

This notice is provided pursuant to section 10(c) of the Act. We will evaluate the permit application, the proposed HCP, and comments submitted thereon to determine whether the application meets the requirements of section 10(a) of the Act. If the requirements are met, we will issue a permit to the City of Fontana for the incidental take of the Delhi Sands flower-loving fly from widening of Jurupa Avenue between Sierra and Tamarind Avenues in the City of Fontana, San Bernardino County, California.

Dated: June 29, 2007.

Jim A. Bartel,

Field Supervisor, Carlsbad Fish and Wildlife Office, Carlsbad, California.

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability, Final Restoration Plan

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service), on behalf of the Department of the Interior (DOI), as the sole natural resource trustee, announces the release of the Final Restoration Plan (RP) for the Cortese Landfill Superfund Site (Site). As a result of remedial activities and off-Site migration of Site-related contaminants, 1.6 acres of wetlands were destroyed and/or degraded. Adversely affected natural resources include waterfowl, wading birds, hawks, woodpeckers, swallows, migratory songbirds, invertebrates, reptiles, and amphibians. In addition, the section of the Upper Delaware River watershed near the Site hosts the largest population of wintering bald eagles in the Northeast. An embayment of the Delaware River adjacent to the Site provides feeding and/or spawning habitat for forage fish, American shad, striped bass, and American eel. The funds available from this settlement for restoration activities total approximately \$85,000. The restoration project selected for implementation in the Final RP involves wet meadow/wetland restoration and protection.

The Final RP presents the preferred alternative consisting of a restoration project that compensates for injuries to natural resources caused by contaminant releases and remedial activities associated with the Site.

ADDRESSES: Requests for copies of the RP may be made to: U.S. Fish and Wildlife Service, New York Field Office, 3817 Luker road, Cortland, New York 13045.

FOR FURTHER INFORMATION CONTACT: Ken Karwowski, Environmental Contaminants Program, U.S. Fish and Wildlife Service, New York Field Office, 3817 Luker Road, Cortland, New York 13045. Interested parties may also contact Mr. Karwowski by telephone at 607-753-9334 or by electronic mail at the following address: Ken_Karwowski@fws.gov for further information.

SUPPLEMENTARY INFORMATION: In May 1996, a natural resource damage settlement was achieved for the Cortese Landfill Superfund Site. The Service, on behalf of the DOI, was the sole settling natural resource Trustee. The funds available from the settlement for restoration activities total approximately \$85,000. The RP is being released in accordance with the Comprehensive Environmental Response, Compensation and Liability Act of 1980 as amended, (CERCLA) (42 U.S.C. 9601 *et seq.*), the Department of the Interior's Natural Resource Damage Assessment Regulations (43 CFR, part 11), and the National Environmental Policy Act (NEPA) 45 U.S.C. 4371 *et seq.*, and 42 CFR part 1500. The Final RP is intended to describe the Trustee's selected alternative to restore natural resources injured as a result of the discharge of hazardous substances at or from the Site.

Based on an evaluation of various restoration alternatives, the preferred alternative consists of a restoration project involving wet meadow/wetland restoration and protection.

Interested members of the public are invited to review the RP. Copies of the RP are available for review at the Service's New York Field Office at 3817 Luker Road, Cortland, New York. Additionally, the RP will be available for review at the following Web site link (<http://nyfo.fws.gov/ec/CorteseFRP.pdf>). Written comments on the Draft RP were considered and addressed in the Final RP.

Author: The primary author of this notice is Ken Karwowski, U.S. Fish and Wildlife Service, New York Field Office, 3817 Luker Road, Cortland, New York 13045.

Authority: The authority for this action is the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, (CERCLA) (42 U.S.C. 9601 *et seq.*), and the Department of the Interior's Natural Resource Damage Assessment Regulations found at 43 CFR, part 11.

Dated: April 20, 2007.

Thomas J. Healy,

Acting Regional Director, Region 5, U.S. Fish and Wildlife Service, U.S. Department of the Interior, DOI Authorized Official.

