

**ADDRESSES:** The permit and related documents are available for review upon written request or by appointment in the following offices:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)713-0376; and

Northeast Region, NMFS, One Blackburn Drive, Gloucester, MA 01930-2298; phone (978) 281-9328; fax (978) 281-9394.

**FOR FURTHER INFORMATION CONTACT:** Malcolm Mohead or Carrie Hubard, (301) 713-2289.

**SUPPLEMENTARY INFORMATION:** On August 08, 2005, notice was published in the *Federal Register* (70 FR 45701) that a request for a scientific research permit to take shortnose sturgeon had been submitted by the New York State Department of Environmental Conservation (NYSDEC). The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

In order to evaluate seasonal movement of shortnose sturgeon in Haverstraw and Newburgh Bays of the Hudson river, the NYSDEC is authorized annually to capture a maximum of 500 adult and juvenile shortnose sturgeon with gill nets, and to measure, weigh, scan for tags, insert passive integrated transponder tags and Carlin tags (if untagged) and then release.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of this permit, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: November 2, 2006.

**P. Michael Payne,**

#### Endangered Species; File No. 1576

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; issuance of permit.

**SUMMARY:** Notice is hereby given that NMFS, Northeast Fisheries Science Center (NEFSC), 166 Water Street, Woods Hole, MA 02543-1026, has been issued a permit to take loggerhead (*Caretta caretta*), leatherback (*Dermochelys coriacea*), Kemp's ridley (*Lepidochelys kempi*), green (*Chelonia mydas*), hawksbill (*Eretmochelys imbricata*), and olive ridley (*Lepidochelys olivacea*) sea turtles for purposes of scientific research.

**ADDRESSES:** The permit and related documents are available for review upon written request or by appointment in the following offices:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)427-2521;

Northeast Region, NMFS, One Blackburn Drive, Gloucester, MA 01930-2298; phone (978)281-9300; fax (978)281-9394.

**FOR FURTHER INFORMATION CONTACT:** Patrick Opay or Kate Swails, (301)713-2289.

**SUPPLEMENTARY INFORMATION:** On April 28, 2006, notice was published in the *Federal Register* (71 FR 25153) that a request for a scientific research permit to take loggerhead, leatherback, Kemp's ridley, green, hawksbill, and olive ridley sea turtles had been submitted by the above-named organization. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Researchers will test modifications to scallop dredge gear that may reduce the probability of turtle injuries due to gear interactions. They will also opportunistically collect biological information from sea turtles captured in other projects or fisheries to improve NMFS's ability to assess stocks and the impact of anthropogenic activities. The researchers will annually capture and/or handle, measure, weigh, flipper tag,

passive integrated transponder tag, tissue biopsy, collect parts from, photograph, and release up to 81 loggerhead, 10 leatherback, 27 Kemp's ridley, 11 green, 1 hawksbill, and 1 olive ridley. Up to 23 loggerheads and 1 leatherback, 1 Kemp's ridley, and 1 green sea turtle could be taken lethally annually. The research would occur in the Western Atlantic Ocean (Florida Keys through Maine) and the permit would be issued for 5 years.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of any endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

#### Nominations for the Annual Sustainable Fisheries Leadership Awards for 2007

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; request for nominations.

**SUMMARY:** NOAA has established the Sustainable Fisheries Leadership Awards Program to recognize outstanding performances, achievements and leadership by industries, organizations and individuals who promote best stewardship practices for the sustainable use of living marine resources and ecosystems, and who have fostered change and inspired a stewardship ethic within their community. This notice solicits nominations of qualified candidates for the second annual Sustainable Fisheries Leadership Awards in six award categories listed in this Notice. NMFS has partnered with the Fish for the Future Foundation to collect the nominations.

**DATES:** Nomination forms and required supporting materials must be received on or before January 8, 2007.
