

Privacy Impact Assessment: No impact(s).

Needs and Uses: The Commission requires that cordless telephone security features protect the public switched telephone network from unintentional line seizure and telephone dialing. These features prevent unauthorized access to the telephone line, the dialing of calls in response to signals other than those from the owner's handset and the unintentional ringing of a cordless telephone handset. Use of the cordless telephone security features reduces the harm caused by some cordless telephones to the "911" Emergency Service Telephone System and the telephone network in general.

Synopsis

On July 19, 2005, the Commission concluded that non-shared language Spanish translation VRS—*i.e.*, relay service in which the communication assistant (CA) translates what is signed in ASL into spoken Spanish, and *vice versa*—is a form of TRS compensable from the Fund. Also, on July 19, 2005, the Commission concluded that, effective January 1, 2006, providers seeking compensation from the Fund for offering VRS must offer the service 24 hours a day, 7 days a week.

The public notice seeks comment on whether ASL-to-Spanish VRS, if provided, must be offered 24 hours a

day, 7 days a week to be eligible for compensation from the Fund.

I. General Information

A. Introduction

1. The Wireless Telecommunications Bureau announces the procedures and minimum opening bid amounts for the upcoming auction of new nationwide commercial Air-Ground Radiotelephone Service licenses in the 800 MHz band scheduled for May 10, 2006 (Auction No. 65). On January 10, 2006, in accordance with section 309(j)(3) of the Communications Act of 1934, as amended, the Bureau released a public notice seeking comment on a reserve price and minimum opening bid amounts and the procedures to be used in Auction No. 65. The Bureau received one comment in response to the *Auction No. 65 Comment Public Notice*, 71 FR 3513, January 23, 2006.

i. Background of Proceeding

2. On February 22, 2005, the Commission released the *Air-Ground Order*, 70 FR 19377, April 13, 2005, in which it adopted a flexible regulatory approach to determine the future band configuration of the four megahertz of dedicated spectrum in the 800 MHz commercial Air-Ground Radiotelephone Service. Based on the band configuration proposals submitted by interested parties in the proceeding, the Commission decided to assign nationwide air-ground licenses under one of three alternative band configurations, implementing the band plan receiving the highest gross aggregate bid in an auction. The Commission also requested comment on competitive bidding rules for the 800 MHz commercial Air-Ground Radiotelephone Service.

3. On December 9, 2005, the Commission released the *Air-Ground Reconsideration Order and R&O*, 70 FR 76414, December 27, 2005, in which it resolved petitions for reconsideration of the *Air-Ground Order* and adopted competitive bidding rules for the 800 MHz commercial Air-Ground Radiotelephone Service.

4. Licensees in the 800 MHz Air-Ground Radiotelephone Service will be permitted to provide any type of air-ground service (*i.e.*, voice telephony, broadband Internet, data, etc.) to aircraft
