather than insurance, the Federal Reserve proposes to revise the instructions for item 5.a.(8) and item 5.a.(4) by moving the reference to annuities in the former item to the latter item.

Schedule BS—Balance Sheet

The Federal Reserve proposes to add a new item, 18.e, General and limited partnership shares and interests, renumber current item, 18.e, Other equity capital components, as item 18.f., and renumber current item 18.f, Total equity capital, as item 18.g. Currently, the instructions for item 18, Equity capital, directs subsidiaries that are not corporate in form (that is, those that do not have capital structures consisting of capital stock and the other components of equity capital currently listed under item 18) to report their entire net worth in item 18.f, Total equity. The reporting form and the instructions for item 18.f, Total equity, state that item 18.f must equal the sum of the components of item 18. However, equity capital of those entities not in corporate form cannot appropriately be reported in any of the components of item 18. The proposed item and clarifications to the instructions for item 18 would remove this inconsistency and improve the accuracy of the information reported. In addition, the Federal Reserve proposes to clarify that Schedule IS-A, Changes in Equity Capital, item 6, Other adjustments to equity capital, should include contributions and distributions to and from partners or limited liability company (LLC) shareholders when the company is a partnership or a LLC.

Schedule IS-A, item 6 is a component of Schedule IS-A, item 7, Total equity at end of current period. Schedule IS-A, item 7 must equal Schedule BS, item 18.f, Total equity.

Board of Governors of the Federal Reserve System, October 25, 2005.

Robert deV. Frierson,

Deputy Secretary of the Board.

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System

SUMMARY: Background.

On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board of Governors of the Federal Reserve System (Board) its approval authority under the Paperwork Reduction Act, as per 5 CFR 1320.16, to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board under conditions set forth in 5 CFR 1320 Appendix A.1. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. Copies of the OMB 83-Is and supporting statements and approved collection of information instruments are placed into OMB's public docket files. The Federal Reserve may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Request for comment on information collection proposal

The following information collections, which are being handled under this delegated authority, have received initial Board approval and are hereby published for comment. At the end of the comment period, the proposed information collections, along with an analysis of comments and recommendations received, will be submitted to the Board for final approval under OMB delegated authority. Comments are invited on the following:

a. Whether the proposed collections of information is necessary for the proper performance of the Federal
