Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St. NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's

eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. AD07–1–000]

Billing Procedures for Annual Charges for the Costs for Administering Part I of the Federal Power Act; Notice Reporting Increase in Municipal Costs for FY 2005 Actual and FY 2006 Estimated Hydropower Administrative Annual Charges

October 3, 2006.

1. Municipal licensees have expressed concerns regarding the substantial increases they have observed in their Statement of Annual Charges issued on August 4, 2006. Specifically, licensees are concerned with the amounts assessed for the current year's *Administrative Charge* and the prior year's *Adjustment of FERC Administrative Charge*. The increase in these charges is primarily attributable to a substantial increase in the proportion of direct labor hours staff charged to municipal projects in FY 2005. The purpose of this notice is to provide licensees with information regarding the Commission's process for assessing these charges and how this increase in direct labor applicable to municipal projects resulted in the increases observed on the August 4, 2004 billing statements.

Components of Administrative Annual Charges

2. The Federal Power Act requires the Federal Energy Regulatory Commission to assess annual charges against licensees to reimburse the United States for the costs of administration of the Commission's hydropower regulatory

program.¹ The Omnibus Budget Reconciliation Act of 1986 provided FERC with the authority to “assess and collect fees and annual charges in any fiscal year in amounts equal to all of the costs incurred by the Commission in that fiscal year.”² Each fiscal year the Commission estimates the total costs of its operations for the current year. These estimates are the basis for the current year's *Administrative Charge* which is reflected on the annual billing statements as such. In addition, the Commission determines the actual operating costs for the prior fiscal year, and the prior year's *Administrative Charge* is adjusted either upward or downward for the difference between the prior year's actual costs and the prior year's estimates. These adjustments to the prior year's costs are then reflected as the *Adjustment to FERC Administrative Charge* on the annual billing statements.

Allocation Methodology for Hydropower Projects

3. The total costs for the hydropower regulatory program consist of both direct and indirect costs. Once the Commission calculates estimated and actual program costs, it allocates these costs based on direct time charged by Commission staff to designated time and labor codes for municipal and non-municipal projects.³ Annually the Commission allocates current year estimated costs and prior year actual costs based on the direct labor proportions of staff time recorded against municipal and non-municipal projects in the prior fiscal year. Applying this methodology allows the Commission to utilize credible historical information for the allocation of current year estimated costs and provides the relevant data needed to appropriately affect the prior year downward or upward adjustment when allocating the prior year's actual costs.

4. With regard to the August 4, 2006 statements, the Commission allocated the cost bases for the current year's *Administrative Charge* and the prior year's *Adjustment to FERC*

¹ 16 U.S.C 794–823b.

² Pub. L. 99–509 § 3401, 100 Stat. 1874, 1890–91 (1986) (codified at 42 U.S.C. 7178).

³ The Commission has implemented within its time and attendance system designated codes which segregate staff hours spent on municipal projects from staff hours spent on non-municipal projects. In calculating direct labor proportions, the Commission aggregates the hours recorded against municipal and non-municipal time codes. The number of hours charged to municipal codes is divided by this aggregate total to derive the municipal proportion used to allocate hydropower program costs. The number of hours charged to non-municipal projects is treated similarly to derive the non-municipal proportion.
