

Homeland Security enforcement components and outside law enforcement partners fall within the meaning of 5 U.S.C. 552b(c)(7)(E) insofar as they will "disclose investigative techniques and procedures."

The closed meeting will be dedicated to pre-decisional discussions of the updates to the National Response Plan and the rollout of radiation screening in ports, as well as the investigative and enforcement efforts of Immigration and Customs Enforcement, Customs and Border Protection, New York Police Department, and the New York State Department of Public Safety. The predecisional discussion with Coast Guard and FEMA will involve information that, if publicly disclosed, is likely to inhibit the government's ability to implement the National Response Plan and the planned radiation screening programs. The discussions with internal and external enforcement components will involve information about sensitive investigative techniques and procedures.

[Docket No. DHS-2007-0021]

**United States Visitor and Immigrant Status Indicator Technology (US-VISIT); Privacy Act of 1974; Notice of Decommission of System of Records**

**AGENCY:** United States Visitor and Immigrant Status Indicator Technology (US-VISIT), DHS.

**ACTION:** Notice of Decommission for System of Records.

**SUMMARY:** The Department of Homeland Security (DHS), US-VISIT Program, conducted a proof of concept (POC) for Increment 2C (70 FR 39300, US-VISIT Privacy Impact Assessment, July 7, 2005) to assess the capability of automatically, passively, and remotely recording the entry and exit of US-VISIT covered individuals at U.S. land border ports of entry (POEs) using Radio Frequency Identification (RFID)-enabled I-94 (Arrival/Departure) Forms. To support the US-VISIT Increment 2C POC, the Automated Identification Management System (AIDMS) was created to link the unique and

individually-assigned RFID tag number to existing biographic information received from the Treasury Enforcement Communications System (TECS) and the entry and exit event information for each covered individual crossing the land border. The AIDMS maintained four general categories of records: traveler (i.e., covered individual) identification information, RFID tag related information, RFID tag read event information, and border crossing history information. The traveler identification information and the border crossing history information were duplicative of information stored in TECS and the Arrival/Departure Information System (ADIS). The RFID tag information was comprised of data collected about the issuance and status of the Form I-94 as well as data associated with the reading of an RFID tag. On November 7, 2006, US-VISIT concluded the Increment 2C POC. Upon completion of the estimated one year POC (as noted in the US-VISIT Notice published August 4, 2005, 70 FR 44934), AIDMS has been decommissioned because data is no longer being collected or stored in the system. All data previously stored in AIDMS will be deleted/destroyed 30 days after publication of this notice and in accordance with the National Archives and Records Administration (NARA) General Records Schedule (GRS) 20, Item 1.a. The AIDMS SORN was previously published in the **Federal Register** on July 5, 2005, at 70 FR 38700. A Privacy Impact Assessment regarding this decommission has been published at <http://www.dhs.gov/privacy>.

The purpose of this notice is to inform the public of the termination of AIDMS on June 25, 2007.

**Disposition:** In accordance with NARA GRS 20, Item 1.a, the data collected and stored in AIDMS will be deleted/destroyed 30 days after publication of this notice.
