Abstract: This study seeks to examine the impact on student achievement of a combination of a comprehensive English Language Learner (ELL) student program, On Our Way to English [OWE], and a professional development course, Responsive Instruction for Success in English [RISE]. Schools identified as having a high percentage of Spanish-speaking ELL students will be randomly assigned to either the treatment condition or a control group. All grade 1-5 classrooms at each school will participate in the condition assigned to the school. This study begins in 2007. OWE and RISE will be implemented in treatment schools during the 2007-2008 and 2008-2009 school years. Data on classroom practices, student activities, and student language and literacy will be collected each of these years. Intermediate and cumulative effects of the interventions will be analyzed using year-end data and data collected over the course of the study. Other analyses may explore education mechanisms that contribute to variation in the impact in achievement.
