SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*).

The applicant is requesting authorization for the receipt, import and export of teeth and prepared microscope slides obtained from seal and sea lion species, expect walrus (Order Pinnipedia). The Matson Laboratory provides age related data to researchers and biologists. Age data are used in population modeling, with age structure an indicator of population condition. Teeth are sent to the laboratory for cementum age analysis. The number of teeth varies depending upon the nature of the project, from a single tooth to several hundred from a legal harvest; no more than 2000 teeth will be analyzed annually. Import and export authority is requested for all locations wherever pinnipeds occur and are the subject of government-authorized research and/or harvest. Principally, these locations are expected to be those within the jurisdiction of the Government of Canada. There will be no incidental takes of non-target species. A permit is requested for five years.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.
