9. Statement of Project Goals and Objectives:

Goal: The goals and objectives of this project are to reduce deferred maintenance items and increase the safety for occupants in historic buildings (either registered or eligible to be registered) that are owned and operated by the Forest Service within Wallowa County.

10. Project Description:

There are approximately 60 Forest Service owned buildings within Wallowa County that have been determined to have significant historical meaning. The Forest Service occupies and uses these buildings for administrative purposes. These buildings are located at Billy Meadows Guard Station, Lick Creek Guard Station, Sled Springs Guard Station, College Creek Guard Station, Hat Point,

Pittsburg Landing Administrative Site, Red's Horse Ranch, Wallowa Compound, and the Eagle Cap Compound. This project would apply funds toward repairing various building components for which the needed maintenance has been deferred for several years. The Forest Service maintains a database with all its buildings in it. Within this database, each building has specific annual and deferred maintenance items associated with it.

Building components that may be repaired include roofing, siding, windows, doors, flooring, and foundations. In addition to these repairs, buildings, especially those used as bunkhouses, would be retrofitted with fire escapes and other life safety components. A priority rating system has been formally established in order to determine which of these buildings would receive the first maintenance. This rating system is documented in the Forest Facilities Master Plan. Any maintenance item that deals with health and safety of the building occupants would be the top priority. With the limited amount of funds, it is estimated that there would be two or three structures that may be worked on in a single year.

11. Coordination of this project with other related project(s) on adjacent lands?

Yes No

12. How does proposed project meet purposes of the Legislation? [Sec. 203(b)(1)]

Improves maintenance of existing infrastructure. [Sec. 2(b)]

Implements stewardship objectives that enhance forest ecosystems. [Sec. 2(b)]

Restores and improves land health. [Sec. 2(b)]

Restores water quality. [Sec. 2(b)]

13. Project Type (check one) [Sec. 203(b)(1)]

Road Maintenance [Sec. 2(b)(2)(A)]

Trail Maintenance [Sec. 2(b)(2)(A)]

Road Decommission/Obliteration [Sec. 2(b)(2)(A)]

Trail Obliteration [Sec. 2(b)(2)(A)]

Other Infrastructure Maintenance (specify): [Sec. 2(b)(2)(A)] **Historic Building Maintenance**

Soil Productivity Improvement [Sec. 2(b)(2)(B)]

Forest Health Improvement [Sec. 2(b)(2)(C)]

Watershed Restoration & Mntc. [Sec. 2(b)(2)(D)]

14. Measure of Project Accomplishments/Expected Outcomes [Sec. 203(b)(5)]

a. Total Acres: 0

b. Total Miles: 0

c. No. Structures: 2 to 3

d. Est. People Reached: hundreds, including employees and Forest visitors

e. No. Laborer Days: 20

f. Other (specify):

15. Estimated Completion Date: [Sec. 203(b)(2)] 09-30-2006

16. Target Species Benefited: N/A

17. How will cooperative relationships among people that use federal lands be improved?

By completing some deferred maintenance items on these Forest Service Buildings, the image that the agency passes on to the public will be improved. This will in turn encourage closer relationships with the public due the fact that the Forest Service is trying to maintain the public assets.

18. How is this project in the best public interest? Community Benefits,

The community benefit of this project is primarily monetary. Since all the work is planned to be accomplished with contractors from the local area, it is anticipated that these contractors will hire local laborers to complete the needed work.

19. How does the project benefit federal lands/resources?

By maintaining structures that are used by the people that manage Forest Service lands, the life of these buildings can be extended significantly. These maintenance items will also provide a safe and healthful work environment for these people. Having a well maintained building means that these people will be able to continue working in these areas and managing the public lands. For example, having a fire fighting force at a remote guard station means shorter response times to fires.

38. Identify Source(s) of Other Funding for Project Identified Above [Sec. 203(b)(4)] (max. 7 lines) The other source of funding for this project will come from the Forest's appropriated building maintenance funds and rent collections from Forest Service employees that live in some of these buildings.

39. Monitoring Plan [Sec. 203(b)(6)]

- a. **What measures or evaluations will be made to determine how well the proposed project meets the desired ecological conditions? Who is responsible for this monitoring item?:** N/A
- b. **How will the project be evaluated to determine how well the proposed project contributes towards local employment and/or training opportunities, including summer youth jobs programs such as the Youth Conservation Corps? [Who is responsible for this monitoring item?** The project will be evaluated based on how many contracts are awarded to local contractors, and how many local individuals the contractor hires to work on these projects. Since contractors will be required to submit certified payrolls to the Contracting Officer, it can be determined how much each of the contractor's employees gets paid for this work. The District Ranger (or a delegate) will be responsible for monitoring this item.
- c. **What methods and measures of evaluation will be established to determine how well the proposed project improves the use of, or added value to, any products removed from National Forest System lands consistent with the purposes of this Act? Who is responsible for this monitoring item?:** N/A
- d. **Identify total funding needed to carry out specified monitoring tasks (Table 1, Item 33) Amount** \$0. Monitoring will occur through the normal contract administration process already established by the Forest Service.
