

Put your Business in the Best Light

Case 6: Hampton Lumber

Save as much as 50 percent of the lighting costs at your facility.

The lighting upgrade above saves Hampton Lumber of Cowlitz County, Wash., more than 150,000 kilowatt-hours per year through the installation of energy-efficient fixtures and fluorescent lamps. In this case, 1,000-watt and 460-watt metal halide fixtures were replaced with 4-lamp T-5 fixtures including occupancy sensors for a reduction of 226 to 766-watts per fixture. Over 80 percent of lighting energy savings were achieved by changing the lamp technology and using occupancy sensors to turn off the lights when they are not needed. (Information provided by Energy Wise Lighting, Inc.)

Other possible benefits of lighting equipment upgrades:

- Reduced maintenance costs due to the longer life of the new equipment.
- Increased employee productivity and morale due to improved lighting intensity and improved safety conditions.
- Positive reactions from customers visiting your business.
- Reduced environmental impact from electricity generation.
- Reduced air conditioning load because less heat is produced by lighting systems.
