Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA-98-4470]

Pipeline Safety: Meetings of the Technical Pipeline Safety Standards Committee and the Technical Hazardous Liquid Pipeline Safety Standards Committee

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), U.S. Department of Transportation (DOT).

ACTION: Notice of canceled meetings and public workshop.

SUMMARY: This notice cancels the Wednesday, April 25 and Thursday, April 26, 2007 meetings of PHMSA's Technical Pipeline Safety Standards Advisory Committee (TPSSC) and Technical Hazardous Liquid Pipeline Safety Standards Committee (THLPSSC) and a public workshop.

FOR FURTHER INFORMATION CONTACT: For additional information regarding this notice contact Cheryl Whetsel at (202) 366-4431, or by e-mail at cheryl.whetsel@dot.gov.

SUPPLEMENTARY INFORMATION: On February 12, 2007, the THLPSSC discussed a proposal to extend pipeline safety regulations to the unregulated hazardous liquid gathering lines and low stress pipelines, and potential changes to the proposal to address the requirements of the Pipeline Integrity, Protection, Enforcement and Safety Act of 2006. PHMSA expects to incorporate these changes into a supplemental notice of proposed rulemaking (SNPRM) within the next few weeks. PHMSA published a **Federal Register** notice on March 23, 2007 (72 FR 13559) which announced April meetings. The THLPSSC was to consider and vote on the SNPRM. PHMSA has decided an April meeting would not give the THLPSSC sufficient time to review the SNPRM. In addition, the THLPSSC would not have the benefit of viewing

the public comments on the SNPRM. PHMSA will schedule a THLPSSC meeting later in the year to consider and vote on this rulemaking proposal.

The other rulemaking item on the April agenda was a TPSSC meeting to consider and vote on a proposal to relax regulatory requirements governing public awareness programs conducted by operators of master meter systems and certain operators of petroleum gas systems. The proposal is a minor non-controversial change to an existing rulemaking PHMSA will schedule a TPSSC telephone meeting later in the year to consider and vote on this rulemaking proposal.

Lastly, PHMSA continues to evaluate reassessment intervals for gas integrity management programs. PHMSA may reschedule the public workshop canceled by this notice or decide on an alternative way to seek public input.

Authority: 49 U.S.C. 60102, 60115.

Issued in Washington, DC on March 30, 2007.

Jeffrey D. Wiese,
Acting Associate Administrator for Pipeline Safety.

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA-06-25735; Notice 2]

Pipeline Safety: Grant of Waiver; Sabine Pass LNG

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA); U.S. Department of Transportation.

ACTION: Grant of waiver; Sabine Pass LNG, L.P.

SUMMARY: Sabine Pass LNG, L.P. (SPLNG) requested a waiver of compliance from the Federal pipeline safety regulation that requires liquefied natural gas (LNG) facilities constructed after March 31, 2000 to comply with the National Fire Protection Association's Standard 59A (NFPA 59A), 2001 Edition. The waiver specifically requested permission to use ultrasonic examination as an acceptable alternative non-destructive testing method for welds on LNG tanks.

SUPPLEMENTARY INFORMATION:

Background

SPLNG requested a waiver from compliance of the Federal pipeline safety requirements at 49 CFR 193.2301

for its facility at Cameron Parish, Louisiana. This regulation requires each LNG facility constructed after March 31, 2000 to comply with 49 CFR part 193 and NFPA Standard 59A, 2001 Edition. NFPA Standard 59A, 2001 Edition requires that welded containers designed for not more than 15 pounds per square inch gauge comply with the Eighth Edition, 1990, of American Petroleum Institute Standard 620 (API 620), "*Design and Construction of Large, Welded, Low-Pressure Storage Tanks (Appendix Q)*." The Eighth Edition of API 620 requires inspection according to Appendix Q which calls for a full radiographic examination of all vertical and horizontal butt welds associated with the container.

SPLNG is proposing to use the Tenth Edition, 2002, Addendum 1 of the 2004 Edition of API 620 at its Cameron Parish LNG facility. This Tenth Edition allows ultrasonic examination as well as radiography as an acceptable alternative non-destructive testing method. SPLNG proposes to use ultrasonic examination, which consists of full semi-automated and manual ultrasonic examination using shear wave probes. The examination will also consist of a volumetric ultrasonic examination using a combination of creep wave probes and focused angled longitudinal wave probes. To allow ultrasonic examination in accordance with the most recent NFPA Standard 59A, 2006 Edition, a waiver is required.

PHMSA considered SPLNG's waiver request and published a notice in the **Federal Register** inviting interested persons to comment on whether a waiver should be granted (71 FR 56584; September 27, 2006). No comments were received.

The NFPA issued a Tentative Interim Amendment to NFPA Standard 59A, 2006 Edition, effective February 14, 2006 (59A TIA06). This amendment incorporates API 620, Tenth Edition, 2002, Addendum 1, 2004. The Tenth Edition adds ultrasonic examination as an acceptable method of non-destructive examination for welds. The proposed wording of the Tenth Edition 2002, Addendum 1, 2004 of API 620 deletes "radiographic" inspection and replaces it with "complete" examination and defines "complete" examination as radiographic or ultrasonic examination.

Decision: PHMSA finds that the use of ultrasonic examination in accordance with NFPA Standard 59A, 2006 Edition and 59A TIA06 is not inconsistent with pipeline safety and achieves an equivalent level of safety. Therefore, SPLNG's request for waiver of compliance with § 193.2301 is granted, subject to the following conditions: (1)
