Centers for Disease Control and Prevention

[60Day-05-05CU]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-371-5983 and send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D74,

Atlanta, GA 30333 or send an email to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Survey of HIV Care Providers—New—National Center for HIV, STD, and TB Prevention (NCHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC is requesting a 3-year approval from the Office of Management and Budget (OMB) to survey randomly selected HIV care providers (e.g., physicians and other care providers) in the United States regarding their training history, areas of specialization,

ongoing sources of training and continuing education about HIV care, and awareness of HIV treatment guidelines and resources. Results from this survey will be used in conjunction with data from CDC's Morbidity Monitoring Project (MMP) to assess who is providing HIV care, to examine the impact of provider characteristics on the quality and standard of care being provided to patients with HIV, to determine opportunities to improve resources available to HIV care providers, and to evaluate the reasons for sampled providers' participation and non-participation in MMP. Participation in the survey is not contingent upon a provider's involvement with the MMP. All selected HIV care providers will be asked to participate in the survey, regardless of their participation in the MMP.

For this proposed data collection, MMP project areas have identified all HIV care providers in their jurisdictions, including those providers who may not be participating in the MMP project. Of this universe of HIV care providers, CDC plans to randomly survey 1,040 providers. Respondents will have the option to use either a Web-based application or paper survey to participate in the survey. There is no cost to respondents to participate in this survey other than their time.

ESTIMATE OF ANNUALIZED BURDEN HOUR TABLE

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
HIV Care Providers	1040	1	45/60	780

Dated: August 30, 2005.

Joan F. Karr,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on

proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404-371-5983 and send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D74, Atlanta, GA 30333 or send an e-mail to omb@cdc.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be

collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Surveillance for Ciguatera Fish Poisoning in Recreational Fishers Utilizing Texas Gulf Coast Oil Rigs (0920-0659)—Extension—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

This public health surveillance activity will quantify the scope of ciguatera poisonings in the recreational fishing community of coastal Texas. The

Texas Department of Health has received reports of ciguatoxic fish caught on Texas offshore oil rigs, and anecdotal reports to researchers at the University of Texas suggest that the incidence of ciguatera fish poisoning is greater than what has been reported to the Texas Department of Health. We propose to continue to conduct

surveillance activities to identify the prevalence of ciguatera fish poisoning in Texas Gulf Coast oil rigs. This study will provide critical data in guiding efforts to characterize the scope of ciguatera poisonings, to identify risk factors, and to prevent an emerging illness associated with reef ecosystems. A questionnaire will be administered

over a three-year period to Texas saltwater fishermen (recreational spearfishers and to hook-and-line anglers) who have consumed fish caught on the reef ecosystems off the Texas Gulf coast. There is no cost to respondents other than their time.

ESTIMATE OF ANNUALIZED BURDEN TABLE

Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Texas Saltwater Fishermen	500	1	20/60	167

Dated: August 30, 2005.

Joan F. Karr,
Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Possession, Use, and Transfer of Select Agents and Toxins (OMB Control No. 0920-0576)—Extension—Office of the Director (OD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (Pub. L. 107-188) specifies that the Secretary of Health and Human Services (HHS) shall provide for the establishment and enforcement of standards and procedures governing the possession, use, and transfer of select agents and toxins. The Act specifies that facilities that possess, use, and transfer select agents register with the Secretary. The Secretary has designated CDC as the agency responsible for collecting this information.

CDC is requesting continued OMB approval to collect this information through the use of five separate forms. These forms are: (1) Application for Registration; (2) Request to Transfer Select Agent or Toxin; (3) Report of Theft, Loss, or Release of Select Agent and Toxin; (4) Report of Identification of Select Agent or Toxin; and (5) Request for Exemption.

The Application for Registration (42 CFR 73.7(d)) will be used by entities to register with CDC. The Application for Registration requests facility information; a list of select agents or toxins in use, possession, or for transfer by the entity; characterization of the select agent or toxin; and laboratory information. Estimated average time to complete this form is 3 hours, 45 minutes for an entity with one principal investigator working with one select

agent or toxin. CDC estimates that entities will need an additional 45 minutes for each additional investigator or agent. In our regulatory analysis, we have estimated that 70% of the 350 entities have 1-3 principal investigators, 15% have 5 principal investigators, and 15% have 10 principal investigators. We have used these figures to calculate the burden for this section. Estimated burden for the Application for Registration is 2,191 hours.

Entities may amend their registration (42 CFR 73.7(h)(1)) if any changes occur in the information submitted to CDC. To apply for an amendment to a certificate of registration, an entity must obtain the relevant portion of the application package and submit the information requested in the package to CDC. Estimated time to amend a registration package is 1 hour.

The Request to Transfer Select Agent or Toxin form (42 CFR 73.16) will be used by entities requesting transfer of a select agent or toxin to their facility, and by the entity receiving the agent. CDC revised the Request to Transfer Select Agent or Toxin form by removing the requirement that entities provide written notice within five business days when select agents or toxins are consumed or destroyed after a transfer. Estimated average time to complete this form is 1 hour, 30 minutes.

The Report of Theft, Loss, or Release of Select Agent and Toxin form (42 CFR 73.19(a)(b)) must be completed by entities whenever there is theft, loss, or release of a select agent or toxin. Estimated average time to complete this form is 1 hour.

The Report of Identification of Select Agent or Toxin form 42 CFR 73.5(a)(b) and 73.6(a)(b) will be used by clinical and diagnostic laboratories to notify CDC that select agents or toxins identified as the result of diagnostic or proficiency testing have been disposed
