The Lacey Act (18 U.S.C. 42)(Act) prohibits the possession or importation of any animal or plant deemed to be and prescribed by regulation to be injurious to human beings; to the interests of agriculture, horticulture, and forestry; or to wildlife or the wildlife resources of the United States. The Department of the Interior is charged with enforcement of this Act. The Act and our regulations at 50 CFR 16 allow for the importation of animals classified as injurious if specific criteria are met. To effectively carry out our responsibilities and protect the aquatic resources of the United States, we must gather information on the animals being imported with regard to their source, destination, and health status. It is also imperative that we ensure the qualifications of those individuals providing the fish health data upon which we base our decision to allow importation.

We use three forms to collect this information:

(2) FWS Form 3-2274 (U.S. Title 50 Certification Form). The certifying official uses this form to affirm the health status of the fish or their reproductive products to be imported. Information includes, but is not limited to:

(a) Certifying official's name and date of most recent certification.

(b) Number, life stage, and species of animals or eggs.

(c) Site and date of sample collection.

(e) Site from which the animals or eggs will be shipped.

(f) Dates of the shipment.
