

sampling operation. We are not aware of other systematic coding issues that need to be addressed via this refile.

The primary goal is to produce reliable State level estimates for each NAICS industry. We will use a stratified probability-proportionate-to-size (PPS) sample strategy for selecting the sample of single-establishment firms. The population of eligible single-establishment firms will be partitioned into State by NAICS strata. Within each stratum, each establishment will be assigned a probability of selection that is a function of its relative size within the stratum (payroll) and a stratum-specific reliability constraint. The larger establishments in a stratum may have probabilities equal to 1.00. Within each stratum, an independent sample will be selected. We will use a fixed sample size selection method for selecting the sample. This technique considerably improves the reliability of the resulting survey estimates by eliminating the variability associated with a variable sample size. The impact of the multi-establishment firms within each stratum will be taken into account in deriving the target sample size from the single-establishment firm population. We estimate that the mail canvass for the 2007 construction sector will include approximately 119,000 establishments of single-establishment firms.

SUPPLEMENTARY INFORMATION

I. Abstract

The National Institute of Standards and Technology (NIST), a component of the Technology Administration reporting to the Under Secretary for Technology, under the Fastener Quality Act (the Act) (Pub. L. 101-592 amended by Pub. L. 104-113, Pub. L. 105-234

and Pub. L. 106-34) is required to accept an affirmation from laboratory accreditation bodies and quality system registrar accreditation bodies. They are required to meet International Organization for Standardization/International Electro-Technical Commission (ISO/IEC) Guide 17011 (replaced ISO/IEC Guides 58 and 61). An organization having made such an affirmation to NIST may accredit either fastener testing laboratories or quality system registrars for fastener manufacturers in accordance with the applicable provisions of the Fastener Quality Act. NIST will solicit information declarations from U.S. and foreign private accreditation bodies. The information collected will enable NIST to compile a list of accreditation bodies able to provide accreditations meeting all the requirements of the Act and of the procedures, 15 CFR part 280.

Section 10 of the Act requires NIST to accept petitions from persons publishing a document setting forth guidance or requirements providing equal or greater rigor and reliability compared to ISO/IEC Guide 17025 (replaced ISO/IEC Guide 25), ISO/IEC 17011 or ISO/IEC Guide 62. The petitions to consider a document as an alternative to one of the ISO/IEC documents may be accepted by the Director of NIST for use provided the document provides equal or greater rigor and reliability as compared to the ISO/IEC document.

II. Method of collection

Applicants submit required information in paper form.

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Evaluation of the Coastal Management Fellowship Program

AGENCY: National Oceanic and Atmospheric Administration (NOAA), DOC.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before July 17, 2006.

ADDRESSES: Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dHynek@doc.gov).

SUPPLEMENTARY INFORMATION:

I. Abstract

The NOAA Coastal Services Center (CSC) conducts the Coastal Management Fellowship, which provides on-the-job education and training opportunities in coastal resource management and policy for postgraduate students as well as

project assistance to state coastal zone management programs. CSC is seeking a new clearance to conduct data collection activities associated with the evaluation of the fellowship program. The evaluation is designed to assess the effectiveness of the fellowship and its impact on state coastal zone programs to address high priority coastal issues. The results of the evaluation will provide information on the success of the Coastal Management Fellowship Program in meeting its goals to train young professionals entering the coastal management field and to help states address high priority coastal issues.

Four types of respondents are included in the evaluation: Fellows (past and current), finalists to the fellowship (past and current), state coastal zone program mentors, and partner organizations. Current and past fellows will complete an electronic survey that assesses both their fellowship experience and subsequent professional goals/experiences. Also, current and past finalists will complete a telephone interview that evaluates both their experiences applying to the fellowship program and subsequent professional goals/experiences. State coastal zone program mentors will complete an electronic survey that assesses their experiences with the fellowship program and the impact of the program on their state coastal zone program. In addition, partner organizations will complete an electronic survey that assesses their experiences with the fellowship and how the fellowship has impacted CSC.

II. Method of Collection

Electronic surveys and telephone interviews will be the modes of collection.
