4.1.2.3 Measure: Quality Review Board - **Revised by MOD M048**

- a. *Establish a Quality Review Board (QRB) which samples the Lab-wide Appraisal process, evaluates the relevance and quality of assigned goals to R2A2s and Lab Criticle Outcomes, and recommends management corrective actions as appropriate to correct trends detected by this evaluation.*
- b. *Develop a prioritized FY 01 improvement action plan based on the QRB evaluation results.*

Metric: **Revised**

*The evaluation score will be based on a self-assessment of the quality of the Board's review methodology and implementation and appropriateness of the proposed improvement action plan, confirmed by the Laboratory Director **and validated** by the BHG manager.*

4.3.4 Disposition of Site-Wide Excess Materials – Revised by MOD M048

The weight of this Measure is 5%.

Excess Material inventories are completely identified, characterization plans are approved, treatment/disposal options are considered, priorities are established, funding is allocated, and inventories are reduced or eliminated. Contractor and its employees display ownership and leadership toward eliminating excess materials at the site. Contractor is a driving force and a willing partner in resolving funding matters with DOE.

Performance Measure:

Contractor reduces or eliminates high priority excess materials inventories during FY 2000. For purposes of this measure “reduction” is recognized to include the reuse, recycle, or disposal of such materials. Waste inventories on 09/30/99 are compared to inventories on 09/30/00. Performance is assessed against the target reductions shown immediately below:

Site Wide Excess Material Disposition Goals - *Revised*

<u>Excess Material Inventories</u>	Targeted Reductions
<i>Scrap Metal including lead</i>	<i>230 tons</i>
<i>Elimination of excess chemicals</i>	<i>Disposition all chemicals identified in the Site Wide Material Inventor and Disposition Report.</i>

Assumptions:

- DOE recognizes that the funding to support the disposition of excess materials has historically been scarce.
- To further promote DOE’s environmental stewardship at the BNL site, the Environmental Management program authorizes that up to 50% of all annual cost savings generated by BSA in redefining the EM clean-up program may be applied to the disposition of excess materials. Such expenditure of EM funds shall only be available in a matching manner with funds identified by BSA from indirect cost allocations (i.e. BNL site risk prioritization system).

$$\text{Target Reduction Ratio} = \frac{\text{Actual Reduction}}{\text{Target Reduction}} \times 100$$

Performance Level	Target Reduction Ratio
Outstanding	Greater than 105%
Excellent	95 – 105 %
Good	85 – 95%
Marginal	75 – 85%
Unsatisfactory	Less than 75%

Note - **Revised**: BSA's performance rating is based upon a ratio for each excess item, which recognizes actual results in comparison to targeted results, as shown above. An overall weighted ratio for the entire measure will be computed using weights of *Chemicals (35%)*, and *Metals (65%)* multiplied by the reduction ratio of the individual excess material categories.

4.4 Business Operations

BNL will conduct its business operations with distinction, fully integrated with and supportive of the science, technology and cleanup missions, while being fully responsive to the business management needs and expectations of DOE.

The weight of this Objective is 20% of total.

4.4.1 Business Management/Information Systems

Improve enterprise-wide business management systems in support of world-class research at Brookhaven National Laboratory to provide consistent, cost-effective, and efficient means of managing the business functions of the Laboratory and provide records of the Laboratory's business/financial transactions for use as a basis for decisions regarding the improvement and enhancement of business operations.

The weight of this Measure is 25%.

Measure: Install Enterprise Resource Planning (ERP) System (PeopleSoft)

- 1. Accounts Receivable** – This module is utilized to generate monthly billings, age receivables, provide information to facilitate collections, smoothly integrate with the General Ledger/Project Costing Modules, and provide greater flexibility to comply with DOE and other funding agency (e.g. NRC) reporting requirements. The legacy Accounts Receivable does not meet the Laboratory's current or projected needs.

The milestone dates for this module are as follows:

New system implementation - **October 1999** for the start of the new fiscal year.

Initiate a feedback/change control process to further enhance effectiveness and meet customer needs – **January 2000**.

- 2. Guest Tracking** - Capture and track Guest and Users for major facilities (RHIC, AGS, etc.) Scheduled implementation date - **January 2000**. Initiate a feedback/change control process to further enhance effectiveness and meet customer needs – **April 2000**
- 3. Inventory** – The current Inventory system is outdated and like other parts of BNL's legacy system IPAP, in need of upgrading. The planned implementation date is scheduled for **April 2000**. Initiate a feedback / change control process to further enhance effectiveness and meet customer needs – **June 2000**.
