

Third, the Office of Management and Budget directs agencies to assess the effect of regulatory changes on international trade. Fourth, the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of \$100 million or more annually (adjusted for inflation.)

Executive Order 12866 Assessment

This rule explains to the public, airport personnel, screeners, and airlines how TSA interprets certain terms used in an existing rule, 49 CFR 1540.111. This interpretative rule is not considered an economically significant regulatory action for purposes of Executive Order 12866. However, there has been significant public interest in aviation security issues since the terrorist attacks of September 11, 2001. Therefore, this rule is significant for purposes of the Executive Order and has been reviewed by the Office of Management and Budget (OMB).

This rule modifies the prohibited items list to all lighters consistent with Section 4025 of IRTPA. As a result, passengers will no longer be able to carry any lighters onboard an aircraft for which screening is conducted or into airport sterile areas. TSA notes that this ban may cause inconvenience to some passengers. Passengers and other persons carrying lighters who wish to enter an airport sterile area have several options, some of which include leaving the lighter at home, or returning it to their car. These persons can also choose to abandon the lighter in TSA-provided receptacles, at which point title of the property transfers to the Government.

While TSA acknowledges this added inconvenience, TSA believes that the added security this change provides outweighs the inconvenience.

Regulatory Flexibility Determination

The Regulatory Flexibility Act (RFA) of 1980 requires that agencies perform a review to determine whether a proposed or final rule will have a significant economic impact on a substantial number of small entities. If the determination is that it will, the agency must prepare a regulatory flexibility analysis as described in the RFA. For purposes of the RFA, small entities include small businesses, not-for-profit organizations, and small governmental jurisdictions. Individuals and States are not included in the definition of a small entity.

Based on the analysis discussed in the section above, this interpretative rule does not impose a significant economic impact on a substantial number of small entities. Therefore, a Regulatory Flexibility Analysis is not required.

International Trade Impact Assessment

The Trade Agreement Act of 1979 prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Legitimate domestic objectives, such as safety, are not considered unnecessary obstacles. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. TSA has assessed the potential effect of this interpretative rule and has determined that it will impose the same costs on domestic and international entities and thus has a neutral trade impact.

Unfunded Mandates Assessment

The Unfunded Mandates Reform Act of 1995 is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and tribal governments. Title II of the Act requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in a \$100 million or more expenditure (adjusted annually for inflation) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a “significant regulatory action.”

This rulemaking does not contain such a mandate. The requirements of Title II of the Act, therefore, do not apply and TSA has not prepared a statement under the Act.

Executive Order 13132, Federalism

TSA has analyzed this interpretive rule under the principles and criteria of Executive Order 13132, Federalism. We have determined that this action will not have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government, and therefore will not have federalism implications.

Environmental Analysis

TSA has reviewed this action for purposes of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4347) and has determined that this action will not have a significant effect on the human environment.

Energy Impact

The energy impact of this action has been assessed in accordance with the Energy Policy and Conservation Act (EPCA), Public Law 94–163, as amended (42 U.S.C. 6362).

We have determined that this rulemaking is not a major regulatory action under the provisions of the EPCA.

David M. Stone,

Assistant Secretary.

BILLING CODE 4910–62–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 001005281–0369–02; I.D. 012705B]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Trip Limit Reduction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Inseason action.

SUMMARY: NMFS reduces the trip limit in the commercial hook-and-line fishery for king mackerel in the southern Florida west coast subzone to 500 lb (227 kg) of king mackerel per day in or from the exclusive economic zone (EEZ). This trip limit reduction is necessary to protect the Gulf king mackerel resource.

DATES: This rule is effective 12:01 a.m., local time, February 25, 2005, through June 30, 2005, unless changed by further notification in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Steve Branstetter; telephone: 727–570–5305; fax: 727–570–5583; e-mail: Steve.Branstetter@noaa.gov.

