40 CFR Part 52

[EPA-R01-OAR-2007-0401; FRL-8496-6]

Approval and Promulgation of Air Quality Implementation Plans; Massachusetts; State Implementation Plan Revision To Implement the Clean Air Interstate Rule

AGENCY: Environmental Protection

Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the State of Massachusetts on March 30, 2007. This revision

addresses the requirements of EPA's Clean Air Interstate Rule (CAIR), promulgated on May 12, 2005 and subsequently revised on April 28, 2006 and December 13, 2006. EPA has determined that the SIP revision fully implements the CAIR requirements for Massachusetts. Therefore, as a consequence of the SIP approval, the Administrator of EPA will also, in a separate document, issue a final rule to withdraw the Federal Implementation Plan (FIP) concerning $NO_{\rm X}$ ozoneseason emissions for Massachusetts.

In the SIP revision that EPA is approving, Massachusetts will meet CAIR requirements by participating in the EPA-administered cap-and-trade program addressing NO_X ozone-season emissions. Massachusetts's SIP revision is based on EPA's model CAIR NOX ozone season rule and is, in most respects, substantively identical to that model rule. The Massachusetts CAIR program has two major substantive differences from that model rule (expanded applicability, and a different methodology for allocating NO_X allowances), both of which are consistent with the flexibility allowed under CAIR for state participation in the EPA-administered cap-and-trade program. The SIP revision complies with the statutory and regulatory requirements for approval of a CAIR NO_X ozone-season program. This action is being taken in accordance with the Clean Air Act.

EFFECTIVE DATE: This rule is effective on December 3, 2007.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA-R01-OAR-2007-0401. All documents in the docket are listed on the http:// www.regulations.gov Web site. Although listed in the index, some information may not be publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through http:// www.regulations.gov or in hard copy at the Office of Ecosystem Protection, U.S. Environmental Protection Agency, EPA New England Regional Office, One Congress Street, Suite 1100, Boston, MA. EPA requests that if at all possible, you contact the contact listed in the FOR **FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding legal holidays.

Copies of the documents relevant to this action are also available for public inspection during normal business hours, by appointment at Division of Air Quality Control, Department of Environmental Protection, One Winter Street, 8th Floor, Boston, MA 02108.

FOR FURTHER INFORMATION CONTACT: If you have questions concerning today's action, please contact Alison C. Simcox, Air Quality Planning Unit, U.S. Environmental Protection Agency, EPA New England Regional Office, One Congress Street, Suite 1100 (CAQ), Boston, MA 02114–2023, telephone number (617) 918–1684, fax number (617) 918–0684, e-mail simcox.alison@epa.gov.

I. What Action Is EPA Taking?

EPA is approving a revision to Massachusetts's SIP, submitted on March 30, 2007. This SIP revision includes a new regulation, 310 CMR 7.32, "Massachusetts Clean Air Interstate Rule," and amendments to existing regulation 310 CMR 7.28, "NOX Allowance Trading Program." In its SIP revision, Massachusetts will meet CAIR requirements by requiring certain electric generating units (EGUs) to participate in the EPA-administered State CAIR cap-and-trade program addressing NO_X ozone-season emissions. EPA has determined that the Massachusetts SIP as revised meets the applicable requirements of CAIR. On August 1, 2007, EPA proposed approval of the Massachusetts SIP (see 72 FR 41970). No public comments were received on EPA's notice of proposed rulemaking (NPR).

As a consequence of the SIP approval, the Administrator of EPA will also, in a separate document, issue a final rule to withdraw the FIP concerning NO_X ozone-season emissions for Massachusetts. That action will delete and reserve 40 CFR 52.1140. The withdrawal of the CAIR FIP for Massachusetts is a conforming amendment that must be made once the

SIP is approved because EPA's authority to issue the FIP was premised on a deficiency in the SIP for Massachusetts. Once the SIP is fully approved, EPA no longer has authority for the FIP. Thus, EPA will not have the option of maintaining the FIP following the full SIP approval. Accordingly, EPA does not intend to offer an opportunity for a public hearing or an additional opportunity for written public comment on the withdrawal of the FIP.

