

eligibility or use a remaining activity rule waiver.

iii. Declare that the auction will end after a specified number of additional rounds ("special stopping rule"). If the Bureaus invoke this special stopping rule, it will accept bids in the specified final round(s) and the auction will close.

41. The Bureaus propose to exercise these options only in certain circumstances, for example, where the auction is proceeding very slowly, there is minimal overall bidding activity, or it appears likely that the auction will not close within a reasonable period of time. Before exercising these options, the Bureaus are likely to attempt to increase the pace of the auction by, for example, increasing the number of bidding rounds per day, and/or increasing the minimum acceptable bid percentage for the limited number of construction permits on which there is still a high level of bidding activity. We seek comment on these proposals.

IV. Due Diligence

42. Potential bidders are solely responsible for investigating and evaluating all technical and market place factors that may have a bearing on the value of the broadcast facilities in this auction. The FCC makes no representations or warranties about the use of this spectrum for particular services. Applicants should be aware that an FCC auction represents an opportunity to become an FCC permittee in the broadcast service, subject to certain conditions and regulations. An FCC auction does not constitute an endorsement by the FCC of any particular service, technology, or product, nor does an FCC construction permit or license constitute a guarantee of business success. Applicants should perform their individual due diligence before proceeding as they would with any new business venture. In particular, potential bidders are strongly encouraged to review all underlying Commission orders, such as the specific *Report and Order* amending the FM Table of Allotments and allotting the FM channel(s) on which they plan to bid. *Reports and Orders* adopted in FM allotment rulemaking proceedings often include anomalies such as site restrictions or expense reimbursement requirements. Additionally, potential bidders should perform technical analyses sufficient to assure them that, should they prevail in competitive bidding for a given FM construction permit, they will be able to build and operate facilities that will fully comply with the Commission's technical and legal requirements. Applicants are

strongly encouraged to inspect any prospective transmitter sites located in, or near, the service area for which they plan to bid, and also to familiarize themselves with the Commission's rules regarding the National Environmental Policy Act.

43. Potential bidders are strongly encouraged to conduct their own research prior to Auction No. 62 in order to determine the existence of pending proceedings that might affect their decisions regarding participation in the auction. Participants in Auction No. 62 are strongly encouraged to continue such research during the auction.

V. Conclusion

44. Comments are due on or before April 29, 2005, and reply comments are due on or before May 6, 2005. All filings must be addressed to the Commission's Secretary, Attn: WTB/ASAD, Office of the Secretary, Federal Communications Commission. Parties who file by paper must file an original and four copies of each filing. U.S. Postal Service first-class, Express, and Priority mail should be addressed to Office of the Secretary, 445 12th Street, SW., Washington, DC 20554. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. The Bureaus also require that all comments and reply comments be filed electronically to the following address: auction62@fcc.gov. The electronic mail containing the comments or reply comments must include a subject or caption referring to "Auction No. 62 Comments" and the name of the commenting party. The Bureaus request that parties format any attachments to electronic mail as Adobe® Acrobat® (pdf) or Microsoft® Word documents. Copies of comments and reply comments will be available for public inspection between 8 a.m. and 4:30 p.m. Monday through Thursday or 8 a.m. to 11:30 a.m. on Friday in the FCC Reference Information Center, Room CY-A257, 445 12th Street, SW., Washington, DC 20554, and will also be posted on the Web page for Auction No. 62 at <http://wireless.fcc.gov/auctions/62>.

45. This proceeding has been designated as a "permit-but-disclose" proceeding in accordance with the Commission's *ex parte* rules. Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentations must contain summaries of the substance of the presentations and not merely a listing of the subjects discussed. More than a one or two sentence description of the views and arguments presented is generally

required. Other rules pertaining to oral and written *ex parte* presentations in permit-but-disclose proceedings are set forth in § 1.1206(b) of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION

Basic Reconfiguration Schedule Put Forth in the Transition Administrator's 800 MHz Regional Prioritization Plan

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In July 2004, the Federal Communications Commission (FCC) adopted a *Report and Order*, in the 800 MHz Public Safety Proceeding establishing rules that reconfigure the 800 MHz band to eliminate interference to public safety and other 800 MHz land mobile communication systems. As specified in the Commission's *Report and Order*, the band reconfiguration process is being overseen by a Transition Administrator (TA) whose duties include providing the Commission with a plan detailing when band reconfiguration will commence in each of the fifty-five 800 MHz National Public Safety Planning Advisory Committee (NPSPAC) regions. On January 31, 2005, the TA filed the plan (Regional Prioritization Plan or RPP), containing a general schedule for implementing 800 MHz band reconfiguration.

FOR FURTHER INFORMATION CONTACT:

Roberto Mussenden,
Roberto.Mussenden@FCC.gov, Public Safety and Critical Infrastructure Division, Wireless Telecommunications Bureau, (202) 418-0680, TTY (202) 418-7233.

SUPPLEMENTARY INFORMATION: This is a summary of a public notice released on March 11, 2005.

1. The TA plan assigns each of the fifty-five NPSPAC regions to one of four basic "prioritization waves" with staggered approximate starting dates. Under the RPP, the first wave commences on June 27, 2005, (Wave 1), the second wave on October 3, 2005 (Wave 2), the third wave on January 3, 2006 (Wave 3) and the fourth wave on

April 3, 2006 (Wave 4). The reconfiguration process for each wave begins with negotiations between affected licensees and Nextel for payment of relocation costs. Licensees may negotiate with Nextel directly or use the TA as an intermediary. There are separate six-month negotiation periods for non-NPSPAC and NPSPAC licensees. Consistent with the Commission's *Report and Order*, 69 FR 67823, November 22, 2004, released on August 6, 2004, the first three months of the negotiation period are voluntary, the last three months mandatory. Band reconfiguration will be completed within thirty-six months of the date on which official band reconfiguration commences, as required by the Commission's *Report and Order*.

2. By this notice, and as specified in the *Report and Order*, we approve the

RPP's basic 800 MHz band reconfiguration schedule, *i.e.*, the grouping of the NPSPAC regions into four waves and starting the reconfiguration process in each wave on the dates recommended by the TA. We believe this schedule comports with the population and interference-history considerations identified in the *Report and Order*. We also concur with the Transition Administrator's recommendation for separate negotiation periods for NPSPAC and non-NPSPAC licensees in each wave.

3. The Commission will release public notices establishing the start date for commencement of negotiations in each wave. These public notices will be released thirty days prior to the start dates. However, licensees may initiate negotiations before the start date, and we encourage them to do so, especially

in the case of complex systems such as those that span more than one NPSPAC region.

4. The Reconfiguration Plan filed by the TA is available on the Commission's 800 MHz band reconfiguration Web page at <http://www.800MHz.gov>. A summary of the schedule is listed in the attachment to this notice. Questions concerning the RPP, and other Transition Administrator matters, including whether your 800 MHz system must be relocated, should be directed to Brett Haan, BearingPoint, 1676 International Drive, McLean, VA 22102, Brett.Haan@800ta.org.
