- Human remains and grave goods should not be disinterred unless required in advance of some kind of disturbance, such as construction;
- Disinterment when necessary should be done carefully, respectfully, and completely, in accordance with proper archaeological methods;
- In general, human remains and grave goods should be reburied, in consultation with the descendants of the dead.
- Prior to reburial, scientific studies should be performed as necessary to address justified research topics;

Conversely, where the scientific research value of human remains or grave goods outweighs any objections that descendants may have to their study, they should not be reburied, but should be retained in perpetuity for study.

Forest Service

Title: Social Dimensions of Fuel Reduction Treatment in the Southern Appalachian Region.

OMB Control Number: 0596-NEW.

Summary of Collection: The Forest and Rangeland Renewable Resources Research Act of 1978, as amended, authorizes the Forest Service (FS) to collect information to help identify the range of knowledge, attitudes and values interested publics hold toward fuel-load reduction and resulting aesthetic and ecological changes. Fuel loads in the forest of the Southern Appalachian Mountain pose significant risk of wildfire. Among forest ecologists there is a growing awareness that there may be some value to conducting prescribed fires and mechanical thinning to reduce the concentration of shrubs and under-story trees in some parts of the Southern Appalachian Mountains. These treatments, particularly if they were to be implemented over large areas, would change the visual and ecological character of the Southern Appalachian Mountains. FS will collect information using the Internet and a mail-back questionnaire.

Need and Use of the Information: FS will collect information describing respondents' perceptions of the aesthetic (visual), economic and ecological results of prescribed fire and mechanical thinning. The collected information will provide profiles of different groups or clusters of people and how each group perceives the economic, aesthetic and ecological results of forest management action. Without the information programs will be less efficient and accurate and unneeded conflicts and

misunderstandings may be more common.

Description of Respondents: Individuals or households.

Number of Respondents: 600.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 304.

Departmental Information Collection Clearance Officer.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12866 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

In the March 1, 2005 **Federal Register** (70 FR 9911), GIPSA asked persons interested in providing official services in the geographic areas assigned to the official agencies named above to submit an application for designation. Applications were due by April 1, 2005.

Aberdeen, Decatur, Hastings, McCrea, Missouri, and South Carolina, were the sole applicants for designation to provide official services in the entire area currently assigned to them, so GIPSA did not ask for additional comments on them.

There were two applicants for the Wisconsin area: Wisconsin Department of Agriculture, Trade and Consumer Protection (Wisconsin) and Eastern Iowa. Wisconsin applied for designation to provide official services in the entire state of Wisconsin which was currently assigned to them. Eastern Iowa also applied for designation in all or part of the area currently assigned to Wisconsin.

GIPSA asked for comments on the applicants for providing service in the Wisconsin area in the June 1, 2005, **Federal Register** (70 FR 31417). Comments were due by July 1, 2005. GIPSA received one favorable comment supporting Eastern Iowa from a customer in Wisconsin. Wisconsin