SUPPLEMENTARY INFORMATION: The fishery for coastal migratory pelagic fish (king mackerel, Spanish mackerel, cero, cobia, little tunny, and, in the Gulf of Mexico only, dolphin and bluefish) is managed under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic (FMP). The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and is implemented under the authority of the

Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

Based on the Councils' recommended total allowable catch and the allocation ratios in the FMP, on April 30, 2001 (66 FR 17368, March 30, 2001), NMFS implemented a commercial quota of 2.25 million lb (1.02 million kg) for the eastern zone (Florida) of the Gulf migratory group of king mackerel. That quota is further divided into separate quotas for the Florida east coast subzone and the northern and southern Florida west coast subzones. On April 27, 2000, NMFS implemented the final rule (65 FR 16336, March 28, 2000) that divided the Florida west coast subzone of the eastern zone into northern and southern subzones and established their separate quotas. The quota implemented for the southern Florida west coast subzone is 1,040,625 lb (472,020 kg). That quota is further divided into two equal quotas of 520,312 lb (236,010 kg) for vessels in each of two groups fishing with hook-and-line gear and run-around gillnets (50 CFR 622.42(c)(1)(i)(A)(2)(i)).

In accordance with 50 CFR 622.44(a)(2)(ii)(B)(2), from the date that 75 percent of the southern Florida west coast subzone's quota has been harvested until a closure of the subzone's fishery has been effected or the fishing year ends, king mackerel in or from the EEZ may be possessed on board or landed from a permitted vessel in amounts not exceeding 500 lb (227 kg) per day.

NMFS has determined that 75 percent of the quota for Gulf group king mackerel for vessels using hook-and-line gear in the southern Florida west coast subzone was reached on February 24, 2005. Accordingly, a 500-lb (227-kg) trip limit applies to vessels in the commercial hook-and-line fishery for king mackerel in or from the EEZ in the southern Florida west coast subzone effective 12:01 a.m., local time, February 25, 2005. The 500-lb (227-kg) trip limit will remain in effect until the fishery closes or until the end of the current fishing year (June 30, 2005), whichever occurs first.

The Florida west coast subzone is that part of the eastern zone south and west of 25°20.4' N. lat. (a line directly east from the Miami-Dade County, FL, boundary). The Florida west coast subzone is further divided into northern and southern subzones. The southern subzone is that part of the Florida west coast subzone that from November 1 through March 31, extends south and west from 25°20.4' N. lat. to 26°19.8' N. lat. (a line directly west from the Lee/ Collier County, FL, boundary), i.e., the

area off Collier and Monroe Counties. From April 1 through October 31, the southern subzone is the part of the Florida west coast subzone that is between 26°19.8' N. lat. and 25°48' N. lat. (a line directly west from the Monroe/Collier County, FL, boundary), i.e., the area off Collier County.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA, (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B), as such prior notice and opportunity for public comment is unnecessary and contrary to the public interest. Such procedures would be unnecessary because the rule itself has already been subject to notice and comment, and all that remains is to notify the public of the trip limit reduction. Allowing prior notice and opportunity for public comment is contrary to the public interest because of the need to immediately implement this action in order to protect the fishery because the capacity of the fishing fleet allows for rapid harvest of the quota. Prior notice and opportunity for public comment will require time and would potentially result in a harvest well in excess of the established quota.

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 23, 2005.

Alan D. Risenhoover,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 041126332-5039-02; I.D. 022305E]

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Catcher/Processor Vessels Using Hook-and-Line Gear in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod by catcher/processor vessels using hook-and-line gear in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the 2005 A season allowance of the Pacific cod total allowable catch (TAC) of Pacific cod specified for catcher/processor vessels using hook-and-line gear in the BSAI.

DATES: Effective February 24, 2005, through 12 noon, Alaska local time, June 10, 2005.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2005 A season directed fishing allowance of Pacific cod specified for catcher/processor vessels using hook-and-line gear in the BSAI is established as 46,407 metric tons by the 2005 and 2006 final harvest specifications for groundfish in the BSAI (70 FR 8979, February 24, 2005). See § 679.20(c)(1)(iii), § 679.20(c)(5), and § 679.20(a)(7)(i)(A) and (a)(7)(i)(C)(1)(i).

In accordance with § 679.20(d)(1)(iii), the Administrator, Alaska Region, NMFS, has determined that the 2005 A season directed fishing allowance of Pacific cod specified for catcher/processor vessels using hook-and-line gear in the BSAI has been reached.