BILLING CODE 4310-55-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Lake Umbagog National Wildlife Refuge

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of draft comprehensive conservation plan and environmental impact statement for Lake Umbagog National Wildlife Refuge; request for comments.

SUMMARY: The Fish and Wildlife Service (Service) announces the availability for review of the Draft Comprehensive Conservation Plan and Environmental Impact Statement for Lake Umbagog National Wildlife Refuge (NWR). The Service prepared the Draft CCP/EIS in compliance with the National Environmental Policy Act of 1969 and the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997. We request public comments.

DATES: The Draft CCP/EIS will be available for public review and comment until close of business on August 20, 2007.

ADDRESSES: You may obtain copies of the draft CCP/EIS on compact diskette or in print by writing to Nancy McGarigal, Refuge Planner, U.S. Fish and Wildlife Service, 300 Westgate Center Drive, Hadley, Massachusetts 01035, or by electronic mail at northeastplanning@fws.gov. You may also view the draft on the Web at <http://library.fws.gov/ccps.htm>. We plan to host public meetings in Errol, Berlin, and Concord, New Hampshire, and in Bethel and Augusta, Maine. We will post the details of each meeting approximately 2 weeks in advance, via our project mailing list, in local papers, and at the refuge.

FOR FURTHER INFORMATION CONTACT: For more information, or to get on the project mailing list, contact Nancy McGarigal, Refuge Planner, at the address above, by telephone at 413-253-8562, by fax at 413-253-8468, or by e-mail at Nancy_McGarigal@fws.gov.

SUPPLEMENTARY INFORMATION: The National Wildlife Refuge System Administration Act of 1966, as amended

by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd et seq.), requires the Service to develop a CCP for each refuge. The purpose of developing a CCP is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing to the mission of the National Wildlife Refuge System (NWRS), in conformance with the sound principles of fish and wildlife science, natural resources conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental interpretation and education. The Service will review and update each CCP at least once every 15 years, in accordance with the National Wildlife Refuge System Improvement Act of 1997 and the National Environmental Policy Act of 1969.

We established Lake Umbagog NWR with its first land purchase in 1992. Its purposes are to provide long-term protection for unique wetlands, threatened and endangered species and migratory birds of conservation concern, and sustain regionally significant concentrations of wildlife.

This 20,513-acre refuge lies in Coos County, New Hampshire, and Oxford County, Maine. It contains widely diverse types of upland and wetland habitat around the 8,500-acre Umbagog Lake. Since establishing the refuge, we have focused primarily on conserving lands within its approved boundary; monitoring the occupancy and productivity of common loon, bald eagle, and osprey nesting sites, and protecting them from human disturbance; conducting baseline biological inventories; and providing wildlife-dependent recreational opportunities.

The Draft CCP/EIS evaluates three alternatives, which address 18 major issues identified during the planning process. Several sources generated those issues: The public, State or Federal agencies, other Service programs, and our planning team. The draft describes those issues in detail. Highlights of the alternatives follow.

Alternative A (Current Management): This alternative is the "No Action" alternative required by the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347, as amended). Alternative A defines our current management activities, including those planned, funded, or under way, and serves as the baseline against which to

compare the other two action alternatives. It would maintain our present levels of approved refuge staffing and the biological and visitor programs now in place. Our biological program would continue its passive habitat management. That is, the program would focus on protecting and monitoring key resources and conducting baseline inventories to improve our knowledge of the ecosystem. We would not manage our habitats actively, (e.g., by conducting silvicultural operations) under this alternative. However, we would continue such projects as monitoring and protecting common loon, bald eagle, and osprey nests, and biological inventories for breeding and migrating waterfowl, land birds, rare plant communities, and amphibians. If funding were available, we would conduct other projects, such as mapping vernal pools and surveying for small mammals. We would continue to allow research by others on refuge lands, as long as it contributes to our knowledge of refuge resources.

