

the scheduled date for submission of rebuttal briefs. See 19 CFR 351.310(d). Parties who submit case briefs or rebuttal briefs in this proceeding are requested to submit with each argument a statement of the issue, a summary of the arguments not exceeding five pages, and a table of statutes, regulations, and cases cited. See 19 CFR 351.309(c)(2). The Department will issue the final results of this administrative review, including the results of its analysis of issues raised in any such written briefs or at the hearing, if held, not later than 120 days after the date of publication of this notice. See section 751(a)(3)(A) of the Act.

Assessment Rates

Upon completion of this review, the Department shall determine, and CBP shall assess, antidumping duties on all appropriate entries. Pursuant to 19 CFR 351.212(b)(1), the Department calculates an assessment rate for each importer of the subject merchandise covered by the review.³ The Department intends to issue assessment instructions to CBP 15 days after the date of publication of the results of review.

The Department clarified its "automatic assessment" regulation on May 6, 2003. See *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003). This clarification will apply to entries of subject merchandise during the POR produced by CP Kelco and/or Noviant AB and for which CP Kelco and/or Noviant AB did not know another company would export its merchandise to the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

Cash Deposit Requirements

The following cash-deposit rates will be effective upon publication of the final results of this review for all shipments of purified carboxymethylcellulose from Sweden entered, or withdrawn from warehouse, for consumption on or after publication date, as provided for by section 751(a)(2)(C) of the Act: (1) for subject merchandise produced by CP Kelco and/or Noviant AB, the cash-deposit rate will be the rate established in the final results of this review, except if the rate is less than 0.50 percent and, therefore, *de minimis* within the

meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; 2) if the exporter is not a firm covered in this review or the less-than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and 3) if neither the exporter nor the manufacturer is a firm covered in this or any previous review conducted by the Department, the cash deposit rate will be the "all others" rate of 25.29 percent from the LTFV investigation. See *Notice of Antidumping Duty Orders: Purified Carboxymethylcellulose from Finland, Mexico, and the Netherlands and Sweden*, 70 FR 39734 (July 11, 2005).

These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under section 351.402(f)(2) of the Department's regulations to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and this notice are published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 31, 2007.

Stephen J. Claeys,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-S

DEPARTMENT OF COMMERCE

International Trade Administration

(A-201-834)

Purified Carboxymethylcellulose From Mexico: Notice of Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: In response to a request from Quimica Amtex S.A. de C.V. (Amtex), the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on purified

carboxymethylcellulose (CMC) from Mexico. The review covers exports of the subject merchandise to the United States produced and exported by Amtex.

We preliminarily find that Amtex made sales at less than fair value during the POR. If these preliminary results are adopted in our final results of this review, we will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties based on differences between the export price (EP) or constructed export price (CEP) and normal value (NV).

Interested parties are invited to comment on these preliminary results. Parties who submit arguments in this proceeding are requested to submit with the arguments: (1) a statement of the issues, (2) a brief summary of the arguments (no longer than five pages, including footnotes) and (3) a table of authorities.

EFFECTIVE DATE: August 7, 2007.

FOR FURTHER INFORMATION CONTACT: Mark Flessner or Robert James, AD/CVD Operations, Office 7, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-6312 or (202) 482-0649, respectively.

SUPPLEMENTARY INFORMATION:

Background

The Department published the antidumping duty order on CMC from Mexico on July 11, 2005. See *Notice of Antidumping Duty Orders: Purified Carboxymethylcellulose from Finland, Mexico, the Netherlands, and Sweden*, 70 FR 39734 (July 11, 2005). On July 3, 2006, the Department published the notice of opportunity to request administrative review of CMC from Mexico for the period December 27, 2004, through June 30, 2006. See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review*, 71 FR 37890 (July 3, 2006).

On July 17, 2006, Amtex requested a review of its sales of CMC for the period December 27, 2004, through June 30, 2006 (the POR). On August 30, 2006, the Department published in the **Federal Register** a notice of initiation of this antidumping duty administrative review. See *Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part*, 71 FR 51573 (August 30, 2006).

On September 11, 2006, the Department issued its standard

³ If for the final results we determine CP Kelco AB to be the successor to Noviant AB, we will instruct CBP to liquidate entries subject to this review using CP Kelco's final rate, accordingly.

antidumping duty questionnaire to Amtex. Amtex submitted its response to section A of the Department's antidumping duty questionnaire on October 10, 2006 (Amtex Section A Response). Amtex submitted its response to sections B and C of the Department's questionnaire on November 13, 2006 (Amtex Sections B and C Response).

