

licensing and registration database accurate and up-to-date, we delegate to the WTB the authority to adopt rules regarding the reporting of database information including reporting of any license or station transfers. The WTB will issue a Public Notice seeking comment on these issues, if needed.”²⁸

The public will be able to examine the registration database online, through ULS, to determine locations of fixed and base stations. More specifically, the database will allow applicants and licensees to identify the location of base and fixed stations in the 3650 MHz band to facilitate cooperation among users and protection of grandfathered stations from interference. The database will also permit the Commission to monitor the use of this spectrum as new technologies and services develop.

Over time, the utility of the database will be diminished if registration data becomes outdated or otherwise inaccurate. Thus, we emphasize that the requirement to register fixed and base stations prior to operation is ongoing—operating previously registered but subsequently modified equipment or operating parameters would subject the operator to enforcement action. The Commission’s rules also require registrations for unused fixed and base stations to be deleted.²⁹ For purposes of this requirement, we will generally consider a fixed or base station to be “unused” if it has not operated for one year or more.³⁰ Also, as noted above, licensees must update their base and fixed station registrations to reflect changes resulting from equipment manufacturer’s software upgrades.

Additional reporting or periodic certification requirements may be necessary to maintain accurate and current data. However, rather than adopting or seeking comment on additional measures at this juncture, the WTB is reserving the right to revisit this matter in the future after the Bureau, as well as licensees, have the opportunity to gauge the effectiveness of the existing requirements for this new service.

²⁹ See 47 CFR 90.1307.

³⁰ See generally 47 CFR 90.157(a) (“[u]nless stated otherwise in this part or in a station authorization * * * any station which has not operated for one year or more is considered to have been permanently discontinued.”).
