**Discount Rates for Cost-Effectiveness Analysis of Federal Programs**

**AGENCY:** Office of Management and Budget.

**ACTION:** Revisions to Appendix C of OMB Circular A-94.

**SUMMARY:** The Office of Management and Budget revised Circular A-94 in 1992. The revised Circular specified certain discount rates to be updated annually when the interest rate and inflation assumptions used to prepare the budget of the United States Government were changed. These discount rates are found in Appendix C of the revised Circular. The updated discount rates are shown below. The discount rates in Appendix C are to be used for cost-effectiveness analysis, including lease-purchase analysis, as specified in the revised Circular. They do not apply to regulatory analysis.

**DATES:** The revised discount rates are effective immediately and will be in effect through December 2007.

*Nominal Discount Rates.* A forecast of nominal or market interest rates for 2007 based on the economic assumptions for the 2008 Budget are presented below. These nominal rates are to be used for discounting nominal flows, which are often encountered in lease-purchase analysis.

**NOMINAL INTEREST RATES ON TREASURY NOTES AND BONDS OF SPECIFIED MATURITIES**

[In percent]

3-Year	5-Year	7-Year	10-Year	20-Year	30-Year
4.9	4.9	4.9	5.0	5.1	5.1

*Real Discount Rates.* A forecast of real interest rates from which the inflation premium has been removed and based

on the economic assumptions from the 2008 Budget is presented below. These real rates are to be used for discounting

constant-dollar flows, as is often required in cost-effectiveness analysis.

**REAL INTEREST RATES ON TREASURY NOTES AND BONDS OF SPECIFIED MATURITIES**

[In percent]

3-Year	5-Year	7-Year	10-Year	20-Year	30-Year
2.5	2.6	2.7	2.8	3.0	3.0

Analyses of programs with terms different from those presented above may use a linear interpolation. For

example, a four-year project can be evaluated with a rate equal to the average of the three-year and five-year

rates. Programs with durations longer

than 30 years may use the 30-year interest rate.

**SUPPLEMENTARY INFORMATION:**

**Variable-Rate Premiums**

Section 4006(a)(3)(E)(iii)(II) of the Employee Retirement Income Security

Act of 1974 (ERISA) and § 4006.4(b)(1) of the PBGC's regulation on Premium Rates (29 CFR part 4006) prescribe use of an assumed interest rate (the "required interest rate") in determining a single-employer plan's variable-rate premium. Pursuant to the Pension Protection Act of 2006, for premium payment years beginning in 2006 or 2007, the required interest rate is the "applicable percentage" (currently 85 percent) of the annual rate of interest determined by the Secretary of the Treasury on amounts invested conservatively in long-term investment grade corporate bonds for the month preceding the beginning of the plan year for which premiums are being paid (the "premium payment year"). Thus, the required interest rate to be used in determining variable-rate premiums for premium payment years beginning in January 2007 is 4.89 percent (*i.e.*, 85 percent of the 5.75 percent composite corporate bond rate for December 2006 as determined by the Treasury).

On December 2, 2005, the Internal Revenue Service published proposed regulations containing updated mortality tables for determining current liability under section 412(l)(7) of the Code and section 302(d)(7) of ERISA for plan years beginning on or after January 1, 2007, <http://www.irs.gov/pub/irs-regs/12498805.pdf>. If these regulations are finalized and effective for plan years beginning on or after January 1, 2007, the required interest rate to be used in determining variable-rate premiums would be 100 percent (instead of 85 percent) of the composite corporate bond rate. If the required interest rate for premium payment years beginning in January 2007 changes, the PBGC will promptly publish a **Federal Register** notice with the new rate.

The following table lists the required interest rates to be used in determining variable-rate premiums for premium payment years beginning between February 2006 and January 2007.

For premium payment years beginning in:	The required interest rate is:
February 2006 .....	4.80
March 2006 .....	4.87

**Late Premium Payments; Underpayments and Overpayments of Single-Employer Plan Termination Liability**

Section 4007(b) of ERISA and § 4007.7(a) of the PBGC's regulation on Payment of Premiums (29 CFR part 4007) require the payment of interest on late premium payments at the rate established under section 6601 of the Internal Revenue Code. Similarly, § 4062.7 of the PBGC's regulation on Liability for Termination of Single-Employer Plans (29 CFR part 4062) requires that interest be charged or credited at the section 6601 rate on underpayments and overpayments of employer liability under section 4062 of ERISA. The section 6601 rate is established periodically (currently quarterly) by the Internal Revenue Service. The rate applicable to the first quarter (January through March) of 2007, as announced by the IRS, is 8 percent.

The following table lists the late payment interest rates for premiums and employer liability for the specified time periods:

From—	Through—	Interest rate (percent)

**Underpayments and Overpayments of Multiemployer Withdrawal Liability**

Section 4219.32(b) of the PBGC's regulation on Notice, Collection, and Redetermination of Withdrawal Liability (29 CFR part 4219) specifies the rate at which a multiemployer plan is to charge or credit interest on underpayments and overpayments of withdrawal liability under section 4219 of ERISA unless an applicable plan provision provides otherwise. For interest accruing during any calendar quarter, the specified rate is the average quoted prime rate on short-term commercial loans for the fifteenth day (or the next business day if the fifteenth day is not a business day) of the month preceding the beginning of the quarter, as reported by the Board of Governors of the Federal Reserve System in Statistical Release H.15 ("Selected Interest Rates"). The rate for the first
