- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

II. Did EPA Approve the Application?

The Agency approved the application on January 19, 2007, after considering all required data on risks associated with the proposed use of Z-9-tetradecen-1-yl acetate, Z-11-tetradecen-1-ol, and Z-11-tetradecenal, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of Z-9-tetradecen-1-yl acetate, Z-11-tetradecen-1-ol, and Z-11-tetradecenal when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

III. Approved Application

The company submitted an application to EPA to register the pesticide product Isomate-CM/LR TT containing the three new active ingredients: Z-9-tetradecen-1-yl acetate, Z-11-tetradecen-1-ol, and Z-11-tetradecenal (EPA File Symbol 53575-31) containing the same chemicals at 4.34%, 1.05%, and 1.00% respectively. However, since the notice of receipt of the application to register the product as required by section 3(c)(4) of FIFRA, as

amended, was not published in the **Federal Register**, interested parties may submit comments on or before March 30, 2007 for this product only.

Therefore, the 30-day comment period will apply for these registrations.

Unless a request is withdrawn by the registrant by August 27, 2007 or by March 30, 2007 for those registrations with a 30-day comment period, orders will be issued canceling all of these registrations. A person may submit comments to EPA as provided in ADDRESSES and Unit I. of the SUPPLEMENTARY INFORMATION above. However, because FIFRA section 6(f)(1)(A) allows a registrant to request cancellation of its pesticide registrations at any time, users or anyone else desiring retention of those pesticides listed in Table 1 may want to contact the applicable registrant in Table 2 directly during this period to request that the registrant retain the pesticide registration or to discuss the possibility of transferring the registration. A user seeking to apply for its own registration of that pesticide may submit comments requesting EPA not to cancel a registration until its registration is granted.

Table 2 of this unit includes the names and addresses of record for all registrants of the products in Table 1 of this unit, in sequence by EPA company number:

III. What is the Agency's Authority for Taking this Action?

Section 6(f)(1)(A) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the Federal Register and provide for a 30-day public comment period. In addition, where a pesticide is registered for a minor agricultural use and the Administrator determines that cancellation or termination of that use would adversely affect the availability of the pesticide for use, FIFRA section 6(f)(1)(C) requires EPA to provide a 180-day period before approving or rejecting the section 6(f) request unless:

1. The registrant requests a waiver of the 180-day period, or
2. The Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before August 27, 2007 or before March 30, 2007 for those registrations where the 180-day comment period has been waived. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in the **Federal Register** of June 26, 1991 (56 FR 29362) (FRL-3846-4). Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a Data Call-In. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold, or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product. Exception to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have

already been imposed, as in a Special Review action, or where the Agency has identified significant potential risk concerns associated with a particular chemical.
