What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) enhance the quality, utility, and clarity of the information to be collected; and
- (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA

could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action are state/tribal governments and individual community members who voluntarily participate in the remedial phase of the Superfund program and in associated community involvement activities throughout the Superfund process.

Title: National Oil and Hazardous Substances Pollution Contingency Plan (NCP) (Renewal).

ICR numbers: EPA ICR 1463.07, OMB Control Number 2050-0096.

ICR status: This ICR is currently scheduled to expire on January 31, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This Information Collection Request is a renewal ICR that covers the remedial portion of the Superfund Program, as specified in the Comprehensive Environmental

Response, Compensation, and Liability Act of 1980 as amended (CERCLA) and the National Oil and Hazardous Substance Pollution Contingency Plan (NCP). All remedial actions covered by this ICR (e.g., Remedial Investigations/Feasibility Studies) are stipulated in the statute (CERCLA) and are instrumental in the process of cleaning up National Priorities List (NPL) sites to be protective of human health and the environment. Some community involvement activities covered by this ICR are not required at every site (e.g., Technical Assistance Grants) and depend very much on the community and the nature of the site and cleanup. All community activities seek to involve the public in the cleanup of the sites, gain the input of community members, and include the community's perspective on the potential future reuse of Superfund NPL sites. Community involvement activities can enhance the remedial process and increase community acceptance and the potential for productive and useful reuse of the sites.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 80 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 7,970.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: As required.

Estimated total annual burden hours: 71,165 hours.

Estimated total annual costs: \$572,415. This includes an estimated annual burden cost of \$61,245 for States and an estimated cost of \$511,170 for communities.

Dated: August 15, 2007.

Remediation and Technology Innovation.*