On March 16, 2007, the Department issued a supplemental questionnaire for sections A, B, and C, to which Amtex responded on April 13, 2007 (Amtex Supplemental Response).

Because it was not practicable to complete this review within the normal time frame, on April 5, 2007, the Department published in the **Federal Register** a notice of the extension for the preliminary results of this review. See *Purified Carboxymethylcellulose from Finland, Sweden, the Netherlands, and Mexico: Extension of Time Limits for Preliminary Determinations of Antidumping Duty Administrative Reviews*, 72 FR 16767 (April 5, 2007). This extension established the deadline for these preliminary results as July 31, 2007.

Because the Department requires additional information from Amtex, a letter was sent out specifying the required data. See Letter from Robert M. James to Jeffrey S. Neeley entitled, "Purified Carboxymethylcellulose (CMC) from Mexico: Section A and B Data Reporting," dated July 30, 2007.

Period of Review

The period of review (POR) is December 27, 2004, through June 30, 2006.

Scope of the Order

The merchandise covered by this order is all purified carboxymethylcellulose (CMC), sometimes also referred to as purified sodium CMC, polyanionic cellulose, or cellulose gum, which is a white to off-white, non-toxic, odorless, biodegradable powder, comprising sodium CMC that has been refined and purified to a minimum assay of 90 percent. Purified CMC does not include unpurified or crude CMC, CMC Fluidized Polymer Suspensions, and CMC that is cross-linked through heat treatment. Purified CMC is CMC that has undergone one or more purification operations which, at a minimum, reduce the remaining salt and other by-product portion of the product to less than ten percent. The merchandise subject to this order is classified in the Harmonized Tariff Schedule of the United States at subheading 3912.31.00. This tariff classification is provided for

convenience and customs purposes; however, the written description of the scope of the order is dispositive.

Date of Sale

The Department's regulations state that it will normally use the date of invoice, as recorded in the exporter's or producer's records kept in the ordinary course of business, as the date of sale. See 19 CFR 351.401(i). If the Department can establish "a different date that better reflects the date on which the exporter or producer establishes the material terms of sale," the Department may choose a different date. *Id.* As further discussed below, the Department preliminarily determines that the invoice date is the date of sale provided the invoice is issued on or before the shipment date; and that the shipment date is the date of sale where the invoice is issued after the shipment date.

In both the home and U.S. markets, Amtex bills some of its sales via "delayed invoices." See Amtex Supplemental Response at 16. Delivery is made to the customer and a *pro forma* invoice is issued, but the subject merchandise remains in storage and continues to be the property of Amtex until withdrawn for consumption by the customer (usually at the end of a regular, monthly billing cycle), at which time a final and definitive invoice is issued. In Amtex's normal books and records this final invoice date, not the *pro forma* invoice date, is recorded as the date of sale. *Id.*, at 24–26.

Therefore, for these preliminary results, the Department will use the earlier of either (a) the invoice date or (b) shipment date as the date of sale for Amtex's NV, EP, and CEP sales. See Analysis Memorandum for the Preliminary Results of the Administrative Review of the Antidumping Duty Order on Carboxymethylcellulose from Mexico dated July 31, 2007 (Analysis Memorandum), for further discussion of date of sale. A public version of this memorandum is on file in the Department's Central Records Unit (CRU) located in Room B-099 of the main Department of Commerce Building, 14th Street and Constitution Avenue, NW, Washington, DC 20230.

Fair Value Comparisons

To determine whether sales of CMC in the United States were made at less than fair value, we compared U.S. price to normal value (NV), as described in the "Export price," "Constructed Export Price," and "Normal Value" sections of this notice. In accordance with section 777A(d)(2) of the Tariff Act of 1930, as

amended (the Act), we calculated monthly weighted-average NVs and compared these to individual U.S. transactions. Because we determined Amtex made both EP and CEP sales during the POR, we used both EP and CEP as the basis for U.S. price in our comparisons.

