Subject: Export Notice 2005-3, FSIS Form 9450-4, Veterinary Certificate for Export of Poultry Meat to the Russian Federation

FSIS Form 9450-4 (08/27/2002) is printed with the U.S. government eagle watermark on the first page (original) of this carbon set certificate. Due to a printing error, a series of these certificates was printed with watermarks other than the eagle watermark. Effective immediately, certificates with certificate numbers in the series RFA-015001 through RFA-191000 should not be used and should be destroyed. Replacement certificates can be ordered from the FSIS Field Supply Center.

FSIS Form 9450-4B (08/27/2002), Continuation Sheet for the Veterinary Certificate for Export of Poultry Meat to the Russian Federation, is also printed with the eagle watermark on the first page. Continuation sheets without this watermark should also be destroyed. Replacements can be ordered from the FSIS Field Supply Center.

Placement of the eagle watermark on individual certificates is random. In some cases only a partial eagle watermark may appear near the edge of the certificate. This variation in placement is acceptable.

Questions should be directed to the Technical Service Center at 1-800-233-3935.
