

Syphilis is still a problem today, and it is in our community. The **Syphilis Elimination Effort (SEE)** is a national initiative to eliminate syphilis and wipe out one of our nation's biggest racial disparities in health. If you are a health care provider, a community leader, or a policy maker, your participation is greatly needed. Together, we can drive down the syphilis rate and make at least 90 percent of U.S. counties—including our own—syphilis-free.

Visit www.cdc.gov/std/see/ and help us eliminate syphilis now.

**TOGETHER
WE CAN
