

Put your Business in the Best Light

Before

After

Case 2: Jerome Cheese

Save as much as 50 percent of the lighting costs at your facility.

The lighting upgrade above saves Jerome Cheese of Jerome, Idaho, more than 1.7 million kilowatt-hours of electricity per year through the installation of energy-efficient fixtures and fluorescent lamps. In this case high-pressure sodium fixtures were replaced with 2-lamp T-5 fixtures with an occupancy sensor for a reduction of 142-watts per fixture. With a simple payback on the investment of less than two years, this lighting retrofit was a no-brainer. (Information provided by Energy Industries.)

Other possible benefits of lighting equipment upgrades:

- Reduced maintenance costs due to the longer life of the new equipment.
- Increased employee productivity and morale due to improved lighting intensity and improved safety conditions.
- Positive reactions from customers visiting your business.
- Reduced environmental impact from electricity generation.
- Reduced air conditioning load because less heat is produced by lighting systems.