Product Comparisons

In accordance with section 771(16) of the Act, we considered all products produced by Amtex covered by the description in the "Scope of the Order" section, above, and sold in the home market during the POR, to be foreign like products for purposes of determining appropriate product comparisons to U.S. sales. We relied on five characteristics to match U.S. sales of subject merchandise to comparison sales of the foreign like product (listed in order of priority): 1) grade; 2) viscosity; 3) degree of substitution; 4) particle size; and 5) solution gel characteristics. Where there were no sales of identical merchandise in the home market to compare to U.S. sales, we compared U.S. sales to the next most similar foreign like product on the basis of these product characteristics and the reporting instructions listed in the Department's September 11, 2005 questionnaire. Because there were contemporaneous sales of identical or similar merchandise in the home market suitable for comparison to all U.S. sales, we did not compare any U.S. sales to constructed value (CV). See the CV section below.

Export Price (EP)

Section 772(a) of the Act defines EP as "the price at which the subject merchandise is first sold (or agreed to be sold) before the date of importation by the producer or exporter of subject merchandise outside of the United States to an unaffiliated purchaser in the United States or to an unaffiliated purchaser for exportation to the United States. . . ." as adjusted under section 772(c) of the Act. In accordance with section 772(a) of the Act, we used EP for a number of Amtex's U.S. sales. We preliminarily find that these sales are properly classified as EP sales because these sales were made before the date of importation and were sales directly to unaffiliated customers in the United States, and because CEP methodology was not otherwise indicated.

We based EP on the packed, delivered duty paid, cost and freight (C&F) or free on board (FOB) prices to unaffiliated customers in the United States. Amtex reported no price or billing adjustments, and no discounts. We made deductions for movement expenses in accordance

with section 772(c)(2)(A) of the Act, which included, where appropriate, foreign inland freight from the mill to the U.S. border, inland freight from the border to the customer or warehouse, and U.S. brokerage and handling. We made adjustment for direct expenses (credit expenses) in accordance with section 772(c)(2)(A) of the Act.

Constructed Export Price (CEP)

In accordance with section 772(b) of the Act, CEP is the price at which the subject merchandise is first sold (or agreed to be sold) in the United States before or after the date of importation by or for the account of the producer or exporter of such merchandise, or by a seller affiliated with the producer or exporter, to a purchaser not affiliated with the producer or exporter, as adjusted under sections 772(c) and (d) of the Act. In accordance with section 772(b) of the Act, we used CEP for a number of Amtex's U.S. sales because Amtex sold merchandise to its affiliate in the United States, Amtex Chemicals LLC (Amtex Chemicals or ACUS), which, in turn, sold subject merchandise to unaffiliated U.S. customers. *See, e.g.*, Amtex Section A Response at 10–11. We preliminarily find these U.S. sales are properly classified as CEP sales because they occurred in the United States and were made through Amtex's U.S. affiliate, Amtex Chemicals, to unaffiliated U.S. customers.

We based CEP on the packed, delivered duty paid or FOB warehouse prices to unaffiliated purchasers in the United States. Amtex reported no price or billing adjustments, and no discounts or rebates. We made deductions for movement expenses in accordance with section 772(c)(2)(A) of the Act, which included, where appropriate, foreign inland freight to the border, foreign brokerage and handling, customs duties, U.S. brokerage, U.S. inland freight, and U.S. warehousing expenses. In accordance with section 772(d)(1) of the Act, we deducted those selling expenses associated with economic activities occurring in the United States, including direct selling expenses (credit costs), inventory carrying costs, and indirect selling expenses.

However, no adjustment for CEP profit was made for the reasons set forth in the Analysis Memorandum. *See* Analysis Memorandum at 14.

Normal Value

A. Selection of Comparison Market

In order to determine whether there was a sufficient volume of sales in the home market to serve as a viable basis

for calculating NV (*i.e.*, the aggregate volume of home market sales of the foreign like product was equal to or greater than five percent of the aggregate volume of U.S. sales), we compared the respondent's volume of home market sales of the foreign like product to the volume of U.S. sales of the subject merchandise, in accordance with section 773(a)(1) of the Act. Because Amtex's aggregate volume of home market sales of the foreign like product was greater than five percent of its aggregate volume of U.S. sales of the subject merchandise, we determined the home market was viable. Therefore, we have based NV on home market sales in the usual commercial quantities and in the ordinary course of trade.

