#### **TECHNICAL NOTES**

The Workers' Compensation Data Book is based on the annual accumulation of data in the State of Hawaii, Disability Compensation database.

- 1. The following coding systems and locally revised versions were used to categorize data:
  - a) Industrial attachment is determined by the principal activity of the employer as defined in the North American Industry Classification System 2002 (NAICS). The new NAICS industry groupings better reflect the workings of the U.S. economy, particularly in the services sector. NAICS, developed using a production oriented conceptual framework, groups establishments into industries based on the activity in which they are primarily engaged. It is not an update of the Standard Industrial Classification (SIC) system. NAICS focuses on how products and services are created. More information on NAICS is available at the U.S. Census Bureau website at http://www.census.gov/epcd/www/naics.html.
  - b) Codes and definitions used to categorize Nature of Injury or Illness, Part of Body Affected, Source of Injury or Illness, and Event or Exposure were modeled after the 1992 Bureau of Labor Statistics (BLS) Occupational Injury and Illness Classification Structures (OIICS). Starting with 1996 data, BLS OIICS data codes were locally modified to 2 digits instead of 4 digits, making the data less detailed.
  - c) Occupational groups are based on the 1990 Alphabetical Index of Industries and Occupations, developed and published by the Bureau of the Census, Washington, D.C., U.S. Government Printing Office. Starting with 1996 data, the occupation classifications were locally modified, making the data less detailed.
- 2. From 1999, the employment data source used in the **Worker's Compensation Data Book** has been changed. Instead of the **Labor Force Data Book** employment we are using the **Employment and Payrolls in Hawaii** statistics.