II. What Is the Regulatory History and General Requirements of CAIR and the CAIR FIPs?

The Clean Air Interstate Rule (CAIR) was published by EPA on May 12, 2005 (70 FR 25162). In this rule, EPA determined that 28 States and the District of Columbia contribute significantly to nonattainment and interfere with maintenance of the national ambient air quality standards (NAAQS) for fine particles (PM2.5) and/ or 8-hour ozone in downwind States in the eastern part of the country. As a result, EPA required those upwind States to revise their SIPs to include control measures that reduce emissions of SO₂, which is a precursor to PM_{2.5} formation, and/or NOx, which is a precursor to both ozone and PM_{2.5} formation. For jurisdictions that contribute significantly to downwind PM_{2.5} nonattainment, CAIR sets annual State-wide emission reduction requirements (i.e., budgets) for SO2 and annual State-wide emission reduction requirements for NO_X. Similarly, for jurisdictions that contribute significantly to 8-hour ozone nonattainment, CAIR sets State-wide emission reduction requirements for NO_x for the ozone season (May 1st to September 30th). Under CAIR, States may implement these reduction requirements by participating in the EPA-administered cap-and-trade programs or by adopting other control measures. The first phase of NO_X reductions starts in 2009 and continues through 2014, while the first phase of SO₂ reductions starts in 2010 and continues through 2014. The second phase of reductions for both NOx and SO₂ starts in 2015 and continues thereafter.

More information on the regulatory history and requirements of CAIR and the CAIR FIPs is available in the NPR for this SIP Revision and will not be restated here.

III. EPA Analysis of Massachusetts's CAIR SIP Submittal

A brief summary of EPA's review of Massachusetts's CAIR program is given below. Additional details regarding requirements of Massachusetts's 310 CMR 7.32 regulation and EPA's evaluation of this regulation are detailed in a memorandum dated July 16, 2007, entitled "Technical Support Document (TSD) for revisions to the Massachusetts SIP: 310 CMR 7.32 ('Massachusetts Clean Air Interstate Rule')" and in the NPR for this SIP revision. The TSD and Massachusetts's CAIR SIP submittal are available in the docket supporting this action.

A. State Budgets for Allowance Allocations

The CAIR NO_X annual and ozone season budgets were developed from historical heat input data for EGUs. Using these data, EPA calculated annual and ozone season regional heat input values, which were multiplied by 0.15 pounds per million British thermal units (lb/mmBtu), for phase 1 of the CAIR program (2009–2014) and by 0.125 lb/mmBtu, for phase 2 of the CAIR program (2015 and thereafter) to obtain regional NO_X budgets for 2009-2014 and for 2015 and thereafter, respectively. EPA derived the State NO_X annual and ozone season budgets from the regional budgets using State heat input data adjusted by fuel factors. Massachusetts, however, is only required to participate in the CAIR NO_X ozone-season program, not the CAIR NO_X annual or SO_2 trading programs. Therefore, only CAIR NO_X ozone-season budgets apply to the Massachusetts CAIR program.

In today's action, EPA is approving Massachusetts's SIP revision of 310 CMR 7.32. This SIP revision adopts the budgets established for the State in CAIR, i.e., 7,551 tons of NO_X ozoneseason emissions for CAIR phase 1 and 6,293 tons for CAIR phase 2, plus an additional 363 tons of NOx ozoneseason emissions for both phases 1 and 2 to account for NO_X emissions from "non-EGU" units from the Massachusetts NO_X SIP Call trading program (see section III C below). The total NO_X ozone-season budget is therefore 7,914 tons of NO_X ozoneseason emissions for CAIR phase 1 and 6,656 tons for CAIR phase 2. Massachusetts's SIP revision sets this budget as the total number of allowances (with each allowance authorizing one ton of NO_X ozoneseason emissions) available for allocation for each year under the EPAadministered CAIR cap-and-trade program.

