IV. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period, the Administrator may approve such a request.

V. Procedures for Withdrawal of Request and Considerations for Reregistration of Dimethipin

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before May 11, 2007. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the products have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action.

In any order issued in response to this request for cancellation of product registrations, EPA proposes to include the following provisions for the treatment of any existing stocks of the products identified or referenced in Table 1: The registrant will be allowed to sell and distribute the subject products for 2 years from the date that the cancellations are made final. In addition, existing stocks of dimethipin products may be sold or used until they are depleted.

If the request for voluntary cancellation is granted as discussed above, the Agency intends to issue a cancellation order that will allow persons other than the registrant to continue to sell and/or use existing stocks of cancelled products until such stocks are exhausted, provided that such use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled product. The order will specifically prohibit any use of existing stocks that is not consistent with such previously approved labeling. If, as the Agency currently intends, the final cancellation order contains the existing stocks provision just described, the order will be sent only to the affected registrant of the cancelled products. If the Agency determines that the final cancellation order should contain existing stocks provisions different than the ones just described, the Agency will publish the cancellation order in the **Federal Register**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

II. Registration Application

EPA received an application as follows to register a pesticide product

that proposes new uses for certain of its active ingredients. This notice of receipt of this application pursuant to the provisions of section 3(c)(4) of FIFRA does not imply a decision by the Agency on the application.

A. Product Proposing the New Use/ Changed Use Pattern for Certain of the Active Ingredients

File Symbol: 75771-R. **Applicant:** Ticks or Mosquitoes, LLC, 905 S. Kingshighway, Sikeston, MO 63801. **Product name:** Biter Fighter™. **Product type:** Biochemical insect attractant. **Active ingredients:** Sodium bicarbonate, urea, and calcium lactate at 63.61%, 11.20% and 25.19%, respectively. **Proposal classification/ Use:** None. An attractant used in insect traps.

B. Description of the New Use/Changed Use Pattern Represented by the Above-mentioned Proposed Product Registration Application

In the **Federal Register** of November 1, 2006 (71 FR 64266) (FRL-8097-1), EPA issued a notice pursuant to section 3(c)(4) of FIFRA, as amended, announcing receipt of the above-mentioned application to register a pesticide product because it contains a new active ingredient not included in any currently registered products. The new active ingredient that was the subject of the November 1, 2006 notice is calcium lactate. This follow up notice is being issued because the same proposed pesticide product (i.e., EPA File Symbol 75771-R) contains two other active ingredients, sodium bicarbonate and urea, whose inclusion in this proposed insect attractant product represents a new use/changed use pattern for both, as well as the first public health claim(s) for both. In light of the fact that this was not highlighted in the November 1, 2006 notice, issuance of this notice is required pursuant to FIFRA section 3(c)(4).
