

Quality of Project Services

In determining the quality of the services to be provided by the proposed project, we will consider the extent to which the proposed project is likely to be effective in—

- (1) Creating an environment in which a core group of teachers and other adults within the school know the needs, interests, and aspirations of each student well, closely monitor each student's progress, and provide the academic and other support each student needs to succeed (9);
- (2) Equipping all students with the reading/English language arts, mathematics, and science knowledge and skills they need to succeed in postsecondary education and careers without need for remediation (8);
- (3) Helping students who enter high school with reading/English language arts or mathematics skills that are significantly below grade-level "catch up" quickly and attain proficiency by the end of the 10th grade (8);
- (4) Providing teachers with the professional development, coaching, regular opportunities for collaboration with peers, and other supports needed to implement a rigorous curriculum and provide high-quality instruction (8);
- (5) Increasing the participation of students, particularly low-income students, in Advanced Placement, International Baccalaureate, or dual credit courses (8); and
- (6) Increasing the percentage of students who enter postsecondary education in the semester following high school graduation (8).

Support for Implementation

In determining the adequacy of the support the applicant will provide for implementation of the proposed project, we will consider the extent to which—

- (1) The management plan is likely to achieve the objectives of the proposed project on time and within budget and includes clearly defined responsibilities and detailed timelines and milestones for accomplishing project tasks (7);
- (2) The project director and other key personnel are qualified to carry out their responsibilities, and their time commitments are appropriate and adequate to implement the SLC project effectively (4);
- (3) The applicant will support the proposed project with funds provided under other Federal or State programs and local cash or in-kind resources (2); and
- (4) The requested grant amount and the project costs are sufficient to attain project goals and reasonable in relation to the objectives and design of the project (2).

Quality of the SLC Project Evaluation

In determining the quality of the proposed project evaluation to be conducted by an independent, third-party evaluator, we consider the extent to which—

- (1) The evaluation will provide timely, regular, and useful feedback to the LEA and the participating schools on the success and progress of implementation, and identify areas for needed improvement (3); and
- (2) The independent evaluator is qualified to conduct the evaluation (2).

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed in particular to the chemical manufacturer and/or importer who submitted the TMEs to EPA. This action may, however, be of interest to the public in general. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action

to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I get Copies of this Document and Other Related Information?

1. *Docket.* EPA has established a docket for this action under docket ID number EPA-HQ-OPPT-2007-1087. All documents in the docket are listed in the docket's index at <http://www.regulations.gov>. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available electronically at <http://www.regulations.gov>, or, if only available in hard copy, at the OPPT Docket. The OPPT Docket is located in the EPA Docket Center (EPA/DC) at Rm. 3334, EPA West Bldg., 1301 Constitution Ave., NW., Washington, DC. 2. *Electronic access.* You may access this **Federal Register** document electronically through the EPA Internet under the "**Federal Register**" listings at <http://www.epa.gov/fedrgstr>.

II. What is the Agency's Authority for Taking This Action?

Section 5(h)(1) of TSCA and 40 CFR 720.38 authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes, if the Agency finds that the manufacture, processing, distribution in commerce, use, and disposal of the substances for test marketing purposes will not present an unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant

doubt on its finding that the test marketing activity will not present an unreasonable risk of injury.

III. What Action is the Agency Taking?

EPA has approved the above referenced TMEs. EPA has determined that test marketing these new chemical substances, under the conditions set out in each TME application and in this notice, will not present any unreasonable risk of injury to health or the environment.

IV. What Restrictions Apply to These TMEs?

The test market time period, production volume, number of customers, and use must not exceed specifications in the applications and this notice. All other conditions and restrictions described in the applications and in this notice must also be met.