B. CAIR Cap-and-Trade Programs

The CAIR NO_X annual and ozoneseason model trading rules both largely mirror the structure of the NO_X SIP Call

model trading rule in 40 CFR part 96, subparts A through I. While the provisions of the NO_X annual and ozone-season model rules are similar, there are some differences. For example, the NO_X ozone season model rule reflects the fact that the CAIR NO_X ozone season trading program replaces the NO_X SIP Call trading program after the 2008 ozone season and is coordinated with the NO_X SIP Call program. The NO_X ozone season model rule provides incentives for early emissions reductions by allowing banked, pre-2009 NO_X SIP Call allowances to be used for compliance in the CAIR NO_X ozone-season trading program. In addition, States have the option of continuing to meet their NO_X SIP Call requirement by participating in the CAIR NO_X ozone season trading program and including all their NO_x SIP Call trading sources in that program.

In the SIP revision, Massachusetts will implement its CAIR budgets by requiring EGUs (as well as "non-EGUs" from its NO_X SIP Call trading program, as discussed below) to participate in EPA-administered cap-and-trade programs for NO_X ozone-season emissions. Massachusetts has adopted a full SIP revision that adopts, with certain allowed changes discussed below, the CAIR model cap-and-trade rules for NO_X ozone-season emissions.

C. Applicability Provisions for Non-EGU NO_X SIP Call Sources

In general, the CAIR model trading rules apply to any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990 or the start-up of the unit's combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

States have the option of bringing in, for the CAIR NO_X ozone-season program only, those units in the State's NO_X SIP Call trading program that are not EGUs as defined under CAIR (herein called "non-EGUs"). Under this option, the CAIR NO_X ozone-season program must cover all large industrial boilers and combustion turbines, as well as any small EGUs (*i.e.* units serving a generator with a nameplate capacity of 25 MWe or less) that the State currently requires to be in the NO_X SIP Call trading program.

Massachusetts has chosen to expand the applicability provisions of the CAIR NO_X ozone season trading program to include all units in the State's NO_X SIP Call trading program. Units in the Massachusetts NO_X SIP Call trading program include units that burn more than 50-percent fossil fuel and that have

a maximum heat-input capacity of 250 million British thermal units (MMBtu) or more, or serve a generator with a nameplate capacity of 15 MWe or more. These units are included in the Massachusetts NO_X SIP Call trading program whether or not they produce electricity for sale, and will be included in the Massachusetts CAIR program beginning with the control period in 2009. EPA has determined that Massachusetts 310 CMR 7.32 includes the allowable CAIR applicability provisions relating to adding all NO_X SIP Call trading program units to the Massachusetts CAIR NO_X ozone season program.

D. NO_X Allowance Allocations

Under the NO_X allowance-allocation methodology in the CAIR model trading rules and in the CAIR FIP, NO_X annual and ozone-season allowances are allocated to units that have operated for five years (*i.e.*, "existing units"), based on heat input data from a three-year period that are adjusted for fuel type by using fuel factors of 1.0 for coal, 0.6 for oil, and 0.4 for other fuels. The CAIR model trading rules and the CAIR FIP also provide a new unit set-aside from which units without five years of operation are allocated allowances based on the units' prior year emissions. States may establish in their SIP

States may establish in their SIP submissions a different NO_X allowance-allocation methodology that will be used to allocate allowances to sources in the States if certain requirements are met concerning the timing of submission of units' allocations to the Administrator for recordation and the total amount of allowances allocated for each control period. In adopting alternative NO_X allowance-allocation methodologies, States have flexibility with regard to:

1. The cost to recipients of the allowances, which may be distributed for free or auctioned;

2. The frequency of allocations;

3. The basis for allocating allowances, which may be distributed, for example, based on historical heat input or electric and thermal output; and

4. The use of allowance set-asides and, if used, their size.

Massachusetts has chosen to replace the provisions of the CAIR NO_X ozoneseason model trading rule concerning allowance allocations with its own methodology. Massachusetts's CAIR program codified at 310 CMR 7.32 distributes NO_X ozone-season allowances based upon historical electric and thermal output, rather than heat input. Massachusetts also provides a percentage of allowances for Public Benefit and new unit set-asides.