B. Price-to-Price Comparisons

We calculated NV based on prices to unaffiliated customers. Amtex reported no billing adjustments, discounts or rebates in the home market. We made deductions for movement expenses including, where appropriate, foreign inland freight and insurance, pursuant to section 773(a)(6)(B) of the Act. In addition, when comparing sales of similar merchandise, we made adjustments for differences in cost attributable to differences in physical characteristics of the merchandise (*i.e.*, DIFMER) pursuant to section 773(a)(6)(C)(ii) of the Act and 19 CFR 351.411. We also made adjustments for differences in circumstances of sale (COS) in accordance with section 773(a)(6)(C)(iii) of the Act and 19 CFR 351.410. We made COS adjustments for imputed credit expenses. Finally, we deducted home market packing costs and added U.S. packing costs in accordance with sections 773(a)(6)(A) and (B) of the Act.

C. Constructed Value (CV)

In accordance with section 773(a)(4) of the Act, we base NV on CV if we are unable to find a contemporaneous comparison market match of such or similar merchandise for the U.S. sale. Section 773(e) of the Act provides that CV shall be based on the sum of the cost of materials and fabrication employed in making the subject merchandise, SG&A expenses, profit, and U.S. packing costs. Since there was no cost allegation in this administrative review, no section D questionnaire was issued to Amtex. Therefore, we relied upon the costs of materials and fabrication as reported by Amtex in its sections A, B, and C responses and supplemental response to calculate CV. However, Amtex's responses did not provide all the data necessary for us to compute a CV profit. Therefore we calculated a CV profit

using Amtex's 2001–2002 audited financial statements, as submitted in the most recent segment of these proceedings. *See Frozen Concentrated Orange Juice from Brazil: Final Results and Partial Rescission of Antidumping Duty Administrative Review*, 66 FR 51008 (October 5, 2001) and the accompanying Issues and Decision Memorandum at Comment 3. For details of this calculation, *see* Analysis Memorandum. For these preliminary results, we did not base NV on CV.

Level of Trade and CEP

In accordance with section 773(a)(1)(B) of the Act, to the extent practicable, we base NV on sales made in the comparison market at the same level of trade (LOT) as the export transaction. The NV LOT is based on the starting price of sales in the home market or, when NV is based on constructed value (CV), that of the sales from which selling, general, and administrative (SG&A) expenses and profit are derived. With respect to CEP transactions in the U.S. market, the CEP LOT is defined as the level of the constructed sale from the exporter to the importer. *See* section 773(a)(7)(A) of the Act.

To determine whether NV sales are at a different LOT than CEP sales, we examine stages in the marketing process and selling functions along the chain of distribution between the producer and the customer. *See* 19 CFR 351.412(c)(2). If the comparison–market sales are at a different LOT, and the difference affects price comparability, as manifested in a pattern of consistent price differences between the sales on which NV is based and comparison–market sales at the LOT of the export transaction, we make a LOT adjustment under section 773(a)(7)(A) of the Act. For CEP sales, if the NV level is more remote from the factory than the CEP level and there is no basis for determining whether the difference in the levels between NV and CEP affects price comparability, we adjust NV under section 773(a)(7)(B) of the Act (the CEP offset provision). *See, e.g., Certain Hot–Rolled Flat–Rolled Carbon Quality Steel Products from Brazil; Preliminary Results of Antidumping Duty Administrative Review*, 70 FR 17406, 17410 (April 6, 2005), results unchanged in *Notice of Final Results of Antidumping Duty Administrative Review of Certain Hot–Rolled Flat–Rolled Carbon Quality Steel Products from Brazil*, 70 FR 58683 (October 7, 2005); *see also Final Determination of Sales at Less Than Fair Value: Greenhouse Tomatoes From Canada*, 67 FR 8781 (February 26, 2002) and accompanying Issues and Decisions

Memorandum at Comment 8. For CEP sales, we consider only the selling activities reflected in the price after the deduction of expenses and CEP profit under section 772(d) of the Act. See *Micron Technology, Inc. v. United States*, 243 F.3d 1301, 1314–1315 (Fed. Cir. 2001). We expect that if the claimed LOTs are the same, the functions and activities of the seller should be similar. Conversely, if a party claims that the LOTs are different for different groups of sales, the functions and activities of the seller should be dissimilar. See *Porcelain-on-Steel Cookware from Mexico: Final Results of Administrative Review*, 65 FR 30068 (May 10, 2000) and accompanying Issues and Decisions Memorandum at Comment 6.

Amtex reported that it had sold CMC to end–users and distributors in the home market and to end–users and distributors in the United States. For the home market, Amtex identified two channels of distribution: end users (channel 1) and distributors (channel 2). See Amtex’s Section A Response at 8 and 9 and Exhibit A–6; see also Amtex Sections B and C Response at B–20. Amtex claimed a single level of trade in the home market, stating that it performs essentially the same selling functions to either category of customer.

