

Draft of a New Form

As part of Reclamation's ongoing acceptance of users' comments on the RRA forms, Reclamation has received a request to devise a way to more efficiently track limited recipients that hold less than 40 acres (i.e., those that are below the RRA forms submittal threshold and thus do not submit standard RRA forms) and the full-cost and excess land held by such limited recipients. In an effort to address this comment Reclamation has drafted a

proposed new form, "Tabulation H of Limited Recipients That Hold Less Than 40 Acres, and Full-Cost Landholders and Excess Landowners That Are Below the RRA Forms Submittal Threshold." The implementation of this proposed new form will be based on the public comments received and if implemented, will be effective in the 2006 water year as a mandatory part of the districts' annual submittal of Form 7-21SUMM-C and/or Form 7-21SUMM-R, as appropriate.

Frequency: Annually.
Respondents: Contracting entities that are subject to the acreage limitation provisions of Federal reclamation law.
Estimated Total Number of Respondents: 248.
Estimated Number of Responses per Respondent: 1.25.
Estimated Total Number of Annual Responses: 310.
Estimated Total Annual Burden on Respondents: 12,400 hours.
Estimate of Burden for Each Form:

Form number	Burden estimate per form (in hours)	Number of respondents	Annual number of responses	Annual burden on respondents (in hours)
7-21SUMM-C and associated tabulation sheets	40	195	244	9,760
7-21SUMM-R and associated tabulation sheets	40	53	66	2,640

Comments

Comments are invited on:
 (a) Whether the proposed collection of information is necessary for the proper performance of our functions, including whether the information will have practical use;
 (b) Whether the proposed new Tabulation H is necessary for the proper performance of our functions, including whether the information will have practical use for the districts;
 (c) The accuracy of our burden estimate for the proposed collection of information;

(d) Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
 (e) Ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

We will summarize all comments received regarding this notice. We will publish that summary in the **Federal Register** when the information collection request is submitted to OMB for review and approval.

Department of the Interior practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as

representatives or officials of organizations or businesses, available for public disclosure in their entirety.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-395]

South Carolina Electric & Gas Company, Virgil C. Summer Nuclear Station; Exemption

1.0 Background

The South Carolina Electric & Gas Company (SCE&G, the licensee) is the holder of the Renewed Facility Operating License No. NPF-12 which authorizes operation of the Virgil C. Summer Nuclear Station (VSNS). The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the Nuclear Regulatory Commission (NRC or the Commission) now or hereafter in effect.

The facility consists of a pressurized-water reactor located in Fairfield County in South Carolina.

2.0 Request/Action

Title 10 of the Code of Federal Regulations (10 CFR), part 50, section 50.44 specifies requirements for the control of hydrogen gas generated after a postulated loss-of-coolant accident (LOCA) for reactors fueled with zirconium cladding. Acceptance criteria contained in 10 CFR 50.46 are for emergency core cooling systems (ECCSs) for reactors fueled with zircaloy or ZIRLO™ cladding. In addition, Appendix K to 10 CFR part 50 requires that the Baker-Just equation be used to predict the rates of energy release, hydrogen concentration, and cladding oxidation from the metal-water reaction.

In summary, the exemption request relates solely to the specific types of cladding material specified in these regulations. As written, the regulations presume the use of zircaloy or ZIRLO™ fuel rod cladding. Thus, an exemption from the requirements of 10 CFR 50.44, 10 CFR 50.46, and Appendix K to 10 CFR part 50 is needed to irradiate lead test assemblies (LTAs) consisting of developmental clad alloys at VSNS.
