Dear Fellow Neurologists:

In recent years, the American Academy of Neurology has cooperated with the Division of Health Care Statistics by supporting the National Ambulatory Medical Care Survey. This survey provides the basic information needed to describe the characteristics of patients seen in office-based practice in the United States.

The resulting statistics will assist in the planning for more effective health services, manpower requirements, and medical education.

The Academy endorses this valuable activity and encourages your participation.

Thomas R. Swift, MD, FAAN
President
