duties occurred and the subsequent assessment of double antidumping duties.

Notification Regarding Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO as explained in the administrative protective order itself. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

These final results of administrative review and notice are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: August 9, 2007.

Joseph A. Spetrini,

Deputy Assistant Secretary for Import Administration.

Applications for Duty–Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; as amended by Pub. L. 106–36; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States. Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce 14th and Constitution Ave., NW, Room 2104 Washington, D.C. 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 2104, U.S. Department of Commerce.

Docket Number: 07–051. Applicant: Colorado College, Department of Physics, 14 E. Cache la Poudre, Colorado Springs, CO 80903 Instrument: Low Temperature Ulta–High Vacuum Scanning Tunneling Microscope. Manufacturer: Omicron Nanotechnology GmbH, Germany Intended Use: The instrument is intended to be used in a collaborative project with NIST to develop a Josephson–junction based quantum computer. The instrument will provide detailed maps of the electron density of the materials as a function of spacial position and energy. Since electrical conductivity derives from electron density, the maps will allow study of how well electrons are locally conducted through various materials.

The instrument provides: (a) A scanning tunneling microscope mounted inside a 4 K liquid helium reservoir (with a 22–hour liquid helium refill time); (b) Operation at an equilibrium temperature of 4 K with in–situ sample preparation and tip transfer capability); (c) Low drift rates of 1 angstrom/hour (d) RMS vibration amplitudes of <0.005 angstrom in a 300 Hz bandwidth; and (e) Sample registry after deposition. Application accepted by Commissioner of Customs: July 31, 2007.

Docket Number: 07–053. Applicant: University of Kentucky, Dept. Civil Engineering, 161 Raymond Building, Lexington, KY 40506 Instrument: Soil Stiffness Testing System. Manufacturer: GDS Instruments, Ltd., UK. Intended Use: The instrument is intended to be used to measure soil stiffness at very small strains in a specially modified automated triaxial test apparatus. These measurements are critical to understanding and consequently predicting soil behavior for all geotechnical systems.

The instrument provides a vertically propagating S–wave transmitter and a P–wave receiver along with a vertically propagating P–wave transmitter and S–wave receiver and a master signal conditioning unit along with GDSBES software to control data acquisition and drive signal generation for S and P wave velocity tests as well as a Hall effect local strain set (2 axial,1 radial)and mid–plane pore pressure kit. No domestic sources making similar devices provide an integrated system of this type of testing with the resolution required for advanced geotechnical research. Application accepted by Commissioner of Customs: August 3, 2007.

Faye Robinson,

Director, Statutory Import Programs Staff, Import Administration.

Docket Number: 07–047. Applicant: University of Southern California, University Park, Los Angeles, CA 90089. Instrument: Electron Microscope, Model JEM–1400. Manufacturer: JEOL, Ltd., Japan. Intended Use: The instrument is intended to be used to decipher local structural organization in cells and tissues, to visualize the shapes of proteins as they undergo conformational reorganization into elongated amyloid fibrils and other spherical structures and to investigate other larger molecular nano- particles. Application accepted by Commissioner of Customs: June 18, 2007.

Docket Number: 07–050. Applicant: University of Massachusetts Medical School, 55 Lake Avenue North Worcester, MA 01655. Instrument: Electron Microscope, Model Quanta 200 FEG . Manufacturer: FEI Company, Czech Republic Intended Use: The instrument is intended to be used to study the distribution of cilia on cell surfaces, the structure of bone cells in healthy and diseased bone, the structure of fly antennae in flies with mutations homologous to human disease mutations, the structure of mouse embryos, the means of entry of pathogens into cells and the distribution of cell surface receptors involved in the immune response and various other biological issues. Application accepted by Commissioner of Customs: July 23, 2007.

Docket Number: 07–049. Applicant: Indiana University, 400 East Seventh

Street, Room 404, Bloomington, IN 47405 . Instrument: Electron Microscope, Model JEM–3200FS. Manufacturer: JEOL Ltd., Japan Intended Use: The instrument is intended to be used for, among other purposes: structure/function studies of modified icosahedral virus particles with long term applications in biomedical imaging and drug delivery; real time structure determination of viruses and their assembly intermediates for creating pH sensors and finding novel targets for drug delivery; analysis of microbial biofilms and the structural and chemical analysis of nanoparticles that are used as materials science platforms. Application accepted by Commissioner of Customs: July 23, 2007.

