## NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

**STAFF CLINICIAN, Laboratory of Allergic Diseases, National Institute of Allergy and Infectious Diseases, National Institutes of Health, Department of Health and Human Services**

The National Institute of Allergy and Infectious Diseases, Division of Intramural Research, Laboratory of Allergic Diseases (LAD), Mast Cell Biology Section (MCBS) is seeking an outstanding Staff Clinician to participate in clinical research in the natural history, pathogenesis and treatment of patients with diseases of mast cell dysregulation, including mastocytosis, and to serve as Associate Program Director, Allergy and Immunology (A&I) Clinical Fellowship Program.

The LAD conducts basic and clinical research on immunologic diseases, with an emphasis on disorders of immediate hypersensitivity, which include the spectrum of classic allergic diseases. The LAD/MCBS has an integrated program investigating the growth and differentiation of mast cells, mast cell signal transduction, and the products generated by mast cells that lead to disease. Study findings are translated clinically through the formulation and conduct of clinical protocols designed to study systemic diseases of mast cells. The LAD also administers the ACGME accredited Allergy and Immunology Fellowship Program and the NIH Clinical Center A&I Consult Service

**QUALIFICATIONS:** The research assignments of the Staff Clinician will focus on the diagnosis, natural history and treatment of patients with mastocytosis and anaphylaxis. The Staff Clinician will also work with the Director of the A&I Clinical Fellowship Program to administer the fellowship training program. Responsibilities include the provision of standard medical care within the outpatient clinics and wards of the Clinical Center hospital complex, and supervision of clinical protocols. Candidates must be licensed physicians and eligible to be credentialed to practice medicine and perform patient related research in the NIH Clinical Center. Candidates must be board certified in either Internal Medicine or Pediatrics and be eligible for board certification in Allergy and Immunology. The ideal candidate will have demonstrated experience in teaching, and in developing and implementing clinical research protocols fulfilling all ethical and regulatory requirements of human subjects research. Candidates should have demonstrated capability for leadership of multidisciplinary research teams and to interact with referring physicians, allied health professionals, trainees and collaborators who contribute expertise to the research effort. Salary is dependent on qualifications and experience.

**APPLICATION PROCESS:** Interested candidates may contact Dr. Dean Metcalfe, Chief, Laboratory of Allergic Diseases at [dmetcalfe@mail.nih.gov](mailto:dmetcalfe@mail.nih.gov) for additional information about the position. To apply for the position, candidates must submit a curriculum vitae, bibliography, names of three references, a statement of clinical research interests, and reprints of up to three selected publications to: National Institute of Allergy and Infectious Diseases, Division of Intramural Research, Laboratory of Allergic Diseases, Office of the Chief, Attn: Dr. Richard Peavy, 10 Center Drive MSC 1881, Building 10, Room 11C207, Bethesda, MD 20892 1881.