Massachusetts's CAIR program includes both a Public Benefit set-aside (PBSA) to encourage Energy Efficiency Projects (EEPs) and Renewable Energy Projects (REPs), and a new unit set-aside to allow for addition of new units. Both of these types of set-asides were included in the State's NO_X SIP Call trading program.

Massachusetts has set a new unit setaside at 5 percent of the State's CAIR budget for both phases of the CAIR program. Therefore, the new unit setaside includes 396 CAIR NO_X ozoneseason allowances during CAIR phase 1 (2009–2014), and 333 allowances during CAIR phase 2 (2015 and thereafter). Massachusetts has set a PBSA at 10 percent of the State's CAIR budget for both phases of the CAIR program. Therefore, the PBSA includes 791 CAIR NO_X ozone-season allowances during CAIR phase 1 (2009-2014), and 666 allowances during CAIR phase 2 (2015 and thereafter). Information on the Banking and Transferring of Set-Asides in the Massachusetts CAIR program is available in the NPR and will not be restated here.

Massachusetts has chosen to replace the provisions of the CAIR NO_X ozoneseason model trading rule concerning allowance allocations with a methodology similar to that used in the Massachusetts NO_X SIP Call trading program. This methodology, which is based on energy output, allocates allowances to existing units and, to the extent possible, to new units based on their steam and/or electricity output. More details on Massachusetts's methodology for allocating CAIR allowances, as well as information on Massachusetts CAIR permits and requirements for facilities to report emissions data, can be found in the TSD and the NPR and will not be restated

E. Individual Opt-in Units

The Massachusetts CAIR SIP does not include opt-in provisions because the State has chosen to allocate CAIR allowances using an energy-output methodology that cannot be used for opt-in sources under the model CAIR NO_X ozone-season trading rule. The Massachusetts NO_X SIP Call trading program (310 CMR 7.28), however, does allow for opt-in sources (although no sources have opted into this program to date). Therefore, sources that wish to be part of the Massachusetts CAIR program can take advantage of the opt-in provisions of the State's NO_X SIP Call program until the end of 2008. Beginning with the 2009 ozone season, the NO_x SIP Call program will be replaced by the State's CAIR Program,

and no further opt-in units will be allowed.

IV. Final Action

EPA is approving state regulations 310 CMR 7.32 ("Massachusetts CAIR") and amendments to 310 CMR 7.28 ("NO_X Allocation Trading Program") as a revision to the Massachusetts SIP. Under this SIP revision, Massachusetts will participate in the EPA-administered cap-and-trade program for NOx ozoneseason emissions. The SIP revision meets the applicable requirements in 40 CFR 51.123(o) and (aa), with regard to NO_X ozone season emissions. EPA has determined that the SIP as revised meets the requirements of CAIR. As a consequence of the SIP approval, the Administrator of EPA will also issue, without providing an opportunity for a public hearing or an additional opportunity for written public comment, a final rule to withdraw the CAIR FIP concerning NO_X ozone-season emissions for Massachusetts. That action will delete and reserve 40 CFR 52.1140 in Part 52.