Regarding our visitor services programs, we would continue to conduct hunting, wildlife observation and photography, and limited environmental education and interpretation programs as staffing and funding allow. We would continue planning to extend our only trail, the Magalloway River Trail, and make it an accessible, self-guided, interpretive trail. We would also continue to allow snowmobiling on designated trails that are part of an established trail system, and allow remote lake camping at 12 sites, and river camping at 2 sites under a reservation system administered for us by the New Hampshire Division of State Parks and Recreation. We would continue our annual community outreach by participating in the "Umbagog Wildlife Festival" and "Take Me Fishing" events. Finally, we would continue to pursue the acquisition from willing sellers of the 6,392 acres of important wildlife habitat that lies within our currently approved acquisition boundary.

Alternative B (the Service-preferred alternative): This alternative represents the combination of actions we believe most effectively achieves the purposes and goals of the refuge and address the major issues. It builds on the programs identified under current management. Funding and staffing would need to increase to support adequately the program expansions we propose. We would construct a new administrative headquarters and visitor contact facility in a location more centrally located and better suited for administering refuge

resources. The protection and restoration of wetlands would continue to be our highest priority biological program, followed by forest management in upland habitats to benefit refuge focal species. Those include species that national and regional plans identify as conservation priorities. We would also expand our program to monitor the human disturbance of resources of concern and evaluate wildlife responses to refuge management strategies.

We would adapt those strategies to those results to ensure full resource protection. We would also manage furbearers.

We would expand three of our existing priority public use programs, and formally open the refuge for fishing. We would develop new infrastructure to facilitate wildlife observation, nature photography, and interpretation. Those include the construction of several new walking trails with observation platforms, interpretative signs, and roadside areas for viewing wildlife. Our hunting program would not change. We would continue to allow remote lake camping at 12 sites on refuge lands, but would close and restore the 2 sites on the river. Snowmobiling would continue on existing, designated trails, but we would not expand it.

We would enhance local and regional partnerships consistent with our mission. Those would include visitor contact facilities, regional wildlife trails and auto-tours, land conservation, and wildlife habitat management. We would pursue the establishment of a Land Management Research Demonstration (LMRD) site on the refuge to promote research and development of applied management practices, primarily for the benefit of refuge focal species and other resources of concern in the Northern Forest.

In addition to our acquisition of land in Alternative A, Alternative B includes expanding the refuge by 49,718 acres by combining 65 percent fee-simple acquisition with 35 percent conservation easement acquisition from willing sellers. All of those lands are contiguous with refuge land and undeveloped. They consist of high-quality, important wildlife habitat in an amount and distribution to provide us with management flexibility in achieving refuge habitat goals and objectives. Collectively, they would form a land base that affords vital links to other conserved lands in the Upper Androscoggin River watershed. Finally, they would fully complement and enhance the Federal, State and private conservation partnerships actively

involved in protecting this unique ecosystem.

Alternative C: This alternative proposes to establish and maintain the ecological integrity of natural communities on the refuge and surrounding landscape without specific emphasis or concern for any particular species or species groups. As in Alternative B, funding and staffing would increase to support the program expansions we propose, and we would construct a new administrative headquarters and visitor contact facility. Our biological program would build off the passive habitat management in Alternative A to include some habitat manipulations to create or hasten the development of mature forest structural conditions shaped by natural disturbances. Much of that would include upland forest management to diversify the age and structure of the young, even-aged stands created by past commercial uses of refuge forestland.

We would offer the same variety of programs as in Alternative B. However, we would promote more dispersed, low-density, undeveloped backcountry experiences. The only new infrastructure developments would be located at the new administrative facility. If necessary in order to promote a back-country experience in our hunting and fishing programs, we would develop a permit system, limit access, and designate hunting and fishing areas. We would continue to allow snowmobiling and remote lake camping as in Alternative B. However, we would place additional restrictions on the activities allowed at campsites to promote low-density management.