Docket Number: 06–042. Applicant: The University of Illinois at Urbana–Champaign, 616 E. Green St., Ste. 212, Champaign, IL 61820. Instrument: electron microscope, Model JEM–2200FS. Manufacturer: JEOL, Ltd., Japan. Intended Use: The instrument is intended to be used by a centralized facility for the microanalysis of materials. Properties of materials studied include: relation of structure to catalytic activity; strain and composition distribution within the nanostructures, effects of impurities on the strength of materials, domain structure, ordering mechanisms and coherency strain effects and structural motifs of chromosome architecture and its modification. Application accepted by Commissioner of Customs: July 10, 2006.

Docket Number: 07–052. Applicant: Scripps Research Institute, 10550 North Torry Pines Road, La Jolla, CA 92307. Instrument: Electron Microscope (2), Tecnai G2 Spirit TWIN and Morgagni TEM. Manufacturer: FEI Company, Czech Republic. Intended Use: The instrument is intended to be used for structural investigations of biological macromolecular assemblies including: structure of COPII coated vesicles, molecular motors, electron dense labels for macromolecules, high resolution structures among bacteriophages, structure of the HIV capsid assembly and characterization of the chloroplast ribosome. Application accepted by Commissioner of Customs: July 31, 2007.

National Oceanic and Atmospheric Administration

[Docket No. 070213033–7033–01]

RIN 0648–XC08

Fisheries of the Exclusive Economic Zone Off Alaska; Atka Mackerel Lottery in Areas 542 and 543

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of fishery assignments.

SUMMARY: NMFS is notifying the owners and operators of registered vessels of their assignments for the 2007 B season Atka mackerel fishery in harvest limit area (HLA) 542 and/or 543 of the Aleutian Islands subarea of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to allow the harvest of the 2007 B season HLA limits established for area 542 and area 543 pursuant to the 2007 and 2008 harvest specifications for groundfish in the BSAI.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), August 15, 2007, until 1200 hrs, A.l.t., November 1, 2007.

FOR FURTHER INFORMATION CONTACT: Jennifer Hogan, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

In accordance with § 679.20(a)(8)(iii)(A), owners and operators of vessels using trawl gear for directed fishing for Atka mackerel in the HLA are required to register with NMFS. Eleven vessels have registered with NMFS to fish in the B season HLA fisheries in areas 542 and/or 543. In order to reduce the amount of daily catch in the HLA by about half and to disperse the fishery over time and in accordance with § 679.20(a)(8)(iii)(B), the Administrator, Alaska Region, NMFS, has randomly assigned each vessel to the HLA directed fishery for Atka mackerel for which they have registered and is now notifying each vessel of its assignment.

Vessels authorized to participate in the first HLA directed fishery in area 542 and/or in the second HLA directed fishery in area 543 in accordance with § 679.20(a)(8)(iii) are as follows: Federal Fishery Permit number (FFP) 3835 Seafisher, FFP 3423 Alaska Warrior, FFP 2443 Alaska Juris, FFP 2733 Seafreeze Alaska, and FFP 4092 Constellation.

Vessels authorized to participate in the first HLA directed fishery in area 543 in accordance with § 679.20(a)(8)(iii) are as follows: FFP 3400 Alaska Ranger, FFP 2134 Ocean Peace, FFP 4093 Alaska Victory, and FFP 3819 Alaska Spirit.

Vessels authorized to participate in the second HLA directed fishery in area 542 in accordance with § 679.20(a)(8)(iii) are as follows: FFP 2800 U.S. Intrepid, FFP 1879 American No. 1, FFP 3400 Alaska Ranger, FFP 2134 Ocean Peace, FFP 4093 Alaska Victory, and FFP 3819 Alaska Spirit.

Classification

The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is unnecessary. This notice merely advises the owners of these vessels of the results of a random assignment required by regulation. The notice needs to occur immediately to notify the owner of each vessel of its assignment to allow these vessel owners to plan for participation in the B season HLA fisheries in area 542 and area 543.

The AA also finds good cause to waive the 30–day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 13, 2007.

James P. Burgess,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