We obtained information from Amtex regarding the marketing stages involved in making its reported home market and U.S. sales. Amtex provided a table listing all selling activities it performs, and comparing the levels of trade among each channel of distribution in each market. See Amtex Supplemental Response at Exhibit A–6. We reviewed Amtex’s claims concerning the intensity to which all selling functions were performed for each home market channel of distribution and customer category. For virtually all selling functions, the selling activities of Amtex were identical in both channels, including sales forecasting, personnel training, sales promotion, direct sales personnel, technical assistance, warranty service, after–sales service and arranging delivery. *Id.* In fact, Amtex described the level of performance as identical across its home market end–user and distributor channels of distribution. See Amtex Sections B and C Response at B–20; see also Amtex Supplemental Response at 19 and at Exhibit 6.

While we find some differences in the selling functions performed between the

home market end–user and distributor channels of distribution, such differences are minor in that they are not the principal selling functions but rather particularized toward a few customers and rarely performed. See Amtex Supplemental Response at Exhibit 6. Based on our analysis of all Amtex’s home market selling functions, we agree with Amtex’s characterization of all its home market sales as being made at the same level of trade, the NV LOT.

In the U.S. market, Amtex reported two levels of trade (*i.e.*, EP and CEP sales) through two channels of distribution (*i.e.*, end–users and distributors). We examined the record with respect to Amtex’s EP sales and find that for all EP sales, Amtex performed such selling functions as sales forecasting, sales promotion, direct sales personnel, technical assistance, warranties, after–sales services and arranging delivery. *Id.* In terms of the number and intensity of selling functions performed on EP sales, these were indistinguishable between sales from Amtex to end users and to distributors. *Id.* Accordingly, we preliminarily determine that all EP sales were made at the same LOT.

We compared Amtex’s EP level of trade to the single NV level of trade found in the home market. While we find differences in the levels of intensity performed for some of these functions between the home market NV level of trade and the EP level of trade, such differences are minor (particularized toward a few customers and rarely performed) and do not establish distinct levels of trade within the home market. Based on our analysis of all of Amtex’s home market and EP selling functions, we find these sales were made at the same level of trade.

For CEP sales, however, we find that, consistent with Amtex’s section B response, the CEP LOT is more advanced than the NV LOT. *Id.* The information conveyed in the Selling Functions Chart indicates that the number and intensity of selling functions performed by Amtex in making its sales to Amtex Chemicals are lower than the number and intensity of selling functions Amtex performed for its EP sales. However, Amtex’s responses with regard to the home market in section B indicate that Amtex’s CEP sales are at a more advanced marketing stage than are its

home market sales. Amtex states directly that CEP sales are at a more advanced stage than home market sales. See Amtex Supplemental response at 49. Further, Amtex reports that for its CEP sales most of the principal selling functions in both markets are carried out by a single employee in the Mexico office who devotes a vastly disproportional amount of time to these CEP principal selling functions. See Amtex Supplemental Response at 38; see also Amtex Supplemental Exhibit 12. Contrary to what the section A response indicates, the record evidence submitted by Amtex itself establishes that the CEP LOT (that is, sales from Amtex to its U.S. affiliate) involves a much more intense level of activity and therefore constitutes a more advanced stage of distribution than its NV LOT.

Because we found the home market and U.S. CEP sales were made at different LOTs, as Amtex claimed, we examined whether a LOT adjustment or a CEP offset may be appropriate in this review. As we found only one LOT in the home market, it was not possible to make a LOT adjustment to home market sales prices, because such an adjustment is dependent on our ability to identify a pattern of consistent price differences between the home market sales on which NV is based and home market sales at the CEP LOT. See 19 CFR 351.412(d)(1)(ii). Furthermore, because the CEP LOT is at a more advanced stage of distribution than the NV LOT, it is not possible to make a CEP offset to NV in accordance with section 773(a)(7)(B) of the Act.

Currency Conversions

Amtex reported certain home market and U.S. sales prices and adjustments in both U.S. dollars and Mexican pesos. Therefore, we made peso–U.S. dollar currency conversions, where appropriate, based on the exchange rates in effect on the date of the sale, as certified by the Federal Reserve Board, in accordance with section 773A(a) of the Act.

