**SUPPLEMENTARY INFORMATION:**

**I. What Information is EPA Particularly Interested in?**

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In

particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

**II. What Should I Consider when I Prepare My Comments for EPA?**

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Offer alternative ways to improve the collection activity.
7. Make sure to submit your comments by the deadline identified under **DATES**.
8. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

**III. What Information Collection Activity or ICR Does this Action Apply to?**

*Affected entities:* Entities potentially affected by this action are:

- Applicators on farms: Crop production (North American Industrial Classification System (NAICS) code 111). Animal production (NAICS code 112).
  - Commercial services applicators: Exterminating and pest control services (NAICS code 561710).
  - Administration of certification programs by states/tribal lead agencies: Environmental protection program administration (NAICS code 924110).
  - Pest control programs, agricultural, governmental (NAICS code 926140).
  - Pesticide dealers (only for EPA-administered programs): Retail nursery, lawn, and garden supply stores (NAICS code 444220). Agricultural chemicals merchant wholesalers (NAICS code 424910).
- Title:* Certification of Pesticide Applicators.

*ICR numbers:* EPA ICR No. 0155.09, OMB Control No. 2070-0029.

*ICR status:* This ICR is currently scheduled to expire on December 31, 2007. An Agency may not conduct or

sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

*Abstract:* This ICR is designed to provide EPA with the information necessary to oversee training and certification programs for applicators of restricted use pesticides. The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) allows the EPA to classify a pesticide as "restricted use" if the pesticide meets certain toxicity or risk criteria. Restricted use pesticides, because of their potential to harm human health or the environment, may be applied only by a certified applicator or by a person under the direct supervision of a certified applicator. A person must meet certain standards of competency to become a certified applicator. States can be delegated the certified applicator program, but it must be approved by the Agency before it can be implemented. In non-participating entities, EPA administers the certification program.

Annual reports from the states are used as a monitoring tool to develop overall data on pesticide activities for OMB, Congress, and others; to distribute EPA grant funds to participating states, to target enforcement activities, and to revise certification and training program emphasis and requirements. An application form is used to obtain vital information from persons applying for certification, such as name and address, and to schedule applicators for certification or re-certification. Dealer records are necessary to ensure that access to restricted use pesticides is limited to certified applicators. A record of each application of a restricted use pesticide is required for certified commercial applicators. These records are monitored to assure that restricted-use pesticides are used only by, or under the supervision of, certified applicators and to ensure that pesticide labeling requirements are adhered to by requiring applicators to record details of the restricted-use product application. Without these records it would often be difficult to successfully enforce against misuse. Responses to this ICR are mandatory. The authority for this information collection activity is

provided under sections 3(d) and 11 of FIFRA and 40 CFR part 171.

**Burden statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.17 hours per response for application for certification in the Navajo Indian country, 77.4 hours per response for each state to submit annual reports, and 3.1 hours per response for commercial applicators' recordkeeping of restricted use pesticide applications. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

*Estimated total number of potential respondents:* 421,097.

*Frequency of response:* On occasion or annually, depending on the category of respondent.

*Estimated total average number of responses for each respondent:* 1–3.

*Estimated total annual burden hours:* 1,309,623 hours.

*Estimated total annual costs:* \$39,694,611. This is an estimated burden cost of \$39,694,611 with no additional cost for capital investment or maintenance and operational costs.

#### IV. Are There Changes in the Estimates from the Last Approval?

There is a decrease of 1,745 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease is due to Colorado assuming responsibility for the private applicator program, and the dealer recordkeeping program in that state. The previous ICR included the burden of those programs in Colorado, as EPA still administered them at that time. This change is the result of a program change.

#### V. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.
