

# **COUNCIL, REVIEW COMMITTEES, AND WORKING GROUPS**

## NATIONAL ADVISORY ALLERGY AND INFECTIOUS DISEASES COUNCIL

Composed of both scientists and laypersons, the National Advisory Allergy and Infectious Diseases Council makes final recommendations on the scientific merit of NIAID-assigned applications for research grants, cooperative agreements, and research training awards. Council review is the final step in the NIH peer review process, and its recommendations are based both on scientific merit, as judged by the scientific review groups, and on the relevance of the proposed study to the Institute's programs and priorities. Applications reviewed relate to all activities within the NIAID research mission, including the fields of immunology, allergic and immunologic diseases, transplantation immunology, microbiology and infectious diseases, and AIDS and AIDS-related conditions. Through its subcommittees, the Council conducts concept clearances and advises NIAID on general policy.

The National Advisory Allergy and Infectious Diseases Council roster is located at the Web site [http://www.niaid.nih.gov/ncn/budget/default\\_council.htm](http://www.niaid.nih.gov/ncn/budget/default_council.htm).

## ACQUIRED IMMUNODEFICIENCY SYNDROME RESEARCH REVIEW COMMITTEE

In its role within the NIH peer review system, the Acquired Immunodeficiency Syndrome (AIDS) Research Review Committee advises the Directors of the NIH and NIAID with respect to programs and activities in the areas of AIDS as well as the prevention and treatment of the major opportunistic infections associated with AIDS. The Committee provides a primary review of selected grant applications, cooperative agreements, and contract proposals for special research and training programs. These include program projects and centers, institutional National Research Service Awards, and special developmental award programs in AIDS-related areas. The Committee recommends ratings for applications and proposals that it determines to have significant and substantial scientific merit and advises the Institute Director on the development of new programs in the above-mentioned scientific areas.

The AIDS Research Review Committee roster is located at the Web site <http://www3.niaid.nih.gov/about/overview/councilcommittees/revcom.htm>.

## AIDS RESEARCH ADVISORY COMMITTEE

The AIDS Research Advisory Committee is mandated by Public Law 100–607, the Health Omnibus Programs Extension of 1988 (HOPE legislation), which was signed into law November 4, 1988. The Committee advises and makes recommendations to the Director, NIAID, and to the Director, Division of Acquired Immunodeficiency Syndrome (DAIDS), in all areas of biomedical research on HIV infection and AIDS related to the mission of DAIDS, including pathogenesis, natural history, and transmission of HIV disease, and to those efforts that support progress in the detection, treatment, and prevention of HIV disease.

The Committee provides broad scientific, programmatic, and budgetary advice on all aspects of HIV-related research supported by NIAID, including fundamental basic and clinical research, discovery and development of vaccines and other preventive interventions, and training of researchers in these activities. The Committee's activity includes the review of progress and productivity of ongoing efforts, assistance in identifying critical gaps/obstacles to progress, and approval of concepts for new initiatives.

The AIDS Research Advisory Committee Roster is located at the Web site <http://www3.niaid.nih.gov/about/overview/councilcommittees/arac.htm>.

## AIDS VACCINE RESEARCH WORKING GROUP

The AIDS Vaccine Research Working Group, established in February 1997, assists in developing a comprehensive research program for expediting the discovery and development of an HIV vaccine. The individuals in this group provide advice regarding the vaccine research programs at the NIH with respect to scientific opportunities, gaps in knowledge, and future directions of research. The Working Group, which reports to the NIAID Council, is chaired by Scott Hammer, M.D., and is composed of individuals with expertise in immunology, structural biology, virology, animal models, and vaccine development.

The AIDS Vaccine Research Working Group roster is located at the Web site [www.niaid.nih.gov/daids/vaccine/AVRCR.htm](http://www.niaid.nih.gov/daids/vaccine/AVRCR.htm).

## MICROBIOLOGY AND INFECTIOUS DISEASES RESEARCH COMMITTEE

The Microbiology and Infectious Diseases Research Committee advises the Director, NIH, and the Director, NIAID, with respect to programs and activities in microbiology and infectious diseases. Specialized areas of concern include molecular biology, microbial chemistry, parasitology, virology, bacteriology, mycology, vaccine development, and antimicrobial chemotherapy. The Committee provides a primary review of grant applications, cooperative agreements, and contract proposals for special research programs. These include program projects and centers, institutional National Research Service Awards, and special developmental award programs in the areas mentioned above. The Committee recommends ratings for applications and proposals that it determines to have significant and substantial scientific merit and advises the Institute Director on the development of new programs in these scientific areas.

## BOARD OF SCIENTIFIC COUNSELORS

The Board of Scientific Counselors advises the Director, NIH; the Deputy Director for Intramural Research, NIH; the Director, NIAID; and the Director, Division of Intramural Research (DIR), NIAID, concerning the Institute's intramural research programs. The Board's recommendations are based on rigid and objective reviews of NIAID laboratories to assess ongoing research as well as future directions and to evaluate the productivity and performance of NIAID's tenured scientists and tenure-track scientists. Following each review, the written report from the Board is forwarded, with a response from the Director, DIR, NIAID, to the Deputy Director for Intramural Research, NIH. In addition, the Board's recommendations are communicated annually to the National Advisory Allergy and Infectious Diseases Council.

The Board's review process strengthens NIAID's tenure system and the overall quality of the Institute's research. As a result of the Board's scientific review, NIAID can modify or redirect its intramural research priorities to allow for scientific growth of investigators as well as pursuit of important new areas of research. Its findings have a direct impact on the allocation of personnel, budget, and space resources within each laboratory.

The Board of Scientific Counselors roster is located at the Web site <http://www3.niaid.nih.gov/about/overview/councilcommittees/bscroste.htm>.

## VRC SUBCOMMITTEE OF THE NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES BOARD OF SCIENTIFIC COUNSELORS

The Vaccine Research Center (VRC) Board of Scientific Counselors (BSC) subcommittee has been established and consists of 10 members: 5 members serving for 3-year terms, and 5 members serving for 5-year terms. A quorum for this subcommittee consists of the presence of six members. The VRC BSC anticipates holding meetings once yearly.

The VRC BSC subcommittee has been charged with carrying out technical and scientific peer review of research conducted at the VRC, including: general aims, objectives, and importance of research projects; projected directions of VRC research and future research projects; and productivity and performance of VRC laboratories under review.