Preliminary Results of Review

As a result of our review, we preliminarily find the following weighted–average dumping margin exists for the period December 27, 2004 through June 30, 2005:

Producer	POR	Weighted–Average Margin (percent)
Quimica Amtex, S.A. de C.V.	12/27/04 - 06/30/06	2.26

The Department will disclose calculations performed within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). An interested party may request a hearing within thirty days of publication. See 19 CFR 351.310(c). Any hearing, if requested, will be held 37 days after the date of publication, or the first business day thereafter, unless the Department alters the date pursuant to 19 CFR 351.310(d). Interested parties may submit case briefs no later than 30 days after the date of publication of these preliminary results of review. See 19 CFR 351.309(c)(1)(ii). Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than 35 days after the date of publication of this notice. See 19 CFR 351.309(d)(1). Parties who submit arguments in these proceedings are requested to submit with the argument: 1) a statement of the issue; 2) a brief summary of the argument; and 3) a table of authorities. Further, parties submitting written comments must provide the Department with an additional copy of the public version of any such comments on diskette. The Department will issue final results of this administrative review, including the results of our analysis of the issues in any such written comments or at a hearing, within 120 days of publication of these preliminary results.

The Department shall determine, and CBP shall assess, antidumping duties on all appropriate entries. Upon completion of this administrative review, pursuant to 19 CFR 351.212(b), the Department will calculate an assessment rate on all appropriate entries. Amtex has reported entered values for all of its sales of subject merchandise to the U.S. during the POR. Therefore, in accordance with 19 CFR 351.212(b)(1), we will calculate importer-specific duty assessment rates on the basis of the ratio of the total amount of antidumping duties calculated for the examined sales to the total entered value of the examined sales of that importer. These rates will be assessed uniformly on all entries the respective importers made during the POR if these preliminary results are adopted in the final results of review. Where the assessment rate is above *de minimis*, we will instruct CBP to assess duties on all entries of subject merchandise by that importer. In accordance with 19 CFR 356.8(a), the Department intends to issue appropriate appraisement instructions directly to CBP on or after 41 days following the publication of the final results of review.

The Department clarified its "automatic assessment" regulation on May 6, 2003. See *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003). This clarification will apply to entries of subject merchandise during the POR produced by the company included in these preliminary results that the company did not know were destined for the United States. In such instances we will instruct CBP to liquidate unreviewed entries at the All Others rate if there is no rate for the intermediate company or companies involved in the transaction.

Cash Deposit Requirements

Furthermore, the following cash deposit requirements will be effective for all shipments of CMC from Mexico entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(1) of the Act: 1) the cash deposit rate for Amtex will be the rate established in the final results of review, unless that rate is less than or equal to 0.50 percent (*de minimis* within the meaning of 19 CFR 351.106(c)(1)), in which case the cash deposit rate will be zero; 2) if the exporter is not a firm covered in this review or the less-than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and 3) if neither the exporter nor the manufacturer is a firm covered in this or any previous review conducted by the Department, the cash deposit rate will be the "all others" rate of 12.61 percent from the LTFV investigation. See *Notice of Antidumping Duty Orders: Purified Carboxymethylcellulose from Finland, Mexico, and the Netherlands and Sweden*, 70 FR 39734 (July 11, 2005).

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 31, 2007.

Stephen J. Claeys,

Acting Assistant Secretary for Import Administration.

Purified Carboxymethylcellulose from the Netherlands; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: In response to a request from petitioner Aqualon Company, a division of Hercules Incorporated (Aqualon), a U.S. manufacturer of purified carboxymethylcellulose (CMC), the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on CMC from the Netherlands. This administrative review covers imports of subject merchandise produced and exported by Noviant B.V. and CP Kelco B.V. (collectively, CP Kelco). The period of review (POR) is December 27, 2004, through June 30, 2006.

We preliminarily determine that sales of subject merchandise by CP Kelco have been made at less than normal value (NV). If these preliminary results are adopted in our final results, we will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on appropriate entries based on the difference between the export price (EP) or constructed export price (CEP) and NV. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: August 7, 2007.

FOR FURTHER INFORMATION CONTACT: Stephen Bailey or Angelica Mendoza, AD/CVD Operations, Office 7, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482-0193 or (202) 482-3019, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 11, 2005, the Department published the antidumping duty order on CMC from the Netherlands. See *Notice of Antidumping Duty Orders: Purified Carboxymethylcellulose from Finland, Mexico, the Netherlands and*