V. When Is This Action Effective?

EPA finds that there is good cause for this approval to become effective on the date of publication of this action in the **Federal Register**, because a delayed effective date is unnecessary due to the nature of the approval, which allows the State to make allocations under its CAIR rules. The expedited effective date for this action is authorized under both 5 U.S.C. 553(d)(1), which provides that rule actions may become effective less than 30 days after publication if the rule "grants or recognizes an exemption or relieves a restriction" and 5 U.S.C. 553(d)(3), which allows an effective date less than 30 days after publication "as otherwise provided by the agency for good cause found and published with the rule." CAIR SIP approvals exempt states and CAIR sources within states from being subject to allowance allocation provisions in the CAIR FIPs that otherwise would apply, allowing States to make their own allowance allocations based on their SIP-approved State rule. The exemption from these obligations is sufficient reason to allow an expedited effective date of this rule under 5 U.S.C. 553(d)(1). In addition, Massachusetts's exemption from these obligations provides good cause to make this rule effective on the date of publication of this action in the Federal Register, pursuant to 5 U.S.C. 553(d)(3). The purpose of the 30-day waiting period prescribed in 5 U.S.C. 553(d) is to give affected parties a reasonable time to adjust their behavior and prepare before the final rule takes effect. Where,

as here, the final rule grants an exemption rather than imposing obligations, and where the effect of the final rule is simply to approve for Federal purposes obligations that are already effective under state law, affected parties, such as the State of Massachusetts and CAIR sources within the State, do not need time to adjust and prepare before the rule takes effect.

VI. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104-4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the

Clean Air Act. This rule also is not subject to Executive Order 13045 "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997), because it approves a state rule implementing a Federal standard.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

The Congressional Review Act, 5 U.S.C. section 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a "major rule" as defined by 5 U.S.C. section 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 1, 2008. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[CC Docket No. 96-45; FCC 05-46]

Office of Management and Budget Approval of Public Information Collections

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: The Federal Communications Commission received Office of Management and Budget (OMB) approval for the information collections contained in sections 54.202 and 54.209 of the Commission's rules, 47 CFR 54.202 and 54.209 on October 14, 2005, as published in the Federal Register on November 2, 2005, at 70 FR 66407.

DATES: Sections 54.202 and 54.209 of the Commission's rules, 47 CFR 54.202 and 54.209 published at 70 FR 29978,

May 25, 2005 became effective on October 14, 2005.

FOR FURTHER INFORMATION CONTACT:

Thomas Butler, Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554, (202) 418–1492, or via the Internet at Thomas.Butler@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–1081. OMB Approval Date: 10/14/2005. Expiration Date: 10/31/2008. Title: Federal-State Joint Board on Universal Service, CC Docket No. 96–45, Report and Order, 70 FR 29960, May 25, 2005.

Form No.: N/A.

Estimated Annual Burden: 22 responses; 242 total annual burden hours; approximately 11 hours average per respondent.

Needs and Uses: In the Report and Order, the Commission adopted additional mandatory requirements for eligible telecommunication carrier (ETC) designation proceedings in which the Commission acts pursuant to section 214(e)(6) of the Communications Act of 1934, as amended (the Act). Consistent with the recommendations of the Federal-State Joint Board on Universal

Service, and expanding the mandatory requirements, the Commission adopted rules 54.202 and 54.209, 47 CFR 54.202, 54.209, which imposed additional requirements for designation and annual certifications. These requirements ensure that ETCs continue to comply with the conditions of the ETC designation and that universal service funds are used for their intended purposes. Specifically, every ETC must submit, on an annual basis: (1) Progress reports on the ETC's five-year service quality improvement plan; (2) detailed information on any outage lasting at least 30 minutes; (3) the number of unfulfilled requests for service from potential customers within its service areas; (4) the number of complaints per 1,000 handsets or lines; (5) certification that the ETC is complying with applicable service quality standards and consumer protection rules; (6) certification that the ETC is able to function in emergency situations; (7) certification that the ETC is offering a local usage plan comparable to that offered by the incumbent local exchange carrier (LEC) in the relevant service areas; and (8) certification that the carrier acknowledges that the

^{1.} This table lists regulations adopted as of 1972. It does not depict regulatory requirements which may have been part of the Federal SIP before this date.

^{2.} The regulations are effective statewide unless otherwise stated in comments or title section.
