

Dam Safety and Inspections, New York Regional Office directed the licensee to resume project operation by May 30, 2003, and to provide a status report to that office by June 15, 2003. The licensee did not comply. By letter of September 23, 2004, Commission staff informed the licensee that the project was considered abandoned and that the Commission may terminate the license for the project under an implied surrender proceeding. In this letter, the licensee was given the opportunity to voluntarily surrender the license.

On December 6, 2004, the licensee filed a response to Commission staff's September 23, 2004 letter, stating that the reason repairs had not been done at the project was that the Appleton Mills area had been undergoing a major selective demolition of 400,000 of its 600,000 square feet and that an asbestos removal and clean up process had gone on for several years. In the December 6, 2004 filing, the licensee stated that necessary planning was underway for the reconstruction of the equipment and wheelhouse. The licensee further stated that it was his plan to develop a full scope of work by early March 2005 and that he would forward an outline of the scope with a full timeline projection to the Commission. However, a scope of work was never filed. On July 26, 2006, the City of Lowell, Massachusetts (City) filed a letter with the Commission stating that the City had acquired the parcel of land on which the licensed Appleton Trust Project is located.

To date, the licensee has not made the necessary repairs to resume operations at the project and the project is hereby considered abandoned.

II. Additional Information About Commenting on the Proposed Consent Decree

A. How Can I Get a Copy of the Consent Decree?

Direct your comments to the official public docket for this action under Docket ID No. EPA-HQ-OGC-2007-0230 which contains a copy of the consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OEI Docket is (202) 566-1752.

An electronic version of the public docket is available through www.regulations.gov. You may use the www.regulations.gov to submit or view

public comments, access the index listing of the contents of the official public docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search," then key in the appropriate docket identification number.

It is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing online at www.regulations.gov without change, unless the comment contains copyrighted material, CBI, or other information whose disclosure is restricted by statute. Information claimed as CBI and other information whose disclosure is restricted by statute is not included in the official public docket or in the electronic public docket. EPA's policy is that copyrighted material, including copyrighted material contained in a public comment, will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the EPA Docket Center.

B. How and To Whom Do I Submit Comments?

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an e-mail address or other contact information in the body of your comment and with any disk or CD-ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the www.regulations.gov Web site to submit comments to EPA electronically is EPA's preferred method

for receiving comments. The electronic public docket system is an “anonymous access” system, which means EPA will not know your identity, e-mail address, or other contact information unless you provide it in the body of your comment. In contrast to EPA’s electronic public docket, EPA’s electronic mail (e-mail) system is not an “anonymous access” system. If you send an e-mail comment directly to the Docket without going through www.regulations.gov, your e-mail address is automatically captured and included as part of the comment that is placed in the official public docket, and made available in EPA’s electronic public docket.

Dated: March 22, 2007.

SUPPLEMENTARY INFORMATION:

I. Information About the Project/ Document

This report describes the potential scope and magnitude of climate change impacts on combined sewer overflow (CSO) events mitigation efforts in the Great Lakes Region and New England Region. The report describes the extent to which CSO long-term control plans may be under-designed if planners assume that past precipitation conditions are representative of future conditions. Combined sewer systems (CSSs) collect and co-treat stormwater and municipal wastewater. During high-intensity rainfall events, the capacity of CSSs can be exceeded resulting in the discharge of untreated storm water and wastewater directly into receiving streams. These CSO events can result in high concentrations of microbial pathogens, biochemical oxygen demand, suspended solids, and other pollutants in receiving waters. Climate change in many parts of the country is expected to increase the proportion of rainfall occurring in high-intensity events, resulting in increased stormwater runoff. Climate change could thus

present a risk of increased CSO frequency and resulting water quality impairment.