Alternative C would also include the LMRD program and furbearer management. It also builds off the proposal in Alternative A to include a refuge expansion of 76,304 acres, acquired in fee simple from willing sellers. We designed this proposal to protect and conserve large, contiguous blocks of habitat exceeding 25,000 acres and connect them to other conserved lands in the Upper Androscoggin River watershed. As in Alternative B, those expansion lands consist of high-quality, important wildlife habitat; occur in an amount and distribution that provide us the management flexibility to achieve refuge habitat goals and objectives; and, fully complement and enhance the land management of adjacent conservation partners.

After we evaluate and respond to public comments on this Draft CCP/EIS, we will prepare a Final CCP/EIS and announce its availability in the **Federal Register** for a 30-day review period. After this period, we will prepare a

Record of Decision (ROD), which is the decision document that certifies that the selected alternative meets all agency compliance requirements and achieves refuge purposes and the NWRS mission. The Regional Director signs the final CCP and ROD, which, if approved by the Director, will include the decision to expand the refuge as detailed in the Land Protection Plan.

Dated: July 18, 2006.

Richard O. Bennett,

Acting Regional Director, Region 5, U.S. Fish and Wildlife Service, Hadley, Massachusetts.

This document was received at the Office of the Federal Register on June 26, 2007.

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Job Placement and Training (Adult Vocational Training and Direct Employment)

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of proposed renewal of information collection document.

SUMMARY: The Office of the Assistant Secretary-Indian Affairs is seeking comments on the renewal of the Job Placement and Training (Adult Vocational Training and Direct Employment) Information Collection. This action is being taken due to the impending expiration of the existing data collection. This action will allow the Department on-going collection of data required by statute, regulation and policy.

DATE: Submit comments on or before September 4, 2007.

ADDRESSES: Comments should be sent to Robert W. Middleton, Ph.D., Director, Office of Indian Energy and Economic Development, either by facsimile at (202) 208-4564, or by mail to 1951 Constitution Avenue, NW., Mailstop 20-SIB, Washington, DC 20245.

FOR FURTHER INFORMATION CONTACT: You may request further information or obtain copies of the proposed information collection request from Lynn Forcia, Chief, Division of Workforce Development, telephone (202) 219-5270 or Jody Garrison, Manpower Development Specialist on (202) 208-2685.

SUPPLEMENTARY INFORMATION: The information collection is necessary to be in compliance with 25 CFR parts 26 and 27 and 25 U.S.C. 309 (Pub. L. 84-959 of 1956). The information is used to make

determinations of eligibility for services provided by the Department's Job Placement and Training Program (Adult Vocational Training Program). Data collection allows us to ensure uniformity of services, and to ensure current, accurate records, comply with the Government Performance Results Act (GPRA) and provide sufficient data for Performance Assessment Rating Tool (PART) evaluations. All information collected is retained in an individual case record and is used for case management/case planning purposes by the service provider. Data collected will be retained for three years.

Request for Comments: The Department of the Interior requests your comments on this collection concerning:

(a) The necessity of this information collection for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) The accuracy of the agency's estimate of the burden (hours and cost) of the collection of information, including the validity of the methodology and assumptions used;

(c) Ways we could enhance the quality, utility and clarity of the information to be collected; and

(d) Ways we could minimize the burden of the collection of the information on the respondents, such as through the use of automated collection techniques or other forms of information technology.

Please note that an agency may not sponsor or request and an individual need not respond to, a collection of information unless it has a valid OMB Control Number.

It is our policy to make all comments available to the public for review at the location listed in the **ADDRESSES** section, room 18, South Interior Building, during the hours of 8 a.m. 5 p.m., EST Monday through Friday except for legal holidays. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, be advised that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so. All comments from organizations or representatives will be available for review. We may withhold comments from review for other reasons.

OMB Control Number: 1076-0062.

Type of review: Renewal.

Title: 25 CFR parts 26 and 27.

Brief Description of Collection: Data Collection using this form is submitted
