

Dam Safety and Inspections, New York Regional Office directed the licensee to resume project operation by May 30, 2003, and to provide a status report to that office by June 15, 2003. The licensee did not comply. By letter of September 23, 2004, Commission staff informed the licensee that the project was considered abandoned and that the Commission may terminate the license for the project under an implied surrender proceeding. In this letter, the licensee was given the opportunity to voluntarily surrender the license.

On December 6, 2004, the licensee filed a response to Commission staff's September 23, 2004 letter, stating that the reason repairs had not been done at the project was that the Appleton Mills area had been undergoing a major selective demolition of 400,000 of its 600,000 square feet and that an asbestos removal and clean up process had gone on for several years. In the December 6, 2004 filing, the licensee stated that necessary planning was underway for the reconstruction of the equipment and wheelhouse. The licensee further stated that it was his plan to develop a full scope of work by early March 2005 and that he would forward an outline of the scope with a full timeline projection to the Commission. However, a scope of work was never filed. On July 26, 2006, the City of Lowell, Massachusetts (City) filed a letter with the Commission stating that the City had acquired the parcel of land on which the licensed Appleton Trust Project is located.

To date, the licensee has not made the necessary repairs to resume operations at the project and the project is hereby considered abandoned.
